(Fall) Period Courses: Notable Novels in Film (pre-1800)

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.

Focusing on late eighteenth- and nineteenth-century French novels, we will explore the historical and cultural background of a decadent French aristocracy and witness the triumph of the bourgeoisie. As visual resources we will use paintings by Boucher, Fragonard, Ingres, Delacroix, Courbet, Manet, Degas, as well as cinematic interpretations of Laclos' *Les Liaisons dangereuses*, Diderot's *La Religieuse*, and literary works by George Sand, Stendhal, Balzac, Flaubert, Zola, and Maupassant. Literacy in technology is an integral part of this course, and students will learn to produce a digital narration in iMovie as a term project.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Instructors: N. Vaget

(Spring) Period Courses: Joan of Arc: Problematic Heroine (pre-1800)

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.

What did people really think of Joan in her lifetime? Why did the French burn their savior, then canonize her centuries later? Why was her story told and retold, her visual likeness portrayed thousands of times and for so many different purposes, whether political or personal, both within and beyond France? This course attempts to answer these and other questions on Joan in history, literature, and the visual arts from 1429-1840s, by reading her

trial transcripts, contemporaries like Christine de Pizan, then Le Franc, Villon, Montaigne, Gournay, Chapelain, Voltaire, Sade, Michelet--and numerous artists. Clips from famous films on her (1890s-1990s) will also be shown and discussed.

(Spring) Seminar in Romance Languages and Cultures: History of Romance Languages

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; Romance Languages 375, Spanish 360, Italian 361)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works and write papers in French.

This course examines the structural evolution of Romance languages from Vulgar Latin to contemporary forms. A chronological account will be organized around themes of persistence (inheritance from Latin) and innovation (structural change). We will begin by exploring different theories about linguistic change. Then, using concrete examples, we will analyze the main stages of development of Romance languages by focusing on different features at all linguistic levels and relating them to historical and sociological factors.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, and permission of course instructor

Notes: NOTE: To receive 300-level credit in French, students must write all papers and do appropriate course readings in French.

(Fall) Courses on Social and Political Issues and Critical Approaches: Topic: The French New Wave: Its Origins and Its Influence

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Film Studies 370f-01)

Preamble (for topics courses): These courses examine a definable phenomenon--an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode--relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.

The New Wave was a series of films made in the 1960s by a group of pioneers, who had seen almost every film ever made and particularly admired American and Russian cinema. This creative explosion, a reaction to "cinéma de Papa," won an aesthetic and political victory against an increasingly affluent, self-satisfied society, and brought about a revolution in the film industry.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

(Spring) Courses in Francophone Studies: Lost in Transit: Migrants, Exiles and Refugees in Contemporary Francophone Literature and Film

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses study non-metropolitan French-speaking cultures and literary works written in French outside Europe. Areas of focus are one or more of the following regions: Africa, the Caribbean, or Canada.

In this course, we will explore the interrelated themes of displacement and unsettlement in their contemporary manifestations in post-colonial African societies, and see how francophone cinema and literature grapple with experiences that cut across cultures, ethnicities, nationalities and other boundaries. Although the metropolitan experience remains the dominant model, we will also read and view works that foreground movements within the peripheries due to conflicts, economic hardships and political persecution. Authors will include Waberi, Mambéty, Diop, Aberrahmane Cissoka, Kane and others.

Prerequisites: two of the following courses: French 215, 219, 225, 230

Instructors: E. Diop

Expected enrollment: 16

(Spring) Advanced Level Seminar: Topic: "Every Secret Thing": Contemporary Women's Autobiographical Narrative in French

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

This course will examine contemporary autobiographical narratives written by women, with a particular focus on authors whose works include multiple autobiographical texts of various genres: fictional, nonfictional, and semifictional. We will analyze the ways in which these authors present their life stories, especially its traumatic or secret episodes, and the ways in which their works discuss the process of that presentation and of memory itself. Themes that are common to these autobiographical texts include: relationships with family, education, sexuality, class, and love. In addition to literary texts, we will analyze in detail several autobiographical films made by women.

(Fall) Introduction to Gender Studies

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar

This course is designed to introduce students to social, cultural, historical, and political perspectives on gender and its construction. Through discussion and writing, we will explore the intersections among gender, race, class, and sexuality in multiple settings and contexts. Taking an interdisciplinary approach to a variety of questions, we will consider the distinctions between sex and gender, women's economic status, the making of masculinity, sexual violence, queer movements, racism, the challenges of feminist activism across nations, and possibilities for change. We will also examine the development of feminist theory, including its promises and challenges.

(Fall) First-Year Seminar: Gender and Power in the History of Mount Holyoke College - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Writing-intensive; History 101f)

Mary Lyon, founder in 1837 of Mount Holyoke Female Seminary, held out to her students the possibility that they might transform the world--a tall order for young women who were excluded from proper citizenship and political power. To Lyon, duty, discipline, and community would make it possible. What transformations ensued? And what can we learn from them about the complexities of gender and power? This course will introduce students to the craft of historical research through the richness of the College Archives. Special attention will be paid to the College's missionary past, its role in labor research and activism, and the place of racism and antiracism in its history.

(Spring) Methods and Practices in Feminist Scholarship

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

How do scholars produce knowledge? What can we learn from differences and similarities in the research process of a novelist, a biologist, an historian, a sociologist, and a film critic? Who decides what counts as knowledge? We will examine a range of methods from the humanities, social sciences, and natural sciences, including visual analysis, archival exploration, interviewing, and ethnography, as we consider the specific advantages (and potential limitations) of diverse disciplinary approaches for feminist inquiry. We will take up numerous practical questions as well as larger methodological and ethical debates. This course provides a foundation for advanced work in the major.

(Fall) Women and Gender in the Study of Culture: Sexuality and Women's Writing

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 286f-01)

An examination of how U.S. women writers in the twentieth and twenty-first centuries represent sexuality in prose. Topics to include: lesbian, queer, and homoerotic possibilities; literary strategies for encoding sexuality; thematic interdependencies between sexuality and race; historical contexts such as the "inversion" model of homosexuality and the Stonewall rebellion; and theoretical issues such as the "heterosexual matrix" and the "epistemology of the closet." Authors studied may include Allison, Bechdel, Brown, Cather, Gomez, Larsen, McCullers, Moraga, Nestle, Pratt, Stein, and Woolson; theorists may include Butler, Lorde, Rich, and Sedgwick.

(Fall) Women and Gender in the Study of Culture: What Is Memory?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 250f-01, Theatre 204f-01)

Memory has a wide range of meanings and applications in many different contexts. What, for example, is the difference between artificial intelligence and human memory? How are national identities constructed around the commemoration of great events? What is the importance of memory in relation to concepts like justice and progress? How do rituals and performances work to determine gender and other identities? In this course, we examine the social, political, cultural, neurological, and technological functions of memory through readings and exercises that require students to think across disciplines. Special attention will be given to interpretations and adaptations of Sophocles' *Antigone*.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German 223)

As an extreme, but common experience, war creates, shapes, and contests normative constructions of masculinity, femininity, and gender relations in general. This seminar explores the concept of war, its causes, and its representation in memoirs, fiction, art, and photography within German-speaking realms with an emphasis on World War II and its aftermath. What impact does war have on gender relations within a matrix of other categories of identity, such as race, class, and sexuality? Materials include texts by Bachmann, Brecht, Celan, and other German writers and films such as *Triumph of the Will* and *Das Boot*.

(Spring) Women and Gender in the Study of History: African Women: Food and Power

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 296s-02)

This course uses archival records, fiction, life histories, and outstanding recent scholarship to investigate African women's actions in a century that encompassed women's loss of agency and authority but the endurance of their responsibility for the production of food. We investigate the erosion of women's economic power and the loss of women's work of governing at conquest, in the early colonial period, and as a consequence of Africa's integration into the world economy as its least powerful player. We examine women's efforts to sustain productive activities in the face of opposition and the gendered tensions these efforts provoke. Optional fourth hour discussions.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 296s-03)

This course explores Native American women's experiences across tribal nations from a historical perspective. We will look at Native American women's contributions to tribal communities and American history more broadly and re-examine representations of Native American women in myth, literature and popular culture. We will also look at traditional concepts of women's person-hood and roles in Native American societies, as well as the ways in which they changed over time. The colloquium will emphasize the individual stories of women's persistence and the challenges and successes of living under the conditions of American colonialism.

(Spring) Women and Gender in Philosophy and Religion: Women and Buddhism

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Religion 241)

This course explores women and Buddhism during different historical periods and in different cultures. Through a variety of sources, this course will illuminate Buddhist concepts of gender and sexuality, views of women's spiritual capacities, the diversity of women's images, roles, experiences, concerns, and contributions in Buddhist societies, and scholarly approaches to women in Buddhism. Special attention will be given to how gender is constructed in each cultural and religious context encountered, with particular emphasis on Buddhist women in Southeast Asia. We will look into the reasons why texts on religion have not always included the voices of women, and we will investigate ways to uncover them through research techniques and alternative hermeneutical strategies.

(Fall) Feminist Theory: Feminist and Queer Theory through Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 290f-01)

We will be reading a number of key feminist texts that theorize the construction of sexual difference, and challenge the oppression of women. We will then address queer theory, an offshoot and expansion of feminist theory, and study how it is both embedded in, and redefines, the feminist paradigms.

This redefinition occurs roughly at the same time (1980s/90s) when race emerges as one of feminism's prominent blind spots. We will study these shifts through the analysis of a few moving pictures, or, to put it differently: all you always wanted to know about feminism, but didn't think to ask filmmakers such as Almodóvar, Hitchcock, Jarman, Pasolini, Varda, and others.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Politics 233s)

This course explores the overlapping dualities of the feminine and the masculine, the private and the public, the home and the world. We examine different forms of power over the body; the ways gender and sexual identities reinforce or challenge the established order; and the cultural determinants of "women's emancipation." We emphasize the politics of feminism, dealing with themes that include culture, democracy, and the particularly political role of theory and on theoretical attempts to grasp the complex ties and tensions between sex, gender, and power.

(Fall) Feminist Theory: Invitation to Feminist Theory

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is designed to introduce students to the most important political questions in the field of feminist theory. We will begin the course by attending to the distinction between sex and gender and its relevance to feminism yesterday and today, exploring ways that the intersex movement, queer theory, and other gender politics complicate feminist concerns. In addition, we will explore the development of different schools of feminist thought, including arguments that feminism means equal rights for women, as well as claims that rights-based accounts of feminist freedom are limiting.

(Physics 211s-01)

This course examines explanations for the under-representation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability, the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from professional organizations such as the American Physical Society, and reports from congressional committees.

(Spring) Feminism and Capitalism

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Writing-intensive; Politics 271s)

This course will explore the relationship between feminism and capitalism in a contemporary context, particularly the way they reinforce and contradict one another. Examining this question through Marxist, liberal, post-structuralist, and post-colonial feminist theory, as well as the recent history of feminist and anti-capitalist movements, we will consider the economic and political underpinnings of feminist thinking and practice. Do certain feminisms carry implicit anti-capitalist commitments? To what extent are particular feminisms, especially liberal feminism, reliant upon capitalist structures and processes? What stakes might feminists have in preserving or uprooting capitalism?

(Spring) Advanced Seminar: Beyond Logocentrism

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 350s-01)

Logocentric thinking is characterized by the desire for a center or original guarantee of all meaning, and has dominated the Western world since Greek antiquity. It attempts to repress difference in favor of identity and presence. Feminists have extended the concept to talk about *phallogocentrism* as the logical underpinning of patriarchy, and seek to go beyond it. Thinking beyond logocentrism is also crucial for the new discipline of critical animal studies. In this course, we will study attempts at breaking with the (phal)logocentric model of subjectivity, many of which have emerged in the "mestizo/a" continent.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 323s-01)

This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Anthropology 316f-01)

This course explores the gendered domains of food and agriculture as they unfold within household and community economies in the global south and in G-8 countries. We will examine the place of women in systems of food production, processing, marketing, and consumption. We will address locally regulated markets, cuisines, and peasant farming systems as they interface with international neo-liberal systems of market and trade. We will also pay close attention to emergent women's agricultural cooperatives and unions as they shape new transnational coalitions that offer sustainable (and flourishing) solutions to problems associated with post-industrial agriculture.

(Spring) Advanced Seminar: Feminist Poetics: The Poetess, Prophet, and Revolutionary

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive; English 377s-01)

This seminar will explore innovations in eighteenth- and nineteenth-century women's verse. By investigating experiments with narrative, genre, stanza form, meter, and figurative language, we will contemplate what political, social, and ideological problems women writers attempted to present and perhaps solve through linguistic creativity. Larger questions include how to define "feminist poetics" and what potential such a project might afford poets and thinkers today. To this end, we will read selections of poetry in conversation with contemporary feminist theory as well as representations of women's incantation, prophecy, and singing by male poets and novelists of the day.

(Fall) Advanced Seminar: Sexual Selection and Sexual Conflict in Animals: Theory, Research, and Feminist Critique

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive; Biology 321B)

Sexual selection theory explains how selection on traits that allow individuals to attract potential mates or defeat potential rivals can lead to the evolution of sexual dimorphism. Sexual conflict theory investigates how the conflicting interests of males and females in mating interactions can result in the co-evolution of traits for manipulation and resistance. Feminist critics point out how these theories reflect and in turn propagate stereotypes about human behavior. This course explores classic and current biological literature on sexual selection and sexual conflict alongside feminist critiques of the language use, the assumptions, and the interpretation of research in these fields.

(Spring) Advanced Seminar: "Every Secret Thing": Contemporary Women's Autobiographical Narrative in French

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

This course will examine contemporary autobiographical narratives written by women, with a particular focus on authors whose works include multiple autobiographical texts of various genres: fictional, nonfictional, and semifictional. We will analyze the ways in which these authors present their life stories, especially its traumatic or secret episodes, and the ways in which their works discuss the process of that presentation and of memory itself. Themes that are common to these autobiographical texts include: relationships with family, education, sexuality, class, and love. In addition to literary texts, we will analyze in detail several autobiographical films made by women.

(Spring) Advanced Seminar: Love, Desire, and Gender in Indian Literature

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Taught in English; Asian Studies 350s-01)

Seminar on love, desire, and gender, major themes in Indian literature. We will read classic poems, plays, and narratives in translation from Sanskrit, Tamil, Hindi, and other languages, in relation to aesthetic theory, visual arts (miniature paintings), and performance genres (Indian dance, and the modern Bollywood cinema). Study of the conventions of courtly love, including aesthetic mood (rasa) and natural landscapes, and their transformation in Hindu bhakti and Sufi Muslim mystical texts, the Radha-Krishna myth, and film. Focus on representations of women and men, and on issues of power, voice, and agency.

Prerequisites: so, jr, sr, and 100 or 200 level course in literature in any language (inc. English); online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

Instructors: I. Peterson

(Fall) Advanced Seminar: Women Writers: Early Feminisms

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 330f-01)

This course examines a variety of literary expressions of Early Modern Spanish women (Teresa de Avila, Catalina de Erauso, and María de Zayas among others). Attention will be paid to the formal means by which women writers emulated, appropriated, or subverted male-authored models. A significant part of the class will deal with the ways in which contemporary feminist theories can be used to complement, interpret, and flesh out ideas expressed by Early Modern women. Students will collaborate with the organization of an international conference on women to be held at MHC in September. Students will work on projects based on conference presentations and interview the participants.

Prerequisites: Two 200-level courses above SPAN 212 or permission of instructor; online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

(Spring) Advanced Seminar: Women in Dark Times

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Writing-intensive; Politics 328s)

This seminar focuses on the contributions of four women thinkers from two different generations: Emma Goldman, Rosa Luxemburg, Hannah Arendt, and Simone Weil. We will examine their important commonalities, including Jewish backgrounds, immigrant experiences, powerful political commitments, and leftists sympathies. We will also consider their theoretical and political engagements in concert and analyze the role of gender in

their writing. How might their experience as female political activists shape their lives and work, especially before the emergence of contemporary feminist struggles?

Prerequisites: Gender Studies 101 and 221, online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

GNDST-333-09 - Gender Studies - 2010-2011

(Fall) Advanced Seminar: Feminist Theologies

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 323f)

Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Judith Plaskow, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

Prerequisites: 8 credits in religion or permission of instructor; online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

(Spring) Advanced Seminar: The Art of Fact: Writing the Lives of Women

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

This course will examine narrative non-fiction biographies written by women biographers in order to determine the specific ways in which women tell the stories of other women's lives. We will investigate stylistic and theoretical approaches to writing biographies in which gender is a central focus. We will ask if "feminist biography" constitutes a literary genre. We will experience the challenges (and thrills) of conducting archival and primary research. The course will culminate in students writing chapter-length biographies.

Prerequisites: jr or sr; 8 credits in gender studies, application required, see: <http://www.mtholyoke.edu/acad/gender/300level.html>

(Spring) Advanced Seminar: Women Experimental Filmmakers

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 340s(01))

This seminar examines experimental cinema made by women from the early 1950s, during the earliest years of the movement known as the American Avant-Garde, through the 1990s. While the class will read feminist film theory and see the work of such well-known filmmakers as Yvonne Rainer, Sally Potter, and Chantal Akerman, we will also examine the less familiar but highly influential films of women working in the home movie or diary mode, with particular emphasis on the work of Marie Menken.

Prerequisites: jr or sr; 8 credits in gender studies, application required, see: <http://www.mtholyoke.edu/acad/gender/300level.html>

(Spring) Advanced Seminar: Female Portraits

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Art History 310)

The seminar investigates likenesses of women from ancient Greece and Rome. Facial features, body language, hair and clothing will be studied with reference to contemporary social customs, theories of character and beauty, medical treatises, beliefs in deity and in the afterlife. Special attention will go to original objects in the Mount Holyoke Art Museum, including marble portraits and coins depicting classical queens and empresses.

(Fall) Field Placement

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Community-based learning course; Speaking-intensive)

This course presents an opportunity for students to apply gender theory to practice and synthesize their work in gender studies. Connections between the academy and the community, scholarship and social action will be emphasized. Students will arrange for a placement at a nonprofit organization,

business, or institution that incorporates a gender focus. A weekly seminar with other students provides a structured reflection forum to analyze experience and methods.

Prerequisites: Gender Studies 101, 250, either 201 or 221

(Fall) Senior Seminar

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This year-long capstone course brings seniors together to think through relationships among empirical research, theory, activism, and practice in gender studies. Majors with diverse interests, perspectives, and expertise (and other seniors with substantial background in the field) will have the opportunity to reflect on the significance of their gender studies education in relation to their current work (including work in 333s, 390, 395), their academic studies as a whole, and their plans for the future. Course readings and discussion will be shaped by students in collaboration with the instructor. This course continues in the spring semester as Gender Studies 392.

Prerequisites: Seniors only, GNDST 101, GNDST 221, GNDST 250, GNDST 333, 20 credits in gender studies and/or related courses, written application for permission required.

GEOG-100-01 - Geography - 2010-2011

(Fall) Seminar on Alternative Energy Technologies

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar

Alternative energy technologies run the gamut from sophisticated silicon-based photovoltaics, to the fermentation of sugars for ethanol, to the combustion of biomass and more. The large array of alternative energy opportunities combined with a litany of hyperbolic prognostications of each new breakthrough has created a great deal of confusion on the state of alternative energy. This class uses an interdisciplinary approach to survey the major alternative energy technologies and explores the science, economics, and politics pertinent to each paradigm.

(Spring) World Regional Geography

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.

(Fall) Global Societies

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This introductory course in human geography examines social, economic, cultural and political spaces in a global context. In order to understand the making of our world, we examine processes like globalization, liberalism and neo-liberalism, conservativeism and neo-conservativeism, colonialism, neo-colonialism, politics, cultures, migrations, and wars.

(Fall) Introduction to the Physical Environment

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

A systematic introduction to the processes operating on the surface of the earth, their spatial variation, and their contribution to the spatial patterning of life on earth. The course stresses interactions among climate, landforms, soils, and vegetation and examines human impacts on environmental systems.

(Spring) Cities of the Twenty-first Century - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This is an introductory geography course on World Cities and Urban Systems. We focus on processes that produce spatial differences and inter-relations within and between cities across the world. Cities of the Twenty-first Century, incorporating theoretical, critical and empirical approaches, covers a range of topics, including historical development of cities; colonial and post-colonial structures in Third World cities; urban governance; social patterns within cities; urban economies; urban planning; urban environment, and the linkages among all these.

(Spring) Human Dimensions of Environmental Change - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Environmental Studies 204)

Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Economic activities such as consumption, trade, production, investments, and economic institutions such as markets, corporations, banks alter everyday life. With globalization these processes acquire greater intensity, producing cultural, environmental, and political effects. This course examines these changes by understanding how economic processes work, change spaces, and differentially impact developed and developing economies.

(Spring) North America in Context: A Region in Transition

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course explores the changing physical and human landscapes of contemporary North America by examining the region as an important nexus of global and local phenomenon and processes. We use three conceptual lenses to explore how global and local processes intersect in the region. These lenses are 1) physical geography (environment, natural resources, climate change); 2) human geography (culture, race, class, gender); and 3) political & economic geography (globalization, governance, financialization). This course seeks to familiarize us with the changing physical & human landscapes of the region via its multi-scaled interconnections with our planet and its inhabitants.

(Fall) Atmosphere and Weather - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

In this course we will learn weather forecasting skills. This will involve examining weather observations, satellite and radar images, surface and upper-air weather charts, and predictions made by computer models. We will have an opportunity to learn atmospheric dynamics and gain an understanding of the Earth's radiation budget. Topics will include severe storms, hurricanes, and winter weather.

(Spring) Regional Planning - Special Topics

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course examines the shift from planning as an urban issue to the recognition that planning decisions often have broader regional impacts. The first part of the semester will survey urban planning efforts from the early 1900s through the 1960s. The second half of the semester will focus on the "new" comprehensive planning efforts, using growth management of urbanization to protect rural areas, agricultural lands and sensitive environments. Emphasis will be placed on current "Smart Growth" approaches to development.

(Fall) Seminars: Political Economy of Climate Change

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

The South/North divide at the December 2009 climate change negotiations in Copenhagen were complex, and centered around issues of national sovereignty and the right to development. There is now a firm consensus that climate change could not only undermine the most basic challenges of international relations and economic development, but that it threatens to induce even further suffering among the world's poorest people (rise of climate refugees etc) and will likely exacerbate existing international problems and disputes while giving rise to entirely new dilemmas. This course explores the history of international politics and economic development, and examines the systems of power supporting the structures and institutions that shape international policy on climate change.

(Spring) Seminars: Diverse Economic Geography

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

This course begins by looking at global economic and environmental crises. We consider alternative economic activity that might help us address these crises. We broaden our conception of economy to include earth assets, household production, and collective enterprises, as well as new models of economic development. The course adopts a hopeful and experimental attitude toward economic activity, focusing upon a diverse range of

experiences and possibilities. Students track alternative economic ideas and projects in the United States and across the world. We explore economic communities that are based on recognizing our interdependence with the earth and each other.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

Offers an interdisciplinary perspective on social, economic, and political features of contemporary development in Africa, Asia, and Latin America, regions referred to as the Third World or the South, and provides an introduction to theoretical origins and definitions of economic growth, development, and underdevelopment. It then addresses more specific aspects of development such as trends in population growth, migration, and urbanization; agrarian change; livelihood strategies and aspects of social welfare such as health, education, and shelter; poverty and the environment; and external economic relationships. The latter part of the course draws extensively on selected case studies.

GEOL-100-01 - Geology - 2010-2011

(Spring) Physical Geology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

From earthquakes to landscapes, deserts to glaciers, landslides to limestone, this course introduces the surficial and internal processes of the earth. Learn to interpret the geology of your surroundings when traveling to new places and understand how geologic setting influences how people live. Lectures focus on exploring and explaining geological features and processes using concept sketches. Labs focus on mineral and rock identification, map reading, and local field trips.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The only planet known to sustain life, Earth provides all the resources that sustain us, but at the same time it can be an unpredictable and sometimes dangerous home. In the long view of geologic time, Earth's environments constantly change. Floods, earthquakes, volcanic eruptions, and other natural processes challenge our ingenuity, while we also contend with self-induced problems such as pollution, desertification, and even global climate change. The better we understand our planet, the better able we are to survive on it. In lab, we cover methods for recognizing and interpreting environmental hazards and developing strategies to address environmental problems.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Life forms have inhabited the surface of our planet for most of its history. Earth, as a result, has a unique geology that is unlike that of any other planet. In this course we will examine the interrelations between life processes and Earth's crust and atmosphere and how they work together to create the geology of the planet. Using both the rock and fossil record, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips will emphasize identification and analysis of sediments, rocks, and fossils.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

Because more than seventy percent of our planet is covered by oceans, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological processes in the oceans at a variety of scales in time and space. We will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to affect weather and climate, stabilize global chemical cycles, interact with the terrestrial environment, and give us access to resources.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking-intensive)

The climate of planet Earth is changing and many believe that humans are the cause. But the Earth's climate has changed in the past (without human influence), so how can we be sure that present and projected future warming is not simply part of a natural cycle? To understand future climate change we will look at the record of past climate change and evaluate the impacts of a warmer world.

First-year seminar (Writing-intensive)

The origin of animals was one of the most important events in the history of earth. In this course we will review the history of the planet, learn basic geology, and then examine the problem of the origin of animals by studying Mount Holyoke's unequalled collection of Precambrian and Cambrian fossils. The origin of animals has been called the Cambrian Explosion. We will examine what this means for our understanding of evolutionary theory.

(Fall) First-Year Seminar: Diamonds

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking-intensive)

Are diamonds a girl's best friend? This course explores the geology of diamond deposits, the cultural and economic complexity of diamonds and diamond mining, the physical properties of diamond, and industrial uses of artificially produced diamonds. Students will be expected to lead and participate in class discussions, complete assignments in groups, and make oral arguments about difficult and complicated topics.

GEOL-201-01 - Geology - 2010-2011

(Fall) Rocks and Minerals

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

In this course you will learn to recognize the common rock-forming minerals and principal rock types, and to understand their origins, properties, associations, and geological significance. Observational skills and hand sample identification will be emphasized in lab and on field trips.

(Fall) Surface Processes

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth's surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. With this understanding we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth's surface.

(Fall) Plate Tectonics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

(Speaking- and writing-intensive)

Plate tectonic theory explains the origins of volcanoes and earthquakes, continental drift, and the locations of mountain belts and oceans. This course focuses on the geometry of plate tectonics. Topics include mid-ocean ridge systems, transform faults, subduction zones, relative plate motion, earthquake analysis, triple point junctions, and stereographic projection. Work includes individual research projects on active plate boundaries.

Notes: Comfort with geometry and trigonometry suggested.

(Spring) Paleontology-Stratigraphy

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course provides an intensive study of fossils, fossil preservation, depositional environments, sediments, sedimentary rocks, and the processes of sedimentation. We will employ the principles of stratigraphic analysis and correlation to interpret ancient environments and paleoclimate, reconstruct paleogeography, and probe the characteristics of sedimentary basins. Laboratory exercises and field trips will introduce a variety of analytical techniques used to study sedimentary rocks.

(Spring) Groundwater

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The demand for and the contamination of groundwater resources are major environmental concerns. To better understand the dynamics of the groundwater system, we will cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, a term paper, and an oral presentation. Many of the homework problems involve computer applications.

(Fall) Structural Geology and Orogenesis - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course covers the basic techniques of field geology and structural analysis. Lectures concentrate on field techniques, stress, strain, faulting, folding, rock strength, deformation mechanisms, and multidisciplinary approaches to mountain building (orogenesis). Most labs are field trips that involve data collection. Weekly writing assignments focus on presenting original research and distinguishing between observations and interpretations. During the final weeks of the semester, oral presentations emphasize fluency in the published literature of structural geology.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course explores the evolution and interaction of life, rocks, oceans, and air during the past 4 billion years of earth history. Some topics covered are: ice ages and greenhouse atmospheres, continental drift, extinctions and radiations of flora and fauna, the early evolution of earth, absolute and relative dating of rocks, and the geologic time scale. Labs teach geologic map interpretation and simple computer modeling of earth systems. Oral presentations and writing assignments focus on proposal writing, the design and testing of earth science hypotheses, and critical analysis of recently published research on earth history.

(Fall) Seminars: Bedrock Geology Maps - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year.

A bedrock geologic map shows the distribution of different kinds of rocks at the surface of the earth. "A geologic map is a subtle combination of observed facts and interpretations," says Lucien Platt. "Map making is a fine art. To appreciate fully and to understand a geologic map takes thoughtful and careful analysis." Through such analysis, this course focuses on: (1) using maps to infer regional geological histories, (2) drawing cross sections, and (3) visualization in three dimensions. This course meets for the first six weeks of the semester, and it is recommended for students who plan to pursue graduate degrees in the geosciences.

Prerequisites: At least two 200- or 300-level geology courses

Instructors: M. Markley

(Spring) Death Valley Field Course - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.

This seminar will cover selected topics on the geology of Death Valley region, California. We will meet for two hours per week up until spring break, then embark on a ten-day fieldtrip to Death Valley National Park, March 12-21. A participation fee is required. Students will be responsible for researching particular topics and presenting a final report.

Prerequisites: two geology courses and permission of instructor

Notes: 1 meeting (2 hours) and ten-day fieldtrip (Thursday, March 12 to Saturday, March 21); enrollment limited.

(Fall) First-Year Seminar: New Face/s of Germany: Migration and Representations of Im/Migrants in Film and Text

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English; Film Studies 101-02)

Germany today, 20 years post-unification, 21 years past the fall of the Berlin Wall: every 4th German--30 percent school-age children--of immigrant background; 5 percent Muslim residents; a mosque aside Cologne Cathedral; public schools teaching in Turkish and German; more Russian Jews emigrating to Germany than to Israel; ethnic German immigrants who do not know German; East Germans longing for the return of the Wall. Focus on close analysis of films, their sociohistorical, economic, and cultural contexts, e.g., Oscar-winning *Lives of Others*; EU Lux Prize-winning *The Edge of Heaven*; Fassbinder's *Ali-Fear Eats the Soul* vs. Noshir's 2002 remake/ sequel.

Notes: No knowledge of German necessary; Students with previous study of German are encouraged to take German 232 with this course. To receive credit for GRMST 100 (taught in English) toward a minimum major or minor in German Studies, students also have to complete GRMST 232-01 (taught in German).

(Spring) First-Year Seminar: The Politics of Memory in Postwar German and Japanese Cultures - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive; Taught in English)

Cultural exchanges between German and Japanese peoples have taken place for over 400 years. What has triggered and sustained exchanges of cultural, social, artistic, and military traditions? How have these historical exchanges affected the remembrance of World War II, the Holocaust, the Rape of Nanjing, and Hiroshima/Nagasaki in postwar narratives of both national cultures? We focus on the process of remembering war and atrocity in memoirs, fiction, and films in order to explore the politics of memory within transnational perspectives of gender, race, and class.

(Spring) Creation and Production of a German Play - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking-intensive)

Students write and stage an original one-act play in German. Students develop proficiency in the language through reading several short stories by authors such as Friedrich Dürrenmatt, Bertolt Brecht, and Doris Dörrie, as well as theoretical writings on the theater; students will then rewrite one of the short stories as a play. Students write a substantial essay describing how they applied the specific theories of the theater to their original adaptation. The play will be performed at the annual German Theatre Festival and Competition hosted each spring by Mount Holyoke College.

Prerequisites: Open to students who have completed an intermediate-level German course, or per permission of department chair.

(Fall) Topics in German Studies: Lustmord: Crimes of Passion in German Culture since the Late Eighteenth Century

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Film Studies)

Preamble (for topics courses): This course examines the cultural, political, and social, developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic, and other units.

"Some day people will say that I gave birth to the 20th century," Jack the Ripper claimed in 1888, intimating a close link between the rise of modernity and "sexual crime": "Lustmord." Depictions of "crimes of passion" reached zeniths in Weimar cinema and art, and again in recent film and literature, e.g., *Pandora's Box*; *M*, the chilling depiction of a serial murderer; and, lately, *The Promise* and *The Perfume*. Our discussions focus on cultural constructions of sexuality and gender, on victims and perpetrators. How have depictions of "Lustmord" exposed power structures and violence among genders and problematized relationships with the Other, the Body, the Strange?

Prerequisites: Previous study of German

(Spring) Topics in German Studies: The Remembrance of the Holocaust in Film

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): This course examines the cultural, political, and social, developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic, and other units.

This seminar explores the remembrance of the Holocaust as represented primarily, but not solely, in German and European films from the immediate postwar era to the present, including documentary and feature film, as well as in other forms of visual media, such as television, photographs, and art. Themes include the working through of the past, expressions of guilt, remorse and sorrow, and the relationship between art and politics as exemplified in attempts to understand the causes, motives, and consequences of the Holocaust. Films include *Night and Fog*, *Shoah*, *Schindler's List*, *Gebürtig*, *The Night Porter*, *Life is Beautiful*, *The Nasty Girl*, *Wannsee Conference* and others.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; Film Studies 220-02)

Preamble (for topics courses): These courses are taught in English and satisfy a Humanities I-a distribution requirement but not the language requirement. For credit toward the minimum major/minor in German Studies students must enroll in German 232 (2 credits) as well (and read, write about, and discuss selected materials from 231 in German) An introduction to critical reading, writing, and arguing skills, emphasizing the practice of oral and written strategies for discussing and analyzing printed and film texts and the reader's responses to them.

Love and death, romance and assault; when the bourgeois novel began equating marriage contracts with romantic love, a "darker" narrative evolved: Romantic *Schauderliteratur*, horror fiction. We discuss social and psychological rationales as well as aesthetic representations of such phenomena as the "Gothic" and "Grotesque," "the fantastic," and "science fiction," as well as cross-cultural influences. Texts/films: Shelley's *Frankenstein*; Stoker's *Dracula*, Murnau's/Herzog's *Nosferatu*, Merhige's "shadow"; Kafka's/*Nemec's Metamorphosis*; Süskind's/*Tykwer's Perfume*; Dürrenmatt's/*Mambety's Visit/Hyenas*.

(Fall) German Tutorial: New Face/s of Germany: "Multikulti"-Chaos?

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

Preamble (for topics courses): Focus on developing discussion and reading skills in German, and revising and editing papers written in German for German studies courses taught in English.

Films, readings, and discussion in German using materials related to those in German Studies 100. This course focuses specifically on the public debate of diverse visions and representations of what constitutes "German culture." For many residents of Germany, with or without migrant background, "multikulturell" has become a "Reizwort" laden with negative connotations and almost unrelated to its cognate "multicultural." Still, a consensus proposes "integration" as the key to a successful future of European societies. But how does this concept relate to other explosive terms of the dialogue: e.g., "Leitkultur"; "parallel societies"/"ethnic neighborhoods"; "cultural traditions"/"human rights"?

Prerequisites: Previous study of German

(Spring) Advanced Studies in German Language and Culture

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

Familiarizes students with oral and written discourses in all modalities, especially reading, writing, and speaking. Students focus on in-depth analyses of writing and speaking patterns in current newspaper and magazine articles. Thematic foci include the role of Germany's past in contemporary German society, Germany's responsibilities and political agenda within the European Union, and Germany's political and economic ties to Asia. Material based on most recent articles and news reports. Frequent text-oriented exercises emphasize students' individual progress in light of different language and learner profiles and therefore different student needs.

Prerequisites: Open to students who have completed at least 8 credits beyond German Studies 201 or permission of department

Instructors: M. Lauer

Expected enrollment: 30

(Fall) Topics in German Studies: Images of Asia in German Cultures

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive)

This seminar explores the portrayal of Asian cultures in German-speaking literature, film, and media from the late nineteenth century to the present. Drawing from historical ties between Germany and, for example, Japan, the seminar examines the evidence of Orientalism, transnational exchange, and cultural affinities that reflect ongoing relationships between cultural production and experience in German and Asian cultures. Includes work by Doris Dörrie, Wim Wenders, Werner Herzog, Mori Ogai, Yoko Tawada, Franz Kafka, Bertolt Brecht and Hermann Hesse.

(Spring) Topics in German Studies: Global Europe?: Immigration and Representations of Im/migrants in Film and Text - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; European Studies 316)

The course focuses on key issues facing contemporary Europe as it attempts to integrate large im/migrant populations: such legal issues as the development of asylum, immigration, citizenship, and anti-discrimination/hate laws and such cultural issues as the meanings of integration vs. assimilation; multicultural vs. pluralistic societies; the roles of Christianity, Judaism, and Islam in the construction of European societies and cultural identities; perceptions of (Post-)Colonialism and the interceptions of gender, race, class, and nationality; and the (dis)integrative role of language. Focus on the emergence of European Union rules vs. representative national policies in Germany, France, and Great Britain.

Prerequisites: Previous study of German

Notes: majors/minors in the department should simultaneously enroll in both German Studies 232 (taken for 300-level credit) and GRMST-315 or EURST-316 to receive major/minor credit, and read, write about, and discuss selected materials from EURST-316 or GRMST-315 in German.

(Spring) Senior Seminar: States of Terror: From Kaspar Hauser to 9/11 in Film and Text

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Film Studies 370-02)

Preamble (for topics courses): This seminar is designed to explore the nature of our field of inquiry in theory and practice. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms "culture" and "civilization"? Texts from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.

Case studies in terror/ism, starting with the case of the mysterious 1828 founding Kaspar Hauser, rumored even during his lifetime to have been the prince of Baden. Surviving the terror of solitary imprisonment for 12 years, was he the victim of political terrorism at the time? The course investigates parallels and differences between Kaspar's case and the terrorism of the leftist Red Army Faction (RAF) that shook Germany as of the 1970s, as well as their relation to the trauma of 9/11 and present-day international conflict. Multidisciplinary text selection on topos. Films range from New German Cinema (Herzog, von Trotta) to Ulrike Meinhof (2006) and Der Baader-Meinhof Komplex (2008).

History

HIST-101-01 - History - 2010-2011

(Fall) Foundation: Crossing Medieval Boundaries: European, Mediterranean, and Atlantic Encounters, 1200-1700

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive; Medieval Studies 101F-01)

This seminar focuses on medieval boundaries: those separating Christians, Jews, and Muslims in Europe, as well as those between men and women from the thirteenth through sixteenth centuries. The course also examines new boundaries separating--and constructing--Europeans, Americans, and Africans in the transition from "medieval" to "modern." Engaging closely and critically with sources from Atlantic societies of these centuries, students will investigate and debate the making and remaking of "Western culture" in an era of state formation, imperial expansion, agrarian capitalism, and chattel slavery. Readings range from Christian-Jewish disputations to indigenous writings from the Americas.

(Spring) The Medieval World

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

The course will provide an introduction to the history of the Middle East and Europe from the decline of the Roman empire through the aftermath of the Black Death. The period is best known for dividing the Mediterranean into Christian and Islamic worlds, but Europe and the Middle East were united by geography, intellectual traditions, economic trends, and, above all, the shared challenges of maintaining monotheisms in a world reluctant to conform with the standards of sacred texts. In addition to the diffusion of Christianity, Rabbinic Judaism, and Islam, we will explore parallels and divergences in the political, economic, social, and cultural histories of Europe and the Middle East.

(Spring) History of Modern South Asia, 1700 to the Present

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course will explore the history of South Asia between the eighteenth century and the present. Using a combined chronological and thematic approach and against a historical canvas that engages such diverse issues as gender, political economy, conquest, resistance, state formation, economic exploitation, national liberation, and identity politics, the aim of this course is to interrogate the impact of British colonialism and South Asian nationalisms on the state, society, and people of the subcontinent. Using primary and secondary sources, we will address both the most significant historical moments of modern South Asian history and the historiographical debates that surround them.

(Fall) Ancient Greece

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Classics 127f)

This course will trace the emergence and expansion of Greek civilization in the Mediterranean. From the philosophical parlors of Athens to the martial gymnasias of Sparta, the Greek city-states developed diverse political systems, social structures, and cultures. Alexander the Great then exported this legacy across the Near East. Among the themes of the course will be Greek thought, social relations, encounters with Near Eastern peoples, especially Persians and Jews, and the incorporation of the Greek world into the Roman empire. Sources will include works of classical Greek literature, as well as the more mundane insights of inscriptions, papyri, and archaeology.

(Fall) Modern East Asia, 1600-2000

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

A comparative history of China, Japan, and Korea from the early seventeenth century to the present, with strong focus on regional interaction. After an introduction to early modern histories and cultures, we will examine the struggles of these countries to preserve or regain their independence and establish their national identities in a rapidly changing, often violent modern world order. While each of these countries has its own distinctive identity, their overlapping histories (and dilemmas) give the region a coherent shape. We will also look at how individuals respond to and are shaped by larger historical movements.

(Fall) Violence and Social Change in Modern Africa

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course examines processes of change that have shaped modern Africa. It seeks to provide both the information and the conceptual tools necessary for an informed interpretation of African affairs presented (and not presented) by popular media. Using fiction, historical narratives, and a wide range of interdisciplinary sources, the class examines nineteenth-century interactions of Africans and Europeans and the nature of colonial conquest, economic and social change during the colonial period, and the emergence of postcolonial African societies. Through reciprocal visits, we will also share what we are learning about Africa with the 9th grade at the Renaissance School in Springfield.

(Spring) Europe and the Atlantic World, 1300-1700

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This lecture course examines several dimensions of European society and culture during the transition from principalities and fiefs to Early Modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important will be the comparison of Europe (broadly conceived) with other Atlantic societies of these centuries and an examination of consequences for Europeans, Africans, and Americans (north and south) of the engagements among them. Using both voices from the period and recent scholarship about Early Modern and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.

(Fall) Indigenous People: Global and Comparative Perspectives

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course explores the diverse geographic, economic, legal, political, social and historical consequences of European expansion, colonialism, and nation-building for indigenous peoples globally. It examines these themes through theoretical frameworks, while also investigating the historical, political and social dynamics of colonialism. Looking at case studies from around the world, we will concentrate on the ways in which colonialism has affected indigenous peoples comparatively and the varied ways in which they have responded to and contested colonial encroachment on their political and cultural rights as indigenous nations existing within nation-states.

(Fall) History of Global Inequality

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Community-based learning course)

Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Based in Constantinople--ancient Byzantium and present-day Istanbul--the Eastern Roman or Byzantine Empire, survived the collapse of the Western Roman Empire by over a millennium. This long-lived state on the crossroads of Europe and Asia was Roman in law, civil administration, and military tradition, but predominantly Greek in education and language, and Christian in religion. The course explores the changing face of medieval Byzantium as it turned itself into one of the greatest civilizations the world has known. We trace the empire's survival through the dramatic centuries of the Islamic conquests, Iconoclasm, and the Crusades, until its final fall to the Ottoman Turks.

(Spring) Religion and Politics in Modern India

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Speaking- and writing-intensive)

The history of India has been singled out for its complex intermingling of religion and politics. This course will explore the constitution of religious identities in two of India's largest religious communities: Hindu and Muslim. Focusing primarily on the colonial period, we will discuss religious reform movements, communal violence, mass politics, and the partition of the subcontinent into the independent states of India and Pakistan. Throughout we will be interested in the ways that the colonial experience affected the religious thought and practice of Indians. Finally, we will explore the meanings of this history for the postcolonial workings of democracy and secularism in modern India.

(January) Congo: The Failure of Modernity

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

This course uses painting, fiction, film, music, personal narrative and scholarship to explore the modern history of the Democratic Republic of the Congo. We will seek to replace the simplistic perception of the Congolese as merely victims of horrific crimes against humanity by considering the complex, multiple points of view from which people in Congo understand their history. Assigned readings will include Tshibumba Kanda Matulu's portrayal of Congolese history in 100 paintings, Barbara Kingsolver's novel *The Poisonwood Bible*, excerpts from Marie Beatrice Umutesi's narrative of the Congo war, and a small number of scholarly essays.

Prerequisites: All students must have read Barbara Kingsolver's novel *The Poisonwood Bible* before the class begins

(Fall) Native American History: Pre-contact to 1830

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course surveys Native American history beginning with the period preceding American Indian contact with non-Indians and ending with the Removal era. The course emphasizes the diversity and complexity of early indigenous societies. Concentrating on the persistence and autonomy of Native American communities, it highlights the many ways Native peoples shaped American history, as well as how they responded to, and contested European exploration, expansion, and colonialism. We will devote special attention Native American sources that have been largely neglected to illuminate Native interpretations of this history and its continued impact on tribal nations.

(Spring) Native American History: 1830 to the Present

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course explores how Native Americans navigated the dramatic changes of the nineteenth and twentieth centuries to become the vibrant communities that they are today. It traces the challenges and struggles Native peoples have faced from the Removal era in the 1830s to the present. We will look at the connections between the development of federal Indian policy and Native American resistance to U.S. objectives, as well as critical changes in Native American sovereignty over the course of this period. As part of this study, the course emphasizes the persistence and integrity of Native American communities past and present.

(Fall) Topics in the Recent History of Europe: From Habsburg to Hitler: Bohemian Politics, 1848-1945

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores the complex, often comic, and ultimately tragic history of Bohemia, a territory located today in the Czech Republic, but previously a part of the Habsburg Monarchy, then of Czechoslovakia, and then of Hitler's Third Reich. Students will complement historical studies

with autobiographical material and contemporary fiction, beginning with the Revolution of 1848, progressing through the achievements and worrisome trends of Emperor Francis Joseph's 68-year reign, and concluding with the world wars. Emphasis on the interplay among Czechs, Germans, Jews, and other pivotal players: the House of Habsburg and its supporters, and the political elites of neighboring countries.

(Spring) Topics in the Recent History of Europe: World War I and the Making of the Twentieth Century - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

World War I (1914-1918) was arguable *the* transformative event of the twentieth century. It destroyed four empires, enabled the Russian Revolution, altered the political geography of Central Europe, and strengthened independence movements in European possessions overseas. This course explores this history by examining the origins, geographical extent, and consequences of the war from 1880s to 1939 in Europe and in global perspective.

(Spring) The Inheritance of Iran: The Iranian World from Antiquity to the Middle Ages

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course examines the equally profound continuities and discontinuities in the history of Iran from the Achaemenids to the Mongols. We will trace the rise of the ancient Iranian empires and their promotion of Zoroastrianism before turning to the Arab, Turkish, and Mongol conquests and the Islamization of Iranian society. In addition to exploring patterns of religious, cultural and social change in Iranian history, we will discuss the extent to which the inheritance of antiquity in Iran, Central Asia, and beyond constituted a discrete unity--an Iranian world--within the medieval Middle East. Sources will include classics of Persian and Arabic literature, not least the *Book of Kings*.

(Spring) Race and Gender in North American History: African American Women and U.S. History

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Gender Studies 206)

Preamble (for topics courses): This course will examine the intersections between race and gender in the history of North America. Topics to change from year to year. Some topics will focus exclusively on the history of the United States; others will treat North American history more broadly.

How is our understanding of U.S. history transformed when we place African American women at the center of the story? This course will examine the exclusion of African American women from dominant historical narratives and the challenge to those narratives presented by African American women's history through an investigation of selected topics in the field.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Latin American Studies 287fs)

Latin America's inequalities have led to the exclusion of millions of voices from official historical documents. These voices emerge in testimonial literature, a literary genre where scholars create a written account of the "testimonies" of marginalized individuals. The factors that influence the production of testimonial literature will be explored through memory, authorship, and first world/third world relations, using *I, Rigoberta Menchú: An*

Indian Woman in Guatemala, and the debates that arose after she won the Nobel Peace Prize. The class focuses on issues of subjectivity, identity, and discourse analysis as tools for using testimonial literature as a historical source.

(Spring) Women in History: African Women: Food and Power

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Gender Studies 206s-01)

This course uses archival records, fiction, life histories and outstanding recent scholarship to investigate African women's actions in a century that encompassed women's loss of agency and authority but the endurance of their responsibility for the production of food. We investigate the erosion of women's economic power and the loss of women's work of governing at conquest, in the early colonial period, and as a consequence of Africa's integration into the world economy as its least powerful player. We examine women's efforts to sustain productive activities in the face of opposition and the gendered tensions these efforts provoke. Optional 4th hour discussions.

(Spring) Women in History: Native American Women's History

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Gender Studies 206s-04)

This course explores Native American women's experiences across tribal nations from a historical perspective. We will look at Native American women's contributions to tribal communities and American history more broadly and re-examine representations of Native American women in myth, literature and popular culture. We will also look at traditional concepts of women's personhood and roles in Native American societies, as well as the ways in which they changed over time. The colloquium will emphasize the individual stories of women's persistence and the challenges and successes of living under the conditions of American colonialism.

(Fall) Colloquium: Reading the New York Times: Journalism, Power, History

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(American Studies 301)

This course will examine the political and cultural power of the *New York Times* in the American past and present. Students will analyze the *Times* today through careful, daily readings. They will also study its evolution as an institution, as well as its coverage of and involvement in several of the critical historical events of this century. By focusing on the *Times* as the most influential "agenda setter" in American journalism, we will also address the larger issues of objectivity, bias, and influence in the mass media.

(Spring) Colloquium: Gift and Graft: The Long History of Political Corruption

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This colloquium focuses on the extreme failure of accountability commonly called political corruption. How do economic conditions shape political realities, and how do political conditions shape economies? Focusing primarily on Africa but with some readings from other parts of the world, we will consider forms of political authority premised on reciprocity, the bureaucratization of power, and ask how the modernizing projects that were supposed to lead to efficient, representative governance and dynamic economic growth have instead yielded forms of rule that consume their populations. Evaluation will be based on participation, and papers reflecting on each week's readings.

(Fall) Colloquium: Martyrdom as Social Protest: Honor and Resistance from Antiquity to Early Modern Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Not all victims of tyranny and persecution become martyrs, nor are all martyrs victims of tyranny. What social and political conditions foster the choice of martyrdom? What cultural values drive this form of self-immolation? What's worth dying for? In antiquity, the word "martyr" meant an active "witness." Today it can mean a passive "victim." Our approach uses cross-cultural comparisons and psychoanalytic theory to help understand how martyrdom shaped the history and culture of Europe from Antiquity to Early Modern Europe. Subjects: The varieties of suicides, child sacrifice, political and religious martyrs, gladiators, crusaders, assassins, bishops, women martyrs, soldiers, and virgins.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Speaking-intensive; Gender Studies 333F-04)

This colloquium will explore the history of South Asia as seen from women's perspectives. We will read writings by women from the ancient period to the present. We will focus on the diversity of women's experiences in a range of social, cultural, and religious contexts. Themes include sexuality, religiosity, rights to education and employment, violence against women, modernity and citizenship--in short, those issues central to women's movements in modern South Asia. In addition to the textual sources, the course will analyze Indian popular film and the representation of women in this modern visual genre.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

During late antiquity, individuals separated themselves from families, cities, and relations of power to practice asceticism in monasteries. They thus contributed to the transformation of the very societies they had abandoned. The seminar will debate the ways in which monastic practices, institutions, and literatures were involved in the social, cultural, and economic changes that distinguished "medieval" from "ancient" societies. The rich documentation for monasticism--saints' lives, letters, papyri, ostraca, and charters--will enable us to investigate the shifting roles of holy women and men, anchorites, holy fools, and coenobites in early medieval societies, from Egypt to Ireland.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Speaking- and writing-intensive; Medieval Studies 300, English 316)

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

This course explores cultural and social transformations (especially in England) on the eve of "modernity." Class discussions will ordinarily focus on selections from major English writers of the period (Chaucer, Gower, and Malory, for example), and on the relationship between their writings and other kinds of evidence about the world in which they wrote. In consultation with instructors and colleagues, students will also be expected individually to locate, analyze, and interpret a collection of primary sources such as court records, chronicles and correspondence from a culture of their choosing in order to write a final essay on one dimension of the late medieval world.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Writing-intensive)

This course will explore the experiences and stories of Native Americans in the twentieth century that have been largely overlooked in American history. The course has two aims. We will examine popular assumptions and constructions about Native Americans and modernity that have rendered them invisible in the twentieth century and have been utilized to deny their political rights. And, we will explore the ways in which Native American nations, communities, and individuals created alternative pathways of modernity while retaining their distinct indigenous identities. Students will write an original research paper drawing from primary and secondary sources.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course provides an introduction to the basic concepts of, and issues in, international human rights. Prior to World War II, there was very little focus on the question of human rights within the international system and within the discipline of international relations. Since that time we have seen a significant expansion of human rights theory, practice, and institutions. This course outlines the historical ideational and institutional developments of human rights. It exposes students to a range of theoretical propositions and empirical findings to understand the role (and limits) of human rights in the international system today.

(Spring) International Society - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

An intensive reading course in theories of international society: the idea that states and peoples are or should be linked to each other through a web of shared values and institutions. It focuses on the work of Hedley Bull, Immanuel Kant, and John Rawls. How did these three men understand international society? What are or should be the values and institutions that give rise to it and support it? What implications do their visions of international society have for war and peace, state sovereignty, religion, democracy, capitalism, distributive justice, human rights, and international law? What responses and criticisms have their arguments engendered?

(Fall) Dante's Journey

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; English 222)

How does one think about the world, or--better still--the universe, through a work of art? Can poetry really act as compass in the journey of life, and bring into focus questions that truly matter to us? Readers across centuries and cultures have found in Dante's *Divine Comedy* such a work. This masterpiece not only explores the theater of human passions with extraordinary insight and depth, but also meditates on questions of personal and civic responsibility, faith and justice, as much as authorship and poetics. This course frames discussion of the poem within the literary, political and intellectual history of its time, as well as the stunning trajectory of its reception.

(Spring) True Blood: Fantasma, Mostri E Vampiri Della Letteratura Italiana

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive)

What is fantastic literature? Is there an Italian tradition of fantastic writing? Do Italian authors share the fascination with the supernatural (ghosts, mysterious creatures, the world of the dead) of their Northern counterparts? This course will explore the fantastic theme from the earliest narratives in the late nineteenth century--based on the examples of the masters of the genre such as E.A. Poe and E.T.A. Hoffmann--to contemporary times.

Students will analyze the works by, among others, Tarchetti, Boito, Pirandello, Buzzati, Landolfi, and Calvino. Special attention will be paid to modern and contemporary women writers of the fantastic, Ortese, Capriolo, Duranti, and more.

(Spring) Seminar in Romance Languages and Literatures: History of Romance Language

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; Romance Languages 375, Spanish 360, French 321)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works in at least one original language. Papers will be written in the Romance language of the student's choice.

Much of twentieth-century gay writing in Latin America is characterized by an estheticist celebration of anti-humanism, which has often clashed with left-wing progressive politics in these countries. But how does a "gay style" come about? What is its genealogy? How does it identify itself, and what does such an identity mean politically and historically? In this seminar, we will study a number of writers from Argentina, Chile, Cuba, Perú, and Uruguay, and examine their roots in French and Italian anti-humanist authors from Baudelaire, Lautréamont, and Rimbaud to Genet and Pasolini. We will also read a few key texts in queer theory.

Notes: Papers will be written in English or the Romance language of the student's choice. Students wishing to obtain 300-level credit in French, Italian, or Spanish must read texts and write papers in the Romance language for which they wish to receive advanced credit.

(Fall) Introduction to Judaism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 212)

Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

(Spring) Jewish Spiritual Autobiographies - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 215s)

Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Speaking-intensive; Religion 222-01, Gender Studies 210-02)

This course examines the representations and roles of women in Jewish culture, from the literature of the Hebrew Bible to the contemporary period. What were the distinctive ways in which women's religious life expressed itself by way of prayer and ritual practice? Were there women mystics and visionaries? How did women exert their influence as mothers and wives? There will be significant focus on the dramatic developments taking place

among contemporary Jewish women: innovative rituals and experimental liturgies; opportunities to become rabbis; new approaches to God, theology, and social issues; the Jewish lesbian movement; women's writing and documentary filmmaking.

(English 393, Gender Studies 333(11))

Preamble (for topics courses): A study of a particular problem of inquiry, topic, or theme, with a comparative focus.

This course will explore the rich literature written by religious and secular Jewish women, including memoirs, fiction, poetry, and criticism. While most of this writing comes from the modern and contemporary periods--the primary focus of this course--we will also study examples of early modern women's authorship. Our writers are drawn from diverse geographies, and articulate a wide range of creative responses to modernity, secularization, nationalism, political radicalization, violence, exile and migration, and literary experimentation.

LATIN-302-01 - Latin - 2010-2011

(Spring) Cicero and the Enemies of the Roman Republic

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

The career of the Roman orator and statesman Marcus Tullius Cicero spanned the last generation of the Roman Republic, a period of political instability and civil war. As the leading orator of his day, Cicero often used his rhetorical skills to thwart those who he believed were bent on the destruction of the Roman Republic. In this course, we will examine the role of public oratory in the political process in this period with a close reading of Cicero's speeches and letters concerning one of his political enemies (Catiline, Clodius, or Mark Antony).

Prerequisites: Latin 222 or permission of the instructor.

Latin American Studies

LATAM-170-01 - Latin American Studies - 2010-2011

(Fall) Readings in Caribbean Literature

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Features comparison of selected readings in the literature of the Spanish-, French-, and English-speaking Caribbean. Introduces the literary personality of the area, the transformation of the material of Caribbean social life into formally crafted and effective literary statement, and characteristic thematic and broader cultural preoccupations. Asks primary questions, such as "How does a novel--or poem--work?" and addresses similar issues related to forms of critical thinking and literary analysis. Readings and discussion in English.

(Fall) Historical Emergence of the Caribbean - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

The historical development of the Caribbean from the Conquest to the mid-twentieth century. Patterns of conquest, colonization, and settlement by European nations; the rise of plantation-dominated society; the process of insular and interregional differentiation; the emergence of American imperial designs; and the rise of anticolonial, nationalist movements. Comparative reviews of the experience of Haiti, Jamaica, and Puerto Rico highlight broader regional trends and the ways the Caribbean's major language zones have responded to the challenge of their shared history.

(Fall) Introduction to Latin American Cultures

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 180f)

Examines the confrontation, assimilation, and transformation of Amerindian, African, and European cultures in Latin America from the sixteenth century to the present. Focuses on the processes in which distinctive self-images emerged in the region and how these images have been challenged and changed over time. Uses films, literature, and folk traditions to complement scholarly analysis of the emergence of a New World mentality.

(Fall) The Fiction of History: Historical Truth and Imaginative Invention in the Latin American Novel

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

Examination of the scope, reach, and limits of the Latin American variant of the historical novel as a narrative form. The variety of ways in which it fictionally strives to re-create "certain crisis in the personal destinies of a number of human beings [which] coincide and interweave with the determining context of an historical crisis," the historical vision each writer brings to the work, will be given particular attention.

(Fall) Modern Mexico - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 288f)

An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through NAFTA most recently; the succession of reformist and revolutionary upheavals in 1810-1821, 1856-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.

(Spring) Slavery in the Americas

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 289s)

A course, organized topically rather than geographically or nationally, that offers a comparative analysis of African American slavery as a dominant social system in Brazil, the Caribbean, and the U.S. South. Topics include: why slavery?; sugar and slavery; historical demography; culture and the law; kinship and family; long-run economic development; patterns of race relations; master class and racist ideologies; resistance to slavery; and abolition and its aftermath. Readings include historical and anthropological studies, as well as a major documentary collection on slavery in Brazil.

(Spring) Studies in Comparative Caribbean Culture: Contemporary Caribbean Writers - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

A sustained comparative study of the developing canon of three major contemporary writers--Alejo Carpentier (Cuba), V.S. Naipaul (Trinidad), and Maryse Conde (Guadeloupe)-- from the Caribbean, representing the region's Spanish-, English-, and French-speaking cultural zones. Examines the evolving content, contours and scope of each writer's work and unique perception of the New World, as well as its distinctively Antillean "structure of feeling," participation in modern debates about Caribbean culture, and distinctive contributions to the development of the novel in the contemporary Caribbean.

LATAM-386-01 - Latin American Studies - 2010-2011

(Fall) Central America: Reform, Reaction, Revolution

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 386f)

This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.

(Spring) Postmodernism and Latin America - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 388)

For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.

(Spring) Agrarian America: Sugar, Cotton, Coffee, Wheat

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 389s)

Explores societies generated in the Americas by several widely distributed export crops. Multinational and cross-cultural comparisons holding constant the crop itself allows a focus on the possible variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; their political and social dynamics; the problematic features of capitalism in agriculture, or if, how, and when do peasants become farmers and farming agribusiness? Particular focus on family and household relations under so-called "peasant to farmer" agricultural transitions and environmental implications of single-crop and export agriculture.

MATH-100-01 - Mathematics - 2010-2011

(Fall) Precalculus

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course is intended for students who, based on the results of their precalculus assessment and the agreement of the instructor, need to strengthen their quantitative and algebraic precalculus skills in order to be ready to progress to calculus. Features the study of functions, including trigonometric functions, the exponential function, and logarithms, and the phenomena they model.

MATH-110-01 - Mathematics - 2010-2011

(Spring) Explorations in Algebra

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

(Fall) Explorations in Number Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Using examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.

(Fall) Making Meaning for Operations/Reasoning Algebraically about Operations

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Education 256)

This course will draw on two modules of the Developing Mathematical Ideas (DMI) series. DMI is a curriculum designed to help think through the major ideas of K-8 mathematics and examine how children develop those ideas. The first four sessions will parallel the first four sessions of Making

Meaning for Operations. The remaining nine sessions will be based on the Reasoning Algebraically about Operations module. This module focuses on how children's study of operations leads into articulation of generalizations in the number system and justification of such generalizations. Participants will explore and understand how such work in the early grades relates to algebra studied in later grades.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

First-year seminar

What do social networking, scheduling classes, and the secure transmission of private data have in common? All of these activities involve discrete mathematics. We will study graphs composed of nodes joined by edges, which are mathematical structures that describe how objects are connected to one another. We will also study modular arithmetic and its application to public-key cryptography, which is widely used to protect the privacy of electronic communications.

(Fall) Topics in Algebra: P-adic Numbers, P-adic Analysis, and Zeta Functions

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

In this class we will study the p -adic numbers where p stands for a prime. So that means that we will study the 2-adics, the 3-adics, the 5-adics, and etc. These numbers were introduced by Kurt Hensel (1861-1941) and shown to arise from the rational numbers just as the real numbers arise if one changes the way distance is measured between two rational numbers. P -adic numbers are now an essential part of modern number theory and they allow one to take a problem stated for the rational numbers and, in some sense, factor the problem into infinitely many problems, one for each prime. We will study p -adic functions, p -adic calculus, and some of the famous results in number theory that use this theory.

(Spring) Topics in Geometry and Topology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This is an introduction to point-set topology (also referred to as general topology). Point-set topology is one branch of the much broader area, topology. It is concerned with the study of properties of abstract topological spaces and structures related to such spaces. The material covered in this course will provide the common foundation for courses in algebraic topology, geometric topology, and differential topology. The core topics to be studied include: basic set theory, various interesting topologies, continuous functions, connectedness and compactness, separation axioms, countability axioms, nets and filters.

Medieval Studies

MEDST-101-01 - Medieval Studies - 2010-2011

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Crossing Medieval Boundaries: European, Mediterranean, and Atlantic Encounters, 1200-1700

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive; History 101f)

This seminar focuses on medieval boundaries: those separating Christians, Jews, and Muslims in Europe, as well as those between men and women from the thirteenth through sixteenth centuries. The course also examines new boundaries separating--and constructing--Europeans, Americans, and Africans in the transition from "medieval" to "modern." Engaging closely and critically with sources from Atlantic societies of these centuries, students will investigate and debate the making and remaking of "Western culture" in an era of state formation, imperial expansion, agrarian capitalism, and chattel slavery. Readings range from Christian-Jewish disputations to indigenous writings from the Americas.

Instructors: H. Garrett-Goodyear

Expected enrollment: 18

(Spring) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Visions of Hell and Paradise

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Art History 110s-01)

The Heavenly Court; Adam and Eve's Garden of Eden; The Apocalypse. Visions of sacred realms and the beginning and end of humankind captured the imagination of people in the Middle Ages and the Renaissance in Europe. The focus of this course will be the close examination of a range of artworks that portray sacred and apocalyptic imagery, including manuscript illumination, sculpture, panel painting, and fresco from the ninth to the sixteenth centuries by artists including Giotto, Michelangelo, Bosch, and Dürer. Readings of primary sources (such as St. John's Book of Revelations) and the consideration of social and political conditions will support our interpretations.

(Spring) Seminar in Medieval Studies: Texts and Contexts: Reading the Medieval World, 1350-1530 - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; English 316 and History 351)

This course explores cultural and social transformations (especially in England) on the eve of "modernity." Class discussions will ordinarily focus on selections from major English writers of the period (Chaucer, Gower, and Malory, for example), and on the relationship between their writings and other kinds of evidence about the world in which they wrote. In consultation with instructors and colleagues, students will also be expected individually to locate, analyze, and interpret a collection of primary sources such as court records, chronicles, and correspondence from a culture of their choosing in order to write a final essay on one dimension of the late medieval world.

(Spring) Seminar in Medieval Studies: The Curious Middle Ages - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive; English 336)

Medieval curiosity, both a spiritual danger and a vehicle of knowledge, expresses a conflict that helps us mark change in the period's intellectual traditions. We'll consider curiosity's enabling of developments in historiography, cosmology, cartography, optics, and architecture to help us explore various literary genres. Through allegory, travel and religious narrative, romance, fabliau, and dream vision, we'll inquire into the intellectual functions that literature performs, asking how literary curiosity may have been both an approach toward and opponent of scientific truth. Middle English works will be read in Middle English; however, no prior knowledge of Middle English is necessary.

(Spring) Music and Technology

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

It is now possible to record, manipulate, notate, and compose music with a variety of powerful and flexible tools using the personal computer. This course will focus on hands-on experience with various sorts of music software, including recording and editing, mixing, synthesis and midi interfaces, notation, and various instructional programs. In the process of experimenting with these tools and operating on their favorite musical styles, students will learn a good bit of notation, ear training, and rudimentary principles of arrangement and composition. Basic computer literacy (such as comfort with basic editing commands and the concept of keyboard shortcuts) is required.

(Spring) World Music - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Writing-intensive)

This course is a survey of selected musical traditions from different parts of the world, including Africa, Indonesia, Indian, the Caribbean, and the United States. The course adopts an ethnomusicological approach that explains music as a cultural phenomenon, and explores the social and aesthetic significance of musical traditions within their respective historical and cultural contexts. It examines how musical traditions change over time, and how such changes reflect and relate to social and political changes within a given society. Weekly reading and listening assignments provide the basis for class discussions. Students are expected to undertake a final project in music ethnography.

MUSIC-371-01 - Music - 2010-2011

(Fall) Topics in Music: Music in Manuscript

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

Preamble (for topics courses): This seminar is designed to increase familiarity with and facility in the use of primary materials for musicological/ethnomusicological and/or theoretical research, as well as in the critical evaluation of published scholarship. Engagement with a shared topic at the outset of the semester provides the context from which each student fashions an independent project. Oral presentations are integral to the course, with a major paper as the final requirement.

This seminar will study selected autograph manuscripts (and in some cases sketches) of composers dating from the fifteenth to twentieth centuries. The works studied in class will represent a variety of composers, genres, periods, styles, and contexts: composers such as Josquin, Haydn, Beethoven, Brahms, Debussy, Gershwin, and Ravel, and genres such as song, string quartet, symphony, piano music, tone poem, and choral music. The autograph scores will be examined for what they can tell us about compositional procedure, stylistic and notational conventions, and performance practices. Each student will select an independent project on which to focus increasingly during the course of the semester.

Philosophy

PHIL-101-01 - Philosophy - 2010-2011

(Fall) Introduction to Philosophy

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course will explore topics that philosophers have grappled with for thousands of years, and that still undergird (or sometimes threaten to undermine) our understanding of the world, our knowledge, ourselves, and each other. In historical and modern texts of the Western intellectual tradition, we will discuss questions such as: What exists? What knowledge can we claim? What are people like? What is, or should be, our role in the world? In considering these answers, we will learn to do philosophy ourselves, developing our own careful reflections on these issues.

Instructors: S. Hawthorne

Expected enrollment: 70

PHIL-101-01 - Philosophy - 2010-2011

(Spring) Introduction to Philosophy

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

We will consider influential philosophical texts and theories that attempt to answer questions such as these: Is it possible for creatures like us to have knowledge of an external world that exists outside of our own minds? Are we justified in believing that events in the future will be much like events in the past? Is the human mind an immaterial substance (like a soul), or is it a mere physical object (like the brain)? Do human beings have free will? Is a person's having free will compatible with all of her actions being predetermined by events occurring before her birth? What, if anything, makes an action morally right or morally wrong?

Instructors: S. Mitchell

Expected enrollment: 75

PHIL-102-01 - Philosophy - 2010-2011

(Fall) First-Year Seminar on Topics in Philosophy: Discovering Philosophy through Children's Literature

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Speaking- and writing-intensive)

Remember reading *Morris the Moose* or *The Giving Tree*? You probably didn't think they were about the fallibility of human knowledge and the right way to comport yourself with the natural world, two important philosophical issues. In this seminar, we will explore the world of philosophy by means of children's books like these. In addition, we will investigate how professional philosophers address these issues in order to see how their analyses supplements those developed from the children's books.

PHIL-102-01 - Philosophy - 2010-2011

(Spring) First-Year Seminar on Topics in Philosophy: Personal Identity

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Speaking-intensive)

Who or what am I, and what makes me what I am? How am I different from a very sensitive robot, or a very clever dog? Am I a single changing person throughout my life, or a series of unchanging ones? What will connect my past to my future? This cluster of philosophical worries will occupy the center of this course. In the process of addressing them, we will work to develop methods for resolving problems that appear beyond solution.

PHIL-103-01 - Philosophy - 2010-2011

(Spring) Comparative Introduction to Philosophy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

In this course, questions concerning views of the self, humans in relation to one another, and humans in relation to the non-human world will be explored by bringing together conventional philosophy texts with culturally diverse philosophical writings. Through these questions and the materials which address them, issues of ethnicity, race, class, and gender will impact our discussion of various perspectives on fundamental problems.

Instructors: M. Brown

Expected enrollment: 40

PHIL-201-01 - Philosophy - 2010-2011

(Fall) Philosophical Foundations of Western Thought: The Greek Period

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

An introduction to ancient Greek philosophy, focusing mainly but not exclusively on the works and ideas of three Athenian philosophers who worked and taught in the period between the Persian Wars and the rule of Alexander the Great, more than 2,300 years ago: Socrates, Plato, and Aristotle.

Topics to be discussed include: What is the nature of the world? What is truth, and how can it be known? What kind of life should we live? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will take care to place these figures and their works in their historical and cultural context.

Instructors: K. Thomason

PHIL-202-01 - Philosophy - 2010-2011

(Spring) Philosophical Foundations of Western Thought: The Modern Period

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Investigates the development of Western philosophy in the seventeenth and eighteenth centuries through the writings of Descartes, Locke, Leibniz, Hume, and Kant. Focus on the apparent conflict between modern natural science and traditional religion as sources of knowledge and belief. Topics include the nature and extent of human knowledge, the nature of the mind, the existence of God, and the possibility of human freedom.

Instructors: T. Wartenberg

Expected enrollment: 30

PHIL-205-01 - Philosophy - 2010-2011

(Fall) Ethics

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course serves as an introduction to some of the main philosophical theories of ethics and ideas about human nature through a study of fundamental approaches including utilitarian, deontological, and virtue ethics. Among the issues covered will be the clarification of basic assumptions about morality, such as whether morality has any basis beyond differing teachings of various cultures (relativism), or whether all actions are fundamentally selfish (egoism). Attention will be given to the application of ethical theory and principles to contemporary issues.

PHIL-208-01 - Philosophy - 2010-2011

(Fall) Knowledge and Reality

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course is an introduction to the central topics in epistemology (theory of knowledge) and metaphysics (theory of reality). It will look at questions such as: How is knowledge possible? What is knowledge? Do we know anything? Is time real? What makes you the same person now and in ten years? Could things be otherwise than they are?

Instructors: S. Mitchell

Expected enrollment: 30

PHIL-208-01 - Philosophy - 2010-2011

(Spring) Knowledge and Reality - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

What is knowledge? Does the world exist independently of our minds? What makes me a single, unified person who exists continuously over time? In this course, we will explore these and other central questions in epistemology (theory of knowledge) and metaphysics (theory of reality) concerning predictions about the future, universal generalizations, the categories/concepts we employ in making such predictions and generalizations, and the nature of cause and effect. This course aims to be both historical and contemporary.

Instructors: S. Mitchell

Expected enrollment: 30

PHIL-210-01 - Philosophy - 2010-2011

(Fall) Logical Thought

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course cultivates sound reasoning. Students will learn to see the structure of claims and arguments and to use those structures in developing strong arguments and exposing shoddy ones. We will learn to evaluate arguments on the strength of the reasoning rather than on the force of their associations and buzzwords.

Instructors: L. Bowie

Expected enrollment: 75

PHIL-220-01 - Philosophy - 2010-2011

(Fall) Introduction to the Philosophy of Science

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Scientific theories come and go--what was once believed true is often later thought false. What then is the status of current scientific theories? What makes a theory "good"? How do we know whether accepting a theory is based on scientific reasoning--rather than scientific or nonscientific rationales? In what ways does science in practice depart from scientific ideals? This course will explore answers to these questions proposed by scientists and philosophers of science. We will study some historical views, but will focus on scholars writing in the 1960s through the present.

Instructors: S. Hawthorne

(Spring) Symbolic Logic

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course develops a symbolic system that can be used as the basis for inference in all fields. It will provide syntax and semantics for the language of this system and investigate its adequacy. It provides the basis for all further work in logic or in the philosophical foundations of mathematics. Much of the course has a mathematical flavor, but no knowledge of mathematics is necessary.

PHIL-226-01 - Philosophy - 2010-2011

(Fall) Introduction to the Philosophy of Religion

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 226-01)

This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in Schleiermacher's Speeches. Finally, we focus on the idealistic and pragmatic tradition in American philosophy of religion.

(Fall) Feminism and Knowledge - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Gender Studies 212)

Is knowledge gendered? Is science objective? What does it mean to make such claims, and how does one justify them? In this course, we will investigate how gender roles, gender identity, and ideas about gender influence the construction of knowledge. We will look at three competing views about these influences - in particular, empiricism, standpoint theory, and postmodernism - in the context of empirical research in the social sciences and biology. We will consider what it means to do research as a feminist and what kind of cognitive authority women hold in the creation of knowledge.

Prerequisites: 4 credits in gender studies or philosophy or permission of instructor

(Fall) Ethical Issues in Complex Organizations - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Complex Organizations 232)

There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution, and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory, and current events

PHIL-235-01 - Philosophy - 2010-2011

(Fall) Medical Ethics

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Modern medicine has raised new and difficult moral and philosophical problems. Topics discussed include: What is the distinction between health and illness? How should limited health care resources be distributed? How are medical problems related to larger social problems (e.g., gender inequality)? What are the responsibilities of medical researchers toward their research subjects? What moral reasons do we have to be concerned about the growth of technology in medicine? Are the basic institutions of medicine and medical education just?

(Spring) Environmental Ethics: Nature/Culture/Values

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Community-based learning course)

A fundamental problem we face as humans is how we should relate to the natural world. Why not turn Yosemite into a parking lot? Should we control nature by applying scientific and technological expertise? Or should we strive for noninterference and preservation of the wild? How do we balance the pressing needs of people for food, energy, and other resources with the needs of other species or whole ecosystems? Students will explore these questions and issues in the classroom and in community-based learning or other experiential projects that put ideas into action.

(Spring) Issues in Contemporary Moral Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Do we need to develop virtues to lead a good life? Is morality founded on freedom or happiness? What does it involve for an individual to be just? What is the relationship between morality and power? This course explores questions and texts relevant to contemporary ethical philosophy. We will read a mix of contemporary and historical texts examining some of these questions in detail.

(Fall) Social and Political Philosophy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

An examination of a variety of topics in social and political philosophy, drawing from historical as well as contemporary sources. We will examine questions such as the following: What is the nature and scope of political authority? Do citizens have a duty to obey the laws of their state? What duties do we have to oppressed and marginalized groups? How do race, class, gender, and sexual orientation matter to political freedom and authority? How should we balance political liberties against the public good? Attention will also be given to the application of these questions to particular contemporary social and political issues.

(Gender Studies 210)

Women have to a great extent been denied a place in the canon of western philosophy. But voices of historical women philosophers are being recovered, and increasingly women contribute to current literature and teaching. In the first half of the course, we'll read selections from historical literature--the ancient Greeks through the American pragmatists. In the second half, we'll examine recent feminist literature, tracing themes that have been important over the centuries. We'll also ask questions about the role of women in philosophy, such as: Is their contribution distinctive? Is reason gendered? When is philosophy feminist?

(Fall) Existentialism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Is life absurd? Do human beings really want to be free? Or do we prefer to sacrifice our freedom for comfort and amusement? Is God dead? Is it possible to live without religious belief? These are among the central questions about human life raised by existential thinkers. We will discuss these issues, and many others, through careful reading of philosophic and literary texts by such important existentialists as Søren Kierkegaard, Friedrich Nietzsche, Martin Heidegger, Jean-Paul Sartre, Albert Camus, Simone de Beauvoir, and Franz Fanon.

PHIL-264-01 - Philosophy - 2010-2011

(Spring) Philosophy of Mind - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores long-standing questions about the nature of consciousness; the relationship between mind and body; the relationship between mind and language; and the role that science has (if any) in negotiating these questions. The course will emphasize the philosophical understanding and implications of current work in neuroscience.

Prerequisites: 4 credits in department or permission of instructor

(Fall) Philosophy of Language

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

In the twentieth century, problems in the philosophy of language have become central to nearly all philosophical concerns. This course addresses key questions: What is truth? What is it for a sentence to have a meaning? Does language determine the way we think? Readings are drawn from Frege, Russell, Wittgenstein, Whorf, Quine, Chomsky, Frye, and others.

PHIL-273-01 - Philosophy - 2010-2011

(Fall) Philosophy of the Arts

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

The purpose of this course is to explore philosophical problems concerning the arts and aesthetic experience. Some questions to be explored include: What is the difference between beauty and moral goodness? Can taste be objective? What does it mean for a work of music to be "sad"? Are the intentions of artists relevant to appreciation? What is the purpose of art criticism? How do pictures represent objects? Readings will be drawn from both historical and contemporary philosophical writings.

PHIL-275-01 - Philosophy - 2010-2011

(Fall) Philosophy and Film Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Film Studies)

An exploration of philosophical issues encountered in the study of film. Why do we need a theory of film? What is a film anyway? Do films have "authors"? How do films engage our emotions? Can films be socially critical? What can we learn from films? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. There will be weekly required film screenings

Prerequisites: 4 credits in department or in film studies, or permission of instructor

Notes: 2 meetings (75 minutes), 1 screening (3 hours)

PHIL-280-01 - Philosophy - 2010-2011

(Fall) Philosophy for Children

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Community-based learning course; Speaking-intensive)

When you act bravely, can you be scared? How do you know that you are not dreaming now? If everyone told you you weren't a person, would you believe them? These questions are raised by children's books, such as *Frog and Toad Together* and *The Bear That Wasn't*. In this course, you will learn how to conduct discussions of philosophical questions like these among elementary school children using picture books. The first half of the course will concentrate on developing the necessary skills; the second on teaching philosophy to the children. Along the way, we'll delve into a range of philosophical issues, as we prepare to teach an introductory philosophy course for second graders.

PHIL-321-01 - Philosophy - 2010-2011

(Spring) Seminar in Philosophy of Language - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

According to the "Whorf Hypothesis" language constrains what we can think - our very concepts are shaped by our language. Much contemporary work in cognitive science argues the reverse - that concepts wired into our mind constrain what possible human languages there are, and that consequently all human languages share structure that reflects these constraints. On this view there are languages so alien that humans couldn't possibly learn them. This seminar will explore the relationship between language and thought, reading work by Wittgenstein, Whorf, Orwell, Putnam, Pinker, Fodor, Prinz, and others.

(Fall) Advanced Logic - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Mathematics 327s)

This course presents a careful development of predicate calculus, formal elementary number theory, and elementary recursion theory, culminating in a proof of Gödel's incompleteness results. It includes some discussion of the philosophical significance of these results for the foundations of mathematics.

Prerequisites: Philosophy 225, 4 credits in department or in mathematics and permission of instructor

(Mathematics 327s)

Recently there has been a considerable flowering of non-classical logics, most prominently modal logics concerning necessity and possibility for one to dominate work in metaphysics and epistemology. In addition, conditional logics, intuitionist logics, and relevance logics have become important. This course will look at this broad range of topics. These logics are particularly useful in graduate-level classes in philosophy and are intrinsically interesting in their own right.

PHIL-334-01 - Philosophy - 2010-2011

(Fall) Topics in Ethics: Meta-Ethics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Meta-ethics is the study of the concepts and methods used in ethical discourse and debate. It is not the study, for example, of which actions are right or wrong, but rather of what the terms "right" and "wrong" mean. Possible questions to be discussed in this seminar include: Can moral judgments be true or false? Are moral judgments expressions of feelings? Are they objective or subjective? Are we rationally required to be moral? Are there moral facts? How are moral and aesthetic judgments different? This course presupposes a strong background in philosophy. Prior coursework in ethics and logic is recommended.

PHIL-334-01 - Philosophy - 2010-2011

(Spring) Topics in Ethics: Forgiveness and Revenge

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Forgiveness is generally taken to be a positive moral attitude: it is something we should be willing to grant and something we should seek. Revenge, by contrast, is taken to be a negative attitude and one which we should rid ourselves of as best we can. This course will raise questions about these

assumptions. Is it always good to forgive, and is it always bad to seek revenge? In asking this question, we will examine philosophical accounts of both forgiveness and revenge with an eye to particular cases. Specific cases will include the Truth and Reconciliation Commission (TRC) in post-apartheid South Africa, the massacre of Nanking, and the sex abuse scandal in the Catholic church. Is forgiveness even possible in these instances? And if we can forgive, should we?

PHIL-350-01 - Philosophy - 2010-2011

(Fall) Topics in Philosophy: Cognitive Science

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

David Chalmers has dubbed the problem of consciousness "The Hard Problem." How can a lump of physical matter (for example your brain) have an experience? How can it be like something, feel like something, to be in one physical state rather than another? There has been a tremendous surge of divergent thinking on these questions in the intersections between neuroscience and philosophy - stories about how matter can be conscious, and stories of why our minds are too limited ever to answer such questions. Readings and discussion from Dennett, Churchland, Chalmers, Crick, Gazzaniga, Lloyd, and others.

Prerequisites: One course in philosophy and either a second course in philosophy or a course in neuroscience; or permission of the instructor.

Instructors: L. Bowie

Expected enrollment: 19

PHIL-350-01 - Philosophy - 2010-2011

(Spring) Topics in Philosophy: Philosophy of Medicine

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Modern medical practice uses science and technology in ways barely conceivable a generation ago. But puzzles about medical science and practice remain. What's the right way to apply statistical knowledge to a patient? Or, to put the question another way, when does "clinical judgment" become stereotyping? When is a patient's distress a "real" disease--for example, why is diabetes uncontroversially real, but multiple chemical sensitivity is not? In a complex condition like depression, how do we gauge whether the cause(s) is/are genes, brain chemistry, history, or acute stress? This course explores these and other questions, drawing on literature in philosophy of science and medical ethics.

PHIL-350-02 - Philosophy - 2010-2011

(Spring) Topics in Philosophy: Causation - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Recently a new theory of causation - which might broadly be called the theory of Bayesian networks - has received a lot of attention. This topic concerns the justification of scientific hypotheses, and represents patterns of causation mathematically. So this course is really an introduction to one approach to the logic of inferences in the sciences (both social sciences and natural sciences). We'll look at some of the problems with causation first. Then we'll cover introductory probability theory and graphs, and then look at how the theory addresses the puzzles. Students will need to be somewhat comfortable with mathematics, and interested in philosophy.

(Fall) Systematic Study of One Philosopher: Kant

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Immanuel *Kant's Critique of Pure Reason* is one of the few works in the Western philosophic tradition that fundamentally transformed our understanding of the place of human beings in the world. This seminar involves a careful, critical reading of the text in order to assess the nature and significance of the epistemological and metaphysical views it expounds.

PHIL-351-01 - Philosophy - 2010-2011

(Spring) Systematic Study of One Philosopher: Aristotle - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course will look closely at Aristotle's moral and aesthetic thought through a careful examination of his *Nicomachean Ethics* and his *Poetics*. In these works Aristotle gives us his conception of a well-lived life, as well as his view about the relationship between emotions and reason. In addition to the primary texts, we'll read some contemporary commentary on Aristotle, and we'll look at the influence of Aristotle's ideas on contemporary philosophical debates about art and life. This course presupposes prior study of ancient Greek philosophy. Prior coursework in ethics or aesthetics is also recommended.

(Fall) Philosophy of Art: Arthur Danto - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): This class examines philosophical issues concerning the interpretation, creation, and experience of art. Topics vary from year to year.

This seminar will focus on the work of Arthur Danto, perhaps the preeminent contemporary philosopher of art and art critic for *The Nation*. We will explore his writings from his seminal essay, "The Artworld," to his recent book, *The Abuse of Beauty*, in an attempt to understand his views on art, its development, and its future.

(Spring) The Philosophy of Art: The Shock of the New - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Art Studio 280s-01)

Preamble (for topics courses): This class examines philosophical issues concerning the interpretation, creation, and experience of art. Topics vary from year to year.

Innovative works of art shock the world and are difficult for viewers to interpret in light of previous artistic practice. How, then, can viewers and critics understand new and challenging works of art? This is the topic that we will investigate in this course by looking at art, reading about art, making art, and writing about art.

Prerequisites: 8 credits in department

Notes: students enrolled in this course will be responsible for some of the cost of materials in addition to the standard studio fee of \$60.

(Spring) Philosophy of Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Film Studies 390-02)

Preamble (for topics courses): An examination of different theoretical issues concerning the nature of film and film viewing. Topics vary yearly.

Recently, philosophers have argued that films resemble philosophy in their use of thought experiments. But the role of thought experiments in philosophy is itself contested. The seminar will investigate how thought experiments are used in science and philosophy in order to determine whether films and, more generally, art can legitimately claim that their presentation of thought experiments connects them to philosophy. Some previous acquaintance with philosophy highly recommended.

(Spring) Square Dancing

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

Many countries around the world have National Square Dancing Associations. In the U.S., Congress unanimously passed a Joint Resolution designating Square Dance as the national folk dance in 1982. Currently, 32 states also have chosen Square Dancing as their State Dance. Dance provides a great mind-body workout; researchers have found that exercise increases the level of brain chemicals that encourage nerve cells to grow. Dancing that requires the memorization of dance steps and sequences boosts brainpower by improving memory skills. Participants in the class will learn the basic skills of Square Dancing and will be introduced to local Square Dancing clubs.

(Spring) Bon Odori (Japanese Spiritual Dance)

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

This course focuses on a Japanese Buddhist folk dance performed outdoors and danced in a concentric circle around a raised platform. It is celebrated as a reminder of the gratefulness one should feel toward one's ancestors. From this dance of joy comes Bon Odori, a time in which ancestors and their sacrifices are remembered and appreciated. Through studying the dance, students will understand its intentions: remembering and appreciating who you are and where you come from. Because the dance is closely related to Buddhism, this course will provide an opportunity for the students both to exercise through dancing and to calm their minds.

(January) Pilates

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

Developed by Joseph H. Pilates, this exercise program is recognized worldwide for its ability to strengthen and condition the abdominal and back muscles. It is renowned for increasing flexibility and strength, improving posture and coordination and synchronizing mind and body. A Pilates mat class consists of a gentle warm-up and progresses to a series of focused floor exercises performed on an exercise mat. Special emphasis is given to proper form, use of breath, alignment, coordination and whole body awareness. This course will include additional core specific exercises to enhance athletic performance and general well-being. All levels welcome.

Notes: Class meets M,W,F Jan. 3-21 90 minute class. 9-10:30 am No class 1/17. Class fee \$25 paid directly to the instructor. Minimum of 20; max 35

(Spring) Women in Sport - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Gender Studies 216)

This course is designed to introduce students to the history of women in sport, the status of women in sport since the passage of Title IX in 1972, and current issues impacting women in sport such as race, gender, and sexual orientation. Students will explore the influence of sport on the lives of women and how selected women sport leaders have influenced the growth and development of sport.

(Spring) Introduction to Sport Pedagogy

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is designed to introduce students to sport pedagogy with a focus on coaching youth sports. Topics include coaching philosophy, motor learning, sport physiology, sport biomechanics, sport psychology, and risk management/liability. We will consider the benefits of playing sports, the development of age appropriate instruction and training programs, goal setting, effective feedback, and the importance of coaches as role models for children.

Physics

PHYS-103-01 - Physics - 2010-2011

(Fall) Foundations of Physics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course studies a variety of topics in physics unified by the physical notions of force, energy, and equilibrium. Mathematics is used at the level of geometry, proportion, and dimensional analysis. Topics, drawn from the MCAT syllabus, include geometrical optics, time, oscillation, statics, elasticity, conservation of energy, and fluids.

(Spring) Renewable Energy

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Environmental Studies 104)

We will examine the feasibility of converting the entire energy infrastructure of the US from one that is dependent on fossil fuels to one that utilizes mostly renewable sources of energy. We will examine the potential scale of energy production and the associated costs, natural resource requirements and land usage needs for both renewables, such as solar, wind and biofuel, and non-renewables, such as coal, natural gas, petroleum and nuclear. By applying extensive use of basic algebra and an elementary understanding of the physical processes underpinning each energy technology, we will arrive at a number of urgent conclusions about the challenges facing our energy infrastructure.

(Spring) Science in the Media

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar

Popular coverage of science ranges in depth and accuracy, and many scientists do not see the importance of communicating their work, or their excitement, to the general public. Scientific breakthroughs contribute to everyone's quality of life, but the process is poorly understood by many, leading to misunderstandings and misgivings that can affect public policy. This course will look at newsworthy results from current scientific research, exploring topics to better understand the science, ideas such as scientific consensus and repeatability, and examining the tension that may exist between the scientists and the public. Topics will be pulled largely from the physical sciences.

(Spring) Gender in Science - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Gender Studies 241)

This course examines explanations for the underrepresentation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability, the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from professional organizations such as the American Physical Society, and reports from congressional committees.

(Spring) Comparative Biomechanics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Biological Sciences 322)

The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through biomechanical analyses.

POLIT-100-01 - Politics - 2010-2011

(Fall) First-Year Seminars in Politics: Family Ties

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Writing-intensive)

In this course, students will engage a number of classic works of literature and moral philosophy, as well as contemporary works, in order to reflect on the ways the family shapes private and public life and is, in return, shaped by them. We will cover such questions as: how does the family create and then influence the individual? What does it mean to be part of a family? What do individuals owe their families and are those obligations fair? How do we form families? Can the family insulate individuals from politics and society--in good ways and bad? Is political order like familial order? Are the state and society a threat or support for the family? How have these understandings changed over time?

(Spring) First-Year Seminars in Politics: Black Metropolis

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar

Black Metropolis referred to the more than half a million black people jammed into a South Side ghetto in Chicago at mid-twentieth century that featured an entrenched black political machine, a prosperous black middle class, and a thriving black cultural scene in the midst of massive poverty and systemic inequality. This course will follow the political, economic, and cultural developments of what scholars considered to be the typical urban community in postwar United States. We will examine such topics as Martin Luther King's failed desegregation campaign; Harold Washington, first black mayor; William Julius Wilson's urban underclass thesis; and the rise of Barack Obama.

(Fall) First-Year Seminars in Politics: Politics and Truth - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Writing-intensive)

What is the relationship of truth to our political life? Does democracy require truth? Or can democracy pervert truth? Can truth thrive in any type of government? Are these issues more or less relevant for contemporary politics? This course is an introduction to political theory through an examination of these questions. During the semester, students will examine a variety of political theory classics, analyzing the authors' perspectives on these questions.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Complex Organizations 204)

Why are so many people poor in the most affluent of all nations? Are there self-perpetuating "cultures of poverty?" Is poverty the result of economic conditions; failed government programs; discrimination; out-of-wedlock births; inadequate parenting; divorce; poor schools; poor health; poor housing; defects of intelligence or moral character? We will examine conflicting explanations of poverty and potential remedies from a variety of political perspectives, and analyze public assistance laws, Medicaid, and tax policies. Students will participate, in small groups, in an off-campus community-based learning project collaboratively designed with community partners, the instructor and the CBL program. Spanish language skills preferred.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Through the works of the ancient tragedians and comedians, Thucydides, Plato, Aristotle, Cicero, Seneca, Augustine, Aquinas, and Pizan, this course explores themes in ancient and medieval political thought. In alternating years, the course will be taught as either a survey of a wide array of authors or as a more thematically focused study of just a few writers. In either format, we will pay particular attention to the ways these writers characterized the relationship between the individual and community; the roles knowledge, reason, emotion, and rhetoric play in political life; the link between gender and citizenship; and the various forms political community can take.

(Spring) Who Counts? Understanding Inequality and Social Policy Through Methodological Literacy

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

It is one thing to deplore inequality; it is another to do something about it. But how should we define poverty, or evaluate programs for increasing educational equality? Are alleged generalizations about different races, sexes, social classes, or ethnicities supported by reliable data, or is there more variability within these groups than between them? How do we know which statistics to trust? How do the ways in which we ask these questions affect the answers we're likely to find? In this course, we will seek to understand the methods employed by scholars of politics from a critical perspective, looking not only at what they let us see, but also at what they obscure.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Russian and Eurasian Studies 330s)

Nationalism is one of the greatest challenges to multi-ethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments' responses. What has been the effect of the Communist legacy? Are there alternatives to federalism as a way of managing national claims? What socioeconomic policies have governments used to control ethnic tensions? What role can international organizations play in finding solutions to ethnic conflict?

(Spring) Public Policy in Latin America: Drugs, Inequality and Free Trade

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In this class we will explore the three topics that have done the most to shape Latin American politics in recent decades, namely Drugs, Inequality, and Free Trade. The class will explore the theoretical underpinnings and development of policy, as well as the specific responses and changes over time. While we will consider the region as a whole, we will emphasize Mexico, Colombia, Brazil, Chile and Peru. Finally, we will reflect on the role that the United States has played in shaping the above policies, and consider potential future directions for the region.

(Spring) War & Peace in South Asia - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

A region of deeply contested territories, histories and ideologies, South Asia is marked by multiple forms of conflict and violence that traverse territorial frontiers, link domestic politics with foreign policy, and thus complicate the search for peace and security. We will explore the histories and causes of enduring conflicts, such as Kashmir and the wars in Afghanistan, insurgencies in Pakistan, India and Sri Lanka, and potential conflicts over scarce water and energy resources. We will conclude by examining the role of external powers, such as China and the U.S. in South Asia and assessing the prospects for peace in the region.

(Spring) Politics & Rhetoric

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Writing-intensive)

People have long accused politicians of using rhetoric to pander to audiences and get what they want regardless of the truth. But politics, especially democratic politics, depends on communication to persuade and motivate others. What is the relationship between speech and politics? Can we have political communication without rhetoric? How can citizens use speech to improve democracy? What are the political effects of different rhetorical styles? How can speech help communities deal with conflict? The course will focus on these questions, moving from classical writings on rhetoric to contemporary democratic political theory.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

This course examines migration and transnational processes from a comparative perspective. It focuses on the relationship between globalization and international migration, with special attention to transnational networks and diaspora politics. We will explore major theories, forms, and patterns of migration in global politics; the involvement of diaspora organizations in the politics of host and home states; and the implications of migration and refugee flows for state sovereignty, national identity, and citizenship. We will conclude by analyzing the key debates and framing of immigration policies and models of citizenship in Europe and the United States.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

On decision making, and the pathologies of decision making, in American politics. When, and to what extent, can we say that a particular policy decision is the result of rational choice, institutional processes, pluralistic pressures, or other forces? When are individual or collective decisions likely to be marred by "groupthink," selective attention, or self-deception? To what extent, if at all, may collective decisions be considered rational or moral? When are challenges to authority, or to dominant opinion, likely to make a difference?

(Spring) Educational Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Education 233fs)

What do we learn? How do we learn? Why do we learn? In this course, we will study issues of learning, teaching, and motivation that are central to educational psychology. We will explore the shifting paradigms within educational psychology, multiple subject matter areas, (dis)continuities between classroom and home cultures, students' prior experiences, teachers as learners, ethnic and gender identity in the classroom, and learning in out-of-school settings. Requires a prepracticum in a community-based setting.

Prerequisites: soph, jr or sr

Notes: Prepracticum required

Instructors: S. Marx

Expected enrollment: 40

PSYCH-234-01 - Psychology - 2010-2011

(Spring) Differences in Learning

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Education 234s)

Prerequisites: A 100 level course in psychology, 230 or 236, and 233

Instructors: G. Bass

PSYCH-236-01 - Psychology - 2010-2011

(Fall) Adolescent Development

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course offers a comprehensive introduction to human development during adolescence. It considers historical and cultural forces that contribute to adolescence as a distinct segment of the life span. Contemporary problems confronting adolescents--such as crime, violence, gender, race, eating disorders, substance abuse, and depression--are also examined.

Prerequisites: a 100-level course in psychology

Instructors: E. Graham

Expected enrollment: 40

PSYCH-241-01 - Psychology - 2010-2011

(Fall) Cognitive Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Cognition encompasses a range of phenomena that define our mental lives. This course considers empirical investigations and theoretical accounts of cognitive issues, including learning and memory, creativity and problem solving, decision making, attention, consciousness, and language.

Prerequisites: a 100-level course in psychology

Instructors: K. Binder

Expected enrollment: 40

(Fall) Introduction to the Biological Bases of Behavior

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Neuroscience and Behavior 250f)

This course is an introduction to and survey of the biological bases of behavior, including physiological, biochemical, and neurophysiological determinants of sensation, motor control, sleep, eating and drinking, learning and memory, language, and mental disorders.

Prerequisites: a 100-level course in psychology and 4 credits in biological sciences

Instructors: W. Millard

Expected enrollment: 50

PSYCH-251-01 - Psychology - 2010-2011

(Fall) Animal Behavior

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)

Examines the development, causal mechanisms, evolutionary history, and function of the behavior of animals. Topics include sensory capacities, predator evasion, reproduction, parental care, social behavior, and learning.

Prerequisites: a 100-level course in psychology

Instructors: K. Hollis

Expected enrollment: 40

PSYCH-252-01 - Psychology - 2010-2011

(Fall) Bon Appetit! Food, Appetite, and Culture - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Food is energy, an occasion for intimacy, and often a cause of aggression and pathology. The provenance of food preferences in humans and other species is considered from the perspectives of anthropology, biology, neuroscience, and psychology. Specific topics include the sensory properties of food, attitudes toward food, the psychology of ingestion, and the neuroscience of feeding.

Prerequisites: a 100-level course in psychology

Instructors: W. Millard

Expected enrollment: 40

PSYCH-295-01 - Psychology - 2010-2011

(Fall) Independent Study

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Independent study programs are arranged with individual faculty members in the department.

Prerequisites: permission of instructor

Instructors: The department

PSYCH-295-01 - Psychology - 2010-2011

(Spring) Independent Study

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Independent research projects are arranged with individual faculty members in the department.

Prerequisites: permission of instructor

Instructors: The department.

PSYCH-300-01 - Psychology - 2010-2011

(Spring) Seminar in History and Systems of Psychology: Psychology and the Military - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)

Psychology's history as a discipline is inextricably linked to the military -- as an employer of psychologists, as the context and funding source for many of psychology's products, and as the stimulus for the development of key areas of the field. In addition, psychologists' role in warfare (as test administrators, clinicians, and interrogators), and the psychological consequences of war on soldiers (from the shell shock of the 1920s to the PTSD of today) represent some of psychology's most persistent controversies. Reading a range of primary and secondary sources from World War I to the present, we will analyze psychology's complex relations to the military from multiple perspectives.

Prerequisites: jr, sr, 8 credits in department and permission of instructor. Preference given to students with some background in sociology, politics, or history

Notes: Interested students need to fill out an application form available in the Psychology department office.

Instructors: G. Hornstein

Expected enrollment: 15

PSYCH-310-01 - Psychology - 2010-2011

(Fall) Laboratory: Research Methods in Social Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is an introduction to laboratory and field methods in social psychology: methodology, data analysis, ethical problems, statistical inference, and research design. All students are expected to design and conduct a research project.

Prerequisites: Psychology 200 and permission of instructor

Instructors: F. Deutsch

Expected enrollment: 12

PSYCH-319-01 - Psychology - 2010-2011

(Fall) Seminar in Social Psychology: Psychology and the Media

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking-intensive)

This seminar will examine how psychology is represented across a wide range of media, including newspapers, magazines, books, films, Web sites, and advertisements. We will analyze the continuing competition between "pop psychology/self-help" and professional representations of the field, in light of ongoing struggles for authority over mental life. Students will give frequent oral presentations and write a major research paper on a topic of their choosing.

Prerequisites: a 100-level course in psychology, 200, 201, plus 8 additional credits in the department. Preference given to senior psychology and neuroscience majors

Instructors: G. Hornstein

Expected enrollment: 20

PSYCH-319-01 - Psychology - 2010-2011

(Spring) Seminar in Social Psychology: Gender and Domestic Labor

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Gender Studies 333s(04))

This course examines social psychology and sociological theories and research addressing why women do more housework and child care than men. It pays special attention to the situation of dual-earner families and considers class and ethnic differences on the nature of this inequality and the barriers to full equality at home.

Prerequisites: permission of instructor. Students must meet with instructor during advising week to get permission to enter the course.

Instructors: F. Deutsch

Expected enrollment: 15

PSYCH-320-01 - Psychology - 2010-2011

(Spring) Concepts of Abnormality

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a study of how maladaptive patterns of thought and action are understood from a psychological viewpoint. Behaviors ranging from neurotic to psychotic are studied in terms of underlying character structure and origins in childhood experience. Competing psychoanalytic theories are brought to bear on these phenomena.

Prerequisites: jr, sr (permission required for exceptions), two prior psychology courses, Psychology 230 recommended

Instructors: R. Shilkret

Expected enrollment: 40

PSYCH-323-01 - Psychology - 2010-2011

(Fall) Laboratory in Qualitative Research - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Writing-intensive)

This course offers a hands-on introduction to methods of psychological research that focus on the qualitative description and analysis of human experience. Students learn a variety of techniques of data collection (interviewing, intensive observation, archival research) and methods of analyzing textual sources -- from historical accounts to blogs, memoirs, observational narratives, and interview transcripts. Readings focus on specific methodological practices as well as on the history and philosophy of science differentiating qualitative methods from other approaches to psychological research. Students work both collaboratively and individually on projects throughout the course.

Prerequisites: Psychology 200 and permission of instructor.

Notes: This course also counts in the Social area of psychology.

Instructors: G. Hornstein

Expected enrollment: 12

PSYCH-326-01 - Psychology - 2010-2011

(Spring) Laboratory in Personality and Abnormal Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is an introduction to research methods in abnormal and personality psychology. Students will work as a class to collect data using quantitative and qualitative methodologies. Students will be expected to collect survey- and questionnaire-based data as well as engage in some interviewing projects. We will consider the various stages of research including literature review, design, ethical considerations, data collection, and analysis (qualitative and quantitative), and consider the statistical inference or implications of our findings. The course focuses on the impact of stress and coping on the lives of individuals, identity, their relationships, and psychological adjustment.

Prerequisites: Jr. sr., Psych 200, 201; one course in the personality/abnormal area preferred, and permission of instructor

Instructors: A. Douglas

Expected enrollment: 12

PSYCH-329-01 - Psychology - 2010-2011

(Fall) Seminar in Personality and Abnormal Psychology: Psychology of Trauma

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

What happens after a traumatic event? Why do some people develop psychological disorders and others do not? This course will explore the psychological theories and research on trauma and stress. Topics covered will include childhood abuse, domestic violence, combat violence, community violence, and interpersonal violence. The seminar will explore psychological dysfunction, disorders, as well as adaptation and coping following exposure to traumatic stress. In addition, the course will explore the concept of "cultural trauma."

Prerequisites: 100 level psychology course, jr or sr; Psychology 230 preferred or a course in abnormal psychology

Instructors: A. Douglas

Expected enrollment: 16

PSYCH-329-02 - Psychology - 2010-2011

(Fall) Seminar in Personality and Abnormal Psychology: First-Person Narratives of Madness - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking-intensive)

Psychologists have typically conceptualized "mental illness" in terms of the symptoms and diagnoses proposed by psychiatrists in the Diagnostic and Statistical Manual of Mental Disorders (DSM). These categories, while perhaps useful for prescribing medication, do little to help us understand the subjective experiences that are considered "mad." In this seminar, we analyze accounts (historical and contemporary) written by people who have experienced extreme states, intense emotions, or unusual perceptions or beliefs, to understand how these "counter-narratives" offer new insights into psychological life.

Prerequisites: A 100-level course in psychology, jr, sr and permission of instructor; Students with a background in literature particularly welcome.

Preference given to senior psychology and neuroscience majors

Notes: Students must submit an information sheet (form available in department office) by noon on Thursday of advising week to get permission to register for the course.

Instructors: G. Hornstein

Expected enrollment: 18

PSYCH-330-01 - Psychology - 2010-2011

(Fall) Lab in Developmental Psychology: Factors Affecting the "Math Path" of Young Women

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a study of research methods in educational settings, focusing on observational, survey, and interview techniques and using as a context adolescent girls' educational experiences in mathematics. Students will be working directly with the SummerMath database, which spans more than 25 years. Students will develop skills in formulating research questions, designing research, and finding appropriate methods (both qualitative and quantitative) by which to analyze the data. Each student will complete a major research project.

Prerequisites: Psychology 200, 201 and permission of instructor

Notes: Students should submit a statement of interest by email to the professor during advising week. This course can be counted in area C (Developmental and Educational Psychology) OR D (Perception and Cognition) of the curriculum.

Instructors: C. Morrow
Expected enrollment: 12

(Spring) Lab in Developmental Psychology: Psychological Perspectives on Adoption

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Adoption has become a common way to create families in the United States and many other countries. The experience of adoptees, birth parents, and adoptive families raise many questions about family relationships, identities, and community membership. In this course we will look how adoption has been studied, with a particular focus on the experiences of adoptees and their adoptive parents. Students will develop research questions, consider different methods and related ethical issues, and analyze survey and interview data.

Prerequisites: Psychology 200; 201; and 230 or 236.

Instructors: P. Ramsey
Expected enrollment: 12

PSYCH-330-02 - Psychology - 2010-2011

(Fall) Lab in Developmental Psychology: Adolescent Development in Community Settings - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a study of research methods in developmental psychology, focusing on observational, survey, and interview techniques for studying young children, adolescents, and adults. It encourages the student to think about the basic issues of developmental psychology research: the conceptualization of problems, design of research, choice of methods to be used, and ethical questions that might arise. Students complete a major research project.

Prerequisites: Psychology 200, 201; 230 or 233 and permission of instructor.

Notes: Students must pick up an information sheet from the dept. office and submit a statement by email to the professor during advising week.

Instructors: B. Packard

(Fall) Lab in Early Social and Personality Development

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Children's Center at Stonybrook. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations. Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.

Prerequisites: Psychology 200, 201, and 230 or permission of instructor

Notes: 2 labs (3 hours each) required at Gorse Children's Center at Stonybrook

Instructors: P. Ramsey

(Fall) Seminar in Educational Psychology: Motivation - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Speaking-intensive)

What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.

Prerequisites: Psychology 233 and permission of instructor

Notes: 1 meeting (3 hours) plus a field component in a community-based site (at least a 2-hour block per week); A statement of interest must be submitted electronically during the week of advising - please pick up an information sheet in the department office.

Instructors: B. Packard

(Fall) Seminar in Developmental Psychology: Adult Development and Aging

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course will focus on the developmental changes that occur after adolescence. Specifically we will discuss emotional, cognitive and psychosocial changes across the adult lifespan, including middle age and older adulthood. Critical study of the theories and methods in the field will be addressed, and we will evaluate what it means to age successfully or unsuccessfully from various psychological perspectives.

Prerequisites: jr, sr, and Psychology 230

Instructors: E. Graham

Expected enrollment: 15

(Spring) Seminar in Developmental Psychology: First Love: Attachment Theory and Research

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, how we know about its importance to the infant, and the variation in types of such relationships early in life. The importance of this first love for later development, in childhood, adolescence, and adult life will be considered. Methods of research will be emphasized and students will be expected to give class presentations.

Prerequisites: jr, sr, Psychology 200, 230 or another developmental psychology course and permission of instructor

Notes: During advising week students should submit an essay to Prof. Shilkret listing their psychology courses and stating why they wish to be included in the seminar.

Instructors: R. Shilkret

Expected enrollment: 15

PSYCH-340-01 - Psychology - 2010-2011

(Fall) Laboratory in Perception and Cognition: Cognition and Literacy

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course)

Adult illiteracy in the U.S. presents an ever-growing challenge. To understand this problem, we will learn various theories of reading. However, since many models of reading are based on data gathered from children, we will also examine how the cognitive abilities of adults are different from those of children. A large component of this class concerns learning the lab techniques associated with assessing reading abilities. In addition, since this is a community-based learning course, each student will become a tutor for an adult enrolled in an area literacy program.

Prerequisites: a 100-level course in psychology, 201, 200 and permission of instructor. Students must meet with the professor during advising week to get permission to enter the course.

Notes: 3 hours per week as a literacy tutor in Springfield is required.

Instructors: K. Binder

(Spring) Lab in Perception and Cognition

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Speaking-intensive)

In this lab we will explore issues related to reading fluency in children. We will investigate a number of research areas: how do young readers develop fluency, how do readers' eye movement change as a function of their fluency and reading instruction, how do reading remediation programs promote reading for fluency and understanding? We will examine these questions by reading literature based on how children acquire these skills, and then analyze data that have been collected from 2nd grade readers who will be exposed to three different reading remediation programs. You will learn a number of software programs that are designed to assess reading behavior, and analyze and present those data in class.

Prerequisites: Psychology 200 and 201

Instructors: K. Binder

Expected enrollment: 15

PSYCH-349-01 - Psychology - 2010-2011

(Spring) Seminar in Perception and Cognition - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Speaking-intensive)

In this seminar we will explore issues related to reading comprehension. We will investigate a number of research areas: how do readers use context to add to their vocabulary knowledge, what types of information do readers use to draw inferences from a text, how do readers build a mental model of what they are reading? We will examine these questions by reading literature based on how children acquire these skills, and how adult skilled readers accomplish these tasks. In addition, we will examine how people with reading disabilities are impacted. Finally, we will explore remediation programs that are developed to deal with reading problems.

Prerequisites: Psychology 200 and 201

Instructors: K. Binder
Expected enrollment: 15

(Spring) Seminar: Biological Bases of Behavior: Of Madness and Molecules: Seminar in Neuropsychopharmacology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Charpentier, a French scientist of the 1940s, unwittingly discovered a chemical that was to alter dramatically our understanding of madness. The chemical, chlorpromazine, has been widely used for the treatment of psychosis. Of interest is neuropsychopharmacology--the science and the technology. The principles of pharmacology are discussed and precede the examination of applications of the technology to psychopathology (for example, schizophrenia, depression, anxiety, and violent behavior).

Prerequisites: Psychology 250 or Biological Sciences 333 and permission of instructor. Preference given to junior and senior psychology and neuroscience and behavior majors

Instructors: W. Millard

(Fall) Racism and Inequality in Schools and Society

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Writing-intensive)

What is race? Who decides? Are we a "postracial" society? This course focuses on historical, social, psychological, and legal underpinnings of the social construction of race and examines how perspectives on race have influenced the lives of students and teachers in schools. Class sessions compare the old vs. "new" racism, contrast the workings of white privilege with calls for white responsibility, explore perspectives on the "achievement" and "opportunity" gaps, and examine how antiracist pedagogies can address inequities in education at the curricular, interpersonal, and institutional levels. Essays, response papers, field experiences, and a digital media project are required.

Prerequisites: sophomore, junior, senior or permission of instructor

Notes: Prepracticum required

Instructors: S. Lawrence

(Fall) Making Meaning for Operations/Reasoning Algebraically about Operations

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Math 156)

This course will draw on two modules of the Developing Mathematical Ideas (DMI) series. DMI is a curriculum designed to help think through the major ideas of K-8 mathematics and examine how children develop those ideas. The first five sessions will parallel the first four sessions of Making Meaning for Operations. The remaining eight sessions will be based on the Reasoning Algebraically about Operations module. This module focuses on how children's study of operations leads into articulation of generalizations in the number system and justification of such generalizations. Participants will explore and understand how such work in the early grades relates to algebra studied in later grades.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Philosophy 226fs)

This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in Schleiermacher's Speeches. Finally, we focus on the idealistic and pragmatic tradition in American philosophy of religion.

(Spring) Introduction to Jewish Mysticism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Jewish Studies 235)

Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the Kabbalah of thirteenth-century Spain, focusing upon the seminal work of this period, the *Sohar*; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

(Fall) Early Christianity in Iraq and Iran

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

In the first millennium, Christianity thrived throughout the Middle East. Because Roman Catholic and Protestant churches later declared many of these Christians to be heretics, their stories have often been excluded from the history of Christianity. This course challenges the assumption of Christianity as a "Western" religion and asks how our understanding of global Christianity changes when we include the history and perspective of Eastern Christians. We will read such sources as the tale of a transvestite nun, a letter allegedly written by Jesus, ancient Christian hymns, the story of a demon-possessed monastery, and the first Christian writings on Islam.

(Spring) Women and Buddhism

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Gender Studies 210)

This course explores women and Buddhism during different historical periods and in different cultures. Through a variety of sources, this course will illuminate Buddhist concepts of gender and sexuality, views of women's spiritual capacities, the diversity of women's images, roles, experiences, concerns, and contributions in Buddhist societies, and scholarly approaches to women in Buddhism. Special attention will be given to how gender is constructed in each cultural and religious context encountered, with particular emphasis on Buddhist women in Southeast Asia. We will look into the reasons why texts on religion have not always included the voices of women, and we will investigate ways to uncover them through research techniques and alternative hermeneutical strategies.

(Fall) Cooking Your Life: Food, Eating, and the Sacred

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores the central role that food and eating have in religious cultures, particularly Judaism, Christianity, Islam, Buddhism, and Hinduism. What rules do religious traditions have about what to eat and what is prohibited? What practices are associated with daily religious rituals, table rites, and sacred festivals? What social dimensions to food and eating are there within the family and community? What are the ethical dimensions to food and religious traditions, especially in a world of hunger and concern about sustainability?

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.

A distinctive mark of Western thought in the nineteenth century was its fascination with "the origin of things." The origin of the species and the origin of the universe are two prime examples. These two concerns, in particular, had a decisive impact on how religion and science came to be understood and expressed in the twentieth century. As a consequence of the ensuing public debate, this question of "origins" presented a direct challenge to the received theory of creation, the meaning of miracles, as well as the nature of biblical inspiration.

(Spring) Seminar in Romance Languages and Cultures: History of Romance Languages

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Taught in English; Spanish 360, Italian 361, French 321)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students wishing to obtain language credit are expected to read works in at least one original language. Papers will be written in either English or the Romance language of the student's choice.

This course examines the structural evolution of Romance languages from Vulgar Latin to contemporary forms. A chronological account will be organized around themes of persistence (inheritance from Latin) and innovation (structural change). We will begin by exploring different theories about linguistic change. Then, using concrete examples, we will analyze the main stages of development of Romance languages by focusing on different features at all linguistic levels and relating them to historical and sociological factors.

Prerequisites: for language majors: two courses in culture and literature at the 200-level

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English)

Preamble (for topics courses): The first-year seminar sharpens skills in careful reading, and effective writing. Students will write frequently and have an opportunity to revise their work. Class discussion will encourage students to develop speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments.

2010 marks the centenary of the death of Leo Tolstoy (1828-1910). We will read fiction, essays, and letters that Tolstoy wrote after his masterworks *War and Peace* and *Anna Karenina*. Readings include: *The Death of Ivan Ilyich*, *The Power of Darkness*, *Kreutzer Sonata*, *Why Do Men Stupefy Themselves?*, *The Devil*, *Hadji Murat*, and *I Cannot Be Silent*. We will concurrently read Jay Parini's novel, *The Last Station*, a portrait of the final years of Tolstoy's life, as well as memoirs by Tolstoy's family and friends. These diverse texts offer contradictory evidence about what happened in Tolstoy's final years.

(Fall) The Romanovs: Triumph and Tragedy

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; History 205f-01)

We will study defining periods in Russian and world history with an emphasis on the powerful Russian monarchs who shaped them: in particular, Peter the Great, Catherine the Great, Alexander II, and Nicholas II. Russia's tsarist system raises important questions about the nature of the monarchy. The Russian case shows how monarchies can change and develop, and why, ultimately, many of them failed. Why did the Romanovs fail when their relatives, the House of Windsor, did not? Could Russia have survived as a constitutional monarchy? What is the role of a royal dynasty in defining nationhood?

(Fall) Great Books: The Literature of Nineteenth-Century Russia

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

(Spring) Topics in Twentieth-Century Russian Literature: Diabolic Carnival: Bulgakov's Master and Margarita and Its Contexts

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

Mephistopheles in Moscow? The Gospel retold? At turns both wildly comic and metaphysically profound, Bulgakov's novel has been a cult classic since its unexpected discovery in 1967. This course will consider Bulgakov's masterpiece together with some of its literary, historical, and social contexts. Additional readings from Goethe, Gogol, E.T.A.Hoffman, Akhmatova, and others.

(Spring) Russia

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Taught in English; History 212s)

This course examines pivotal archetypes of Russian civilization that reflect Russia's past, demarcate its present, and constrict its future. We will focus on the canonic historical monuments of Russia, such as the Kremlin of Moscow and the downtown of St. Petersburg. Starting with the representation of these landmarks in the media, we will explore them in depth by reading conflicting historical narratives and cultural histories and eventually deconstruct their cultural message and value. By the end of the course, students will be familiar with the Eastern Orthodox Christianity rites and able to identify and discuss the most common artifacts of Russian civilization.

(Spring) Tolstoy's *War and Peace* - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

Throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately subject to forces beyond human control, defeated attempts at codification. We will read *War and Peace* in an attempt to understand how that irresolvable conflict fuels Tolstoy's intellectual pursuits and informs his theories on art.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

Perhaps no other novelist has delved as deeply into the psychological and metaphysical dimensions of evil as the Russian novelist Fyodor Dostoevsky. This course will be devoted to a close reading of Dostoevsky's landmark novel of murderous passion and parricide, *The Brothers Karamazov*. Why should crime and transgression be a privileged avenue of access into the human interior? How is psychology tied to the metaphysical aspect of human existence? What are the sources of evil--and redemption?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 209)

Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 264f)

Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without an understanding of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and the role played by Russia and the former Soviet republics in the far more complex "New World Order" we live in today. How have the expansion of the European Union, the tragedy of 9/11, and the war against terrorism influenced Russia's relations with the West?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 242s)

Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental

catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Taught in English; History 260(03))

The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? (Spring) Silk Roads: Ancient and Modern Highways across the Eurasian Continent - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 312)

The silk roads were ancient transportation and trade links that wound their way across the Eurasian continent, or by sea through the South China Sea and Indian Ocean, to Europe. They carried silk, glass, jade, and moved religions and literatures across continents. Today, the new silk roads carry oil, gas, drugs, capitalism, and immigrants seeking better lives. We will investigate the parallels between the ancient and modern silk roads and the contemporary strategic, cultural, and economic significance of these new highways, which link China, Central Asia, the Middle East, South Asia, and Europe.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 300f)

With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 308s)

Nationalism is one of the greatest challenges to multiethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments' responses. What has been the effect of the Communist legacy? Are there alternatives to federalism as a way of managing national claims? What socioeconomic policies have governments used to control ethnic tensions? What role can international organizations play in finding solutions to ethnic conflict?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 243s)

Russia was the first nation in the world to face political terrorism. In Russia, the era of terrorism lasted from the 1860s, when the People's Will group launched the hunt on the tsar Alexander II, until 1918, when the Socialist Revolutionary Party attempted to assassinate Lenin. A case study of terrorism in Russia will help us to answer a number of questions highly relevant today. What are the causes of terrorism? What are its goals and methods? What can governments do to cope with it? What is the impact of terrorism on society?

(Fall) Revolutions

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 350f)

Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Fall) First-Year Seminar: Social Inequality

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Speaking-intensive)

The study of social inequality constitutes one of sociology's major areas of inquiry. In this seminar, we will focus on class, racial, and gender inequality. We will explore the origins and social consequences of these forms of inequality. Our examples will be drawn primarily from the United States, but the course will also touch on issues of inequality throughout the globe.

(Fall) Issues in Sociology: Sociology of Popular Culture

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

There is little question that popular culture occupies a central role in the contemporary social world. For some scholars, popular culture serves a social function akin to traditional religion, acting as a form of social solidarity by promoting collective ideas, experiences, and identities. A more critical approach views popular culture as a form of ideological domination, promoting the interests of certain social groups at the expense of others. This course will examine these theories and others by exploring both the social factors that help influence the production, consumption, and experience of popular culture as well as the ways in which popular culture itself helps shape society today.

Preamble (for topics courses): This course focuses on significant problems in the field of sociology with group meetings and reports.

The Death Penalty in America: Unjustly Convicted Death Row Inmates. This course will examine in detail the cases of all 130 death row inmates exonerated in the post-Furman era (1976-2009). It will focus on how the 130 men ended up on death row, as well as the process by which they gained their freedom. In addition, the course will spotlight the many proposals, videotaped police interrogations, eyewitness identifications, forensic science procedures, etc., designed to correct sources of mistakes; and assess their likelihood of successfully preventing both unjust and wrongful convictions in capital cases.

(Fall) Social Inequality

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a critical survey of theoretical and empirical research on social inequality, stratification, and mobility. The central focus is class, race, and gender inequalities as they have changed during the post-World War II period in the United States (although we will look briefly at stratification regimes in other cultures and time periods). The concepts and methods of social stratification have wide application in sociology, economics, public policy, and administration contexts. As the course progresses, we will explore some of these applications as we wrestle with several policy issues currently confronting U.S. society.

(Fall) Studies in Identities and Intersections: Constructing (Our) America

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): A broad introduction to issues of identity (gender, sexual, ethnic, cultural, class, national, religious) in the Spanish-speaking world and their intersections with other dimensions of cultural agency and power differentials. The specific course contents and examples examined will vary each semester.

Who are we? This is the question that Latin American writers, artists, philosophers and politicians have attempted to answer through fiction, nonfiction, visual arts, and film. Through representative cultural texts from figures such as D. F. Sarmiento, José Martí, Gabriela Mistral, Marta Rojas, and Hugo Chávez, we will explore discourses of identity, different sociopolitical positions, and the representation of race and gender in the construction of "latinoamericanidad."

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Gender Studies 101)

Preamble (for topics courses): A broad introduction to issues of identity (gender, sexual, ethnic, cultural, class, national, religious) in the Spanish-speaking world and their intersections with other dimensions of cultural agency and power differentials. The specific course contents and examples examined will vary each semester.

This course, taught in Spanish, is an introduction to the interdisciplinary field of gender studies. It also focuses on the specific implications of this new, predominantly U.S.-based discipline for and in the Spanish speaking world. The intersections among gender, race, class, and sexuality in various contexts, past and present, will be central to our inquiry. Topics will include the politics of appearance, women's economic status, sexual violence, racism, legacies of colonialism, the challenges of transnational feminist and queer activism, and strategies for change. We will examine the development of feminist and queer theory and its practices in various local and transnational contexts, but especially in the Spanish-speaking world.

(Community-based learning course; Speaking- and writing-intensive)

Preamble (for topics courses): A broad introduction to the study of visual representation in Latin American, Spanish, and U.S. Latina/o cultures. Students will examine the articulation of a variety of topics in media such as film, television, fine arts, Internet, and/or video. The specific course contents and examples examined will vary each semester.

New technologies (Internet, wireless devices, digital storytelling) are changing the media landscape as well as social, political, and economic relationships. The "other" media is reshaping the notion of otherness itself, as new forms of representation (self-produced, instantly available, some times unfiltered) continue to emerge and consolidate worldwide. This class examines how traditionally marginalized groups, including the Zapatistas in Mexico, at-risk youth in Brazil, and Latino communities in the U.S., utilize new media to gain visibility and tell their stories in their own voice.

(Fall) Concepts and Practices of Power: An Introduction: What Is Memory?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Gender Studies 204-02, Theatre 204-01)

Preamble (for topics courses): A historical approach to the analysis of political discourses and economic relations in Latin America, Spain and Latina/o cultures in the United States. Topics may include, but are not limited to, imperialism, (post/neo)colonialism, (trans)nationalism, migration, globalization, and neoliberalism. The specific course contents and examples examined will vary each semester.

Memory has a wide range of meanings and applications in many different contexts. What, for example, is the difference between artificial intelligence and human memory? How are national identities constructed around the commemoration of great events? What is the importance of memory in relation to concepts like justice and progress? How do rituals and performances work to determine gender and other identities? In this course, we examine the social, political, cultural, neurological, and technological functions of memory through readings and exercises that require students to think across disciplines. Special attention will be given to interpretations and adaptations of Sophocles' *Antigone*.

(Fall) Advanced Studies in Identities and Intersections: Women Writers: Early Feminisms

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Gender Studies 333 (08))

This course examines a variety of literary expressions of Early Modern Spanish women (Teresa de Avila, Catalina de Erauso, and María de Zayas among others). Attention will be paid to the formal means by which women writers emulated, appropriated, or subverted male-authored models. A significant part of the class will deal with the ways in which contemporary feminist theories can be used to complement, interpret, and flesh out ideas

expressed by Early Modern women. Students will collaborate with the organization of an international conference on women to be held at MHC in September. Students will work on projects based on conference presentations and interview the participants.

(Spring) Advanced Studies in Identities and Intersections: Blak Is Black: Afro-Central American Literatures and Cultures

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

From Belize to Panama, there exists an Afro-Creole cultural continuum with roots in the British colonial history and U.S. transnational expansion. In spite of the rhetoric of inclusion, Afro-Central Americans are largely absent from official discourse of national identity. This course will examine texts by Afro-Central American writers and artists as they contest discourses of invisibility, dominant representations of blackness, and racial ideologies that exclude Afro-descendants from the national literary canons. This course will study the works from Belize, Honduras, Nicaragua Costa Rica, and Panama.

Prerequisites: Two courses in Spanish at the 200-level above 212.

(Fall) Advanced Studies in Visual Cultures: Natural's Not in It: Pedro Almodóvar

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Film Studies 380-01)

This course studies the films of Pedro Almodóvar, European cinema's favorite bad boy turned acclaimed auteur. On the one hand, students learn to situate films within the context of contemporary Spanish history (the transition to democracy, the advent of globalization, etc.) in order to consider the local contours of postmodern aesthetics. On the other hand, the films provide a springboard to reflect on larger theoretical and ethical debates. For instance, what can a weeping transvestite teach us about desire? What happens when plastic surgery and organ transplants become metaphors? Under what circumstances, if any, can spectators find child prostitution cute?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Community-based learning course; Speaking- and writing-intensive)

This community-based learning course examines how digital storytelling enables communities to express themselves and gain social visibility through literary and media discourses. How do traditionally marginalized communities tell their own stories? Together with the Springfield-based Latino Youth Media Institute, students will produce digital stories and co-lead media workshops for community residents. Throughout the semester, students will alternate classroom instruction and off-campus work in Springfield (transportation arranged by the College).

(Spring) Advanced Studies in Concepts and Practices of Power: Beyond Logocentrism

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Gender Studies 333)

Logocentric thinking is characterized by the desire for a center or original guarantee of all meaning, and has dominated the Western world since Greek antiquity. It attempts to repress difference in favor of identity and presence. Feminists have extended the concept to talk about *phallogocentrism* as the logical underpinning of patriarchy, and seek to go beyond it. Thinking beyond logocentrism is also crucial for the new discipline of critical animal studies. In this course, we will study attempts at breaking with the (phal)logocentric model of subjectivity, many of which have emerged in the "mestizo/a" continent.

(Spring) Advanced Studies in Language and Society: History of Romance Languages

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Taught in English; Romance Languages 375, Italian 361, French 321)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students wishing to obtain language credit are expected to read works in at least one original language. Papers will be written in either English or the Romance language of the student's choice.

This course examines the structural evolution of Romance languages from Vulgar Latin to contemporary forms. A chronological account will be organized around themes of persistence (inheritance from Latin) and innovation (structural change). We will begin by exploring different theories about linguistic change. Then, using concrete examples, we will analyze the main stages of development of Romance languages by focusing on different features at all linguistic levels and relating them to historical and sociological factors.

Prerequisites: Two courses in Spanish at the 200-level above 212

Notes: Papers will be written in English or the Romance language of the student's choice. Students wishing to obtain 300-level credit in French, Italian, or Spanish must read texts and write papers in the Romance language for which they wish to receive advanced credit.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.

(Spring) Linear Statistical Models - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.

(Mathematics 342f)

This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.

(Spring) Topics in Design: Costume Construction

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will explore the evolution of costume construction, using both historical and modern methods. Commercial patterning, flat patterning, and draping methods will be covered. Students will learn skills for the construction, care, identification, and treatment of fabric and the use and maintenance of tools used in the costume shop. Through these methods we will interpret costume renderings by prominent designers.

Prerequisites: preference to fy and so

Notes: lab fee \$35; additional purchase of construction supplies and materials is the responsibility of the student.

(Fall) Design I

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

An introduction to the art and work of the set and costume designer in the performing arts. Students will learn how a designer approaches a script, how their work impacts a production, and what means are used in the execution of this process. They will learn how to develop their own visual imaginations and how to create visual concepts through discussions, renderings, and models. No previous experience in theatre, performance, or the visual arts is required.

Notes: lab; \$30. lab fee. Additional purchase of design supplies and materials is the responsibility of the student.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

What is sound design? This course attempts to answer that question, exploring how to look at a text and launch the creative process, and how to take the ideas based on that creative process and turn them into sounds to be used in a show. This is all done through a series of introductory lab projects and then a complete design for a short play, all while learning three new pieces of software. This is a highly interactive class, where student participation is key; students will be expected to take part in each project, as well as creating their own work.

(Fall) What Is Performance?

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive)

What's the difference between acting and being, and how does the idea of "performance" structure this difference? How do we "perform" our own identities, and how do we interpret the performances of others? This seminar offers a basic introduction to performance studies, an exciting new discipline through which everyday life, ritual behaviors, and artistic practices are studied. Perspectives from the arts, humanities, and social sciences will be explored using both textual and performative approaches. This is a speaking-, reading-, and writing-intensive class that includes innovative individual and group exercises.

(Fall) Introduction to the Music of Africa - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Music 166)

This course concentrates on indigenous musical traditions from different parts of Africa. Cross-cultural features as well as regional varieties are examined. A major objective of the course is to facilitate an understanding of the cultural contexts within which African musical traditions derive their meaning and significance. Relying on live performances and recordings, the course examines the conceptual and behavioral aspects of music, the contexts and functions of performances, musical instruments and vocal styles, the training and status of musicians, and the stylistic features of the music. The course culminates in a performance of an African opera.

(Fall) Women and Gender in the Study of Culture: What Is Memory?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 250f-01, Gender Studies 204f-02)

Preamble (for topics courses): A historical approach to the analysis of political discourses and economic relations in Latin America, Spain, and Latina/o cultures in the United States. Topics may include, but are not limited to, imperialism, (post/neo)colonialism, (trans)nationalism, migration, globalization, and neoliberalism. The specific course contents and examples examined will vary each semester.

Memory has a wide range of meanings and applications in many different contexts. What, for example, is the difference between artificial intelligence and human memory? How are national identities constructed around the commemoration of great events? What is the importance of memory in relation to concepts like justice and progress? How do rituals and performances work to determine gender and other identities? In this course, we examine the social, political, cultural, neurological, and technological functions of memory through readings and exercises that require students to think across disciplines. Special attention will be given to interpretations and adaptations of Sophocles' *Antigone*.

(Spring) Acting II - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A continuation of techniques developed in Performance I with a greater commitment to the culture of collaboration. Concentration is on scene work with "classic" realist playwrights, Chekhov, Ibsen, and Williams. Scene study continues with contemporary masters Churchill, Mamet, and Parks. Actor training will involve the embodiment of physical behavior, the visceral use of language, and more intermediate composition work with Viewpoints to develop and refine character. Practical tools explored in class are intended to offer the student greater vocal, physical, and imaginative freedom and clarity, as well as formidable text analysis skills.

Prerequisites: Theatre Arts 105 or permission of instructor

(Fall) Topics in Performance: Japanese Theatre Theory and Practice

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The focus of this course is on the performance structures of Japanese theatre. The course is divided into sections of theory and practice. The theory section will contain an overview of the history of Japanese theatre forms and styles and more in depth exploration of Noh, Kyogen, Kabuki, and Butoh. Students will work in class on scenes from classic Japanese texts and will be trained in basic forms of Japanese movement. Each student will be required to perform in two scenes and to do an in-class presentation.

Prerequisites: permission of instructor

Notes: Lab fee \$10

Instructors: B. OHarra

(Spring) Topics in Performance: Advanced Performance Workshop

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this course we will engage (perform/direct) scenes from plays written by contemporary American women playwrights (i.e., Sybil Kempson, Erin Courtney, Karinne Keithly) while comparing them to scenes from early experimental American women playwrights (Gertrude Stein, Susan Glaspell). This is an advanced performance class that will rely heavily on dramaturgy as a point of access into texts that often defy the basic rules of drama and acting. There will be some theoretical and historical reading assignments, short individual research projects, and monthly scene presentations.

Prerequisites: 105 and permission of instructor

Instructors: R. Babb

(Spring) Seminar: Theatre on Film/Film on Theatre

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(32x02 filmst Seminar in film studies Theatre on Film/Film on Theatre)

For over a century, the relationship between stage and screen has been mutually defining. From the early influence of melodrama on cinematic form to contemporary experimental performance practices, theatre and film have sustained a rich, ongoing dialogue. With this in mind, we will study films that

engage with theatricality as well as stage work that embraces cinematic sensibilities. Course materials include a broad selection of films in various genres as well as theoretical readings and a selection of plays. A special section of the course will be devoted to Shakespeare on film. Required weekly screenings will be complemented by attendance at live theatre performances.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 317)

The commercial theater of Shakespeare and his contemporaries evolved as a popular art as the emerging market for printed books began to create a popular literature. Theaters, acting companies, plays, and theatrical audiences helped shape one another, as the book trade shaped and was shaped by reading publics. Case studies in plays by such writers as Christopher Marlowe, Thomas Dekker, Ben Jonson, Thomas Middleton, Elizabeth Cary, and John Webster; sustained attention to acting companies, performance practices such as cross-dressing, gender roles, and sexuality. Substantial opportunity for independent work reflecting each student's interests.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar immerses students in the local theatre scene. Through conscious spectatorship, we learn to approach live performance from a critical perspective, rethinking how we see, understand, and respond as audience members. In addition, we read and discuss the work of selected theatre critics, considering the politics of theatre-going as a public discourse. Each student will write a number of short reviews over the semester, which will be workshopped with an eye for publication. As such, we will consider elements of style and tone, and practice the arts of editing, revising, and offering feedback to others.

AFRAM-100-01 - African American and African Studies - 2011-2012

(Spring) First-Year Seminar: The Civil Rights Movement

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Writing-intensive; History 101)

We will examine the crusade for desegregation both within and beyond the South. Some attention will be given to the movement's Reconstruction precedents, but we will concentrate on the post-1954 period. Readings will cover how segregation was instituted; different phases of the movement; leaders, organization, and followers; the role of women and children; and post-movement history.

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course will introduce students to topics and methodologies within the vast field of African studies. This course will attempt to disrupt the history-based, U.S.-centric model by presenting alternate texts and approaches to the study of the *global* black experience. We must necessarily begin by questioning the idea, definition, and practice of blackness: what is it? How/did a unified black identity emerge from disparate people, practices, and experiences? After investigating the formation of the African diaspora, we will consider texts from the Americas, Europe, and the continent, assessing each for its historical, aesthetic, political, and cultural value.

(Spring) Black Women Writers: Feminist Visions from the African Diaspora - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Writing-intensive; Gender Studies 204)

This course will explore the influence of feminist politics on the writing of women throughout the African Diaspora. By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? How does feminist literature of the African Diaspora challenge negative stereotypes and misrepresentations of black women's realities?

(Community-based learning course)

Reviews theory and policy research that targets durable (race, gender, and class) inequalities. How has recent policy (especially involving schools and prisons) shaped public life and private sector capacity in communities of color from 1976 to the present? What are the consequences of governing through crime and punishment? Is poor discipline a viable approach to strengthening the social fabric? Data and personal narrative will be used. Brings together Mount Holyoke students and women in the final stages of their sentences in Hampden County, who collaborate as peers in a semester-long exploration of these issues. The semester culminates with a reading and completion ceremony.

(Spring) Luminous Darkness: African American Social Thought After DuBois

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American public policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course considers different responses to his 1903 question, "How does it feel to be a problem?" Examining theories, arguments, movements and policies targeting blacks and their environment allows us to criticize black modernity, assess the changing role of black intellectuals in society, evaluate "race theory" and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

(Fall) Gender, Terror, and Trauma in African American Culture - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This course will explore representations of violence in African American culture, with special consideration given to literary depictions of rape and lynching. After examining the historical function of violence within the United States, students will perform a comparative analysis of texts authored by black women and men. We will also explore cultural, social, and political movements (abolition, civil rights, black power, black feminism, hip-hop) that have emerged in response to the violent policing of black bodies. How has violence been used to terrorize blacks? What role has violence played in the African American struggle for liberation and equality?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Writing-intensive; Film Studies 320-01)

This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of--and challenges to--intimacy in interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Speaking-intensive)

Not all 'about' claims imply the same kind of 'about.' Do scientific inquiries answer to a different kind of 'about' question than the arts, literary criticism or political rhetoric? Paintings depict and writing describes, what does music do? Express? Do a religious icon, a realistic painting and an abstract painting involve the same kind of depicting, just different subject matters and styles, or does 'intent' also make a difference? What is that difference, how do I describe it? Do the answers to my questions apply equally at different times in history and in other cultures? This seminar will involve lots of reading, writing, looking and listening, some guest lectures and group projects.

First-year seminar

The range of violent phenomena is wide; it includes everything from political violence to domestic violence to the mere use of any form of force. In this course, we will look at violence as a problem of politics and how different segments of society utilize violence to solve social and political issues in our contemporary world. The course will aim to tackle questions such as: What is the role of violence in our political systems? How is violence treated in its aftermath? How does violence affect gender roles? What, if anything, does human nature have to do with warfare and violence? How does violence affect community ties and what does displacement and expulsion do to people?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course explores the study of ancient foodways with a focus on how and why humans across the globe began to domesticate plant and animal resources approximately 10,000 years ago. The first half of the course presents the types of archaeological data and analytical methods used to study the "agricultural revolution" in a variety of regions. The second half explores a number of themes within the archaeology of food that investigate the relationship between agriculture and sedentism, food and gender, the politics of feasting, and methods for integrating archaeological and ethnographic approaches to the study of food.

(Fall) Making Class Visible

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course examines questions of social class within the Mount Holyoke community, at critical intersections with race, gender, and disability. Drawing upon readings in anthropology and film studies that critique the notion of a homogeneous "community" and offer alternative theoretical models, students will focus reflexively on three projects: the co-production of an ethnographic film, the creation of an advertising campaign for the film,

creation of a website, for extending the conversation about class, Among the questions we explore at all three sites are: What is your idea of work? Where and when do you notice class? Is class a topic of conversation and/or storytelling in your family?

Prerequisites: Anthropology 105 or permission of instructor

Notes: 1 meeting (2.75 hours) plus screenings and production time to be arranged

ANTHR-226-01 - Anthropology - 2011-2012

(Fall) Research Seminar in Sociology and Anthropology

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Sociology 226)

This seminar meets to discuss practical issues in doing research in anthropology and sociology. Depending on student interest, activities could include reading field notes, narrative analysis of texts, survey design, coding and measurement of quantitative variables, and/or visual analysis. Students might think about how to develop a class paper into an independent study, how to organize research for a thesis, or how to make sense of research and internship experience off-campus or during study abroad.

Prerequisites: 8 credits in Anthropology or Sociology

Instructors: M. McKeever, E. Townsley, L. Morgan

(Spring) Language in Culture and Society

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.

(Fall) Medical Anthropology

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Biocultural aspects of disease and healing are examined through case studies of nonindustrialized societies, including the relationship between malaria and sickle cell anemia in West Africa and ritual cannibalism, AIDS, and a degenerative nervous-system disorder (kuru) in highland New Guinea. This course surveys the cultural construction of suffering and healing, the medicalization of human social problems, and inequities in the distribution of disease and therapy.

(Fall) Advanced Seminar: Living the Law: Seminar in Political and Legal Anthropology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course will explore the fundamental question of how the state and the law figure into our everyday lives. We will look at the ways in which state practices and apparatuses come to influence society and culture. Issues to be dealt with will also include transitional justice, post-conflict reconciliation, law and colonialism, and law and violence. The course will think through theories in legal and political anthropology but also include a secondary regional component where many ethnographic examples will come from the Middle East. We will take advantage of contemporary legal claims and constitutional battles resulting from the 2011 Arab revolts to place theory into the social world.

(Spring) Special Topics in Anthropology: Arab Revolutions and Social Movements

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In this course, students will study the 2011 Arab revolutions as politics in process, and consider the factors that led to the current uprisings as well as the path that each continues to take. We will look in particular at various social movements in the region - past and present - their demands, modes of resistance and relationship to their respective states. In looking at these movements, students will be challenged to place the current revolutions within a historical context. Examples of topics that will be covered are security regimes, the Arab-Israeli conflict, and ways of thinking about the Arab world.

Prerequisites: 8 credits in department or permission of instructor; some knowledge of Middle East History and/or Politics is strongly recommended

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Gender Studies 333s(07))

This seminar focuses on contemporary anthropological scholarship concerned with the varieties of sexual expression in diverse cultural settings. We will read ethnographic accounts of sexual ideologies and the politics and practices of sexuality in Brazil, Japan, Native North America, India, and elsewhere. We will examine anthropological theories of sexuality with an emphasis on contemporary issues, including performance theory, "third gender" theories, sexual identity formulation, and techniques used by various societies to discipline the body.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

In this seminar we question the distinction between myth and history and consider the relationship of historical consciousness to memory, forgetting, and other types of temporal awareness. We then examine the relationships among literacy, art, nationalism, and the invention of tradition and test the limits of ethnohistory. Finally, we look at the ways in which relics, museums, and tourism have all helped make history--as fact, experience, or commodity--possible.

Architectural Studies

ARCH-205-01 - Architectural Studies - 2011-2012

(Fall) Topics in Architecture: Sculpting Space: Introduction to Architectural Design

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This studio course will be a design investigation of a particular theme in or approach to architecture and the built environment. Students will develop and apply traditional and contemporary architectural skills (sketches, plans, elevations, models, computer diagramming, and various modes of digital representation) to interdisciplinary and socially pertinent design problems. Creative and indexical study and analysis will be used to generate and foster a broad range of concepts and language to solve architectural issues involving site, construction, inhabitation, function, form, and space. Our goal is to apply creative techniques in art and sculpture to the creation of meaningful space.

Prerequisites: One semester of design or drawing is recommended

Notes: Studio fee

Instructors: T. Long

Expected enrollment: 12

(Spring) Topics in Architecture: Introduction to Architectural Design - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This introductory studio architecture course is a rigorous series of design investigations into architecture and the built environment. Students will develop and apply traditional and contemporary architectural skills (drawings, models) to interdisciplinary and significant design problems. Creative and indexical study and analysis will be used to generate and foster a broad range of concepts and language to solve architectural issues involving site, construction, inhabitation, function, form, and space.

Prerequisites: One semester of Drawing I, design, or sculpture is recommended.

Notes: Studio fee \$60.

(Spring) Introduction to Architectural Design II: Regenerative Design: Shifting the Sustainability Paradigm

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Community-based learning course)

This studio will begin with a discussion of sustainability, identifying the merits and failures of both practices and products. Picking up where these methodologies fall short, students will conduct multidisciplinary research that will inform and lead them on a path toward regenerative solutions within their studio projects. In this, the studio becomes a laboratory where the scope of being a designer is redefined; programs are reinvented to spur new economic and community growth and sustainability takes on greater accountability, momentum and credibility. This studio (and optional workshops) will enable students to work with both digital and physical drawings and models.

Notes: Students are expected to purchase course supplies at campus store

ARCH-280-01 - Architectural Studies - 2011-2012

(Fall) Topics in Architectural Studies: Issues in Sustainability: Adaptive Reuse

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This architectural studio will look at the issue of sustainability through the lens of the adaptive reuse of buildings and sites. Digital modeling tools will be introduced to allow for a holistic approach and evaluation of design proposals. Solutions will look to preserve older buildings while layering into them new programs with new (and used) materials. Digital fabrication methods will be investigated and juxtaposed against traditional construction techniques to evaluate the environmental impact of both.

Prerequisites: so,jr,sr. At least one semester of architectural studio (Architectural Studies 205 or equivalent); exposure to "Rhinceros" software preferred but not required

Notes: Studio Fee \$60. Additional material fees apply.

(Fall) Introductory Seminar in Art History: Early Modern Art

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar

This seminar explores the extraordinary variety of objects that commemorated love, marriage, fertility, and eroticism in fifteenth and sixteenth-century Europe. We will consider works ranging from the loftiest representations of Platonic love down to the frankly sexual, from paintings to prints to painted marriage chests, including objects that can be seen firsthand in the Mount Holyoke College Art Museum. Students will refine their skills of visual and verbal analysis, while also learning to interpret these works through the lens of social history, paying particular attention to the role of women.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 202-01)

Some of the best feature-length films of the past century have commanded our attention and imagination because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the

present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: *Broken Blossoms*, *Battleship Potemkin*, *Citizen Kane*, *Contempt*, *The Bicycle Thief*, *Ugetsu*, *Rear Window*, *Woman in the Dunes*, *The Marriage of Maria Braun*, *Days of Heaven*, and *Moulin Rouge*.

(Fall) Gods and Mortals: Myth in Ancient Art and Literature - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Classics 211)

Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.

(Fall) The Hellenistic World: From Alexander to Cleopatra - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Greece and imperial Rome. Yet the period in the Mediterranean from the death of Alexander the Great in 323 BCE to the Roman conquest of Egypt in 31 BCE saw the creation of some of the greatest masterpieces of ancient art, the development of formal art criticism, and the mass production of art for private enjoyment. The course addresses the new themes and purposes of art in a cosmopolitan culture that, in many respects, was not unlike our own.

(Fall) Renaissance Art

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This survey outlines the history of painting, sculpture, architecture, and urbanism in fifteenth- and sixteenth-century Italy, a time of major artistic and cultural transformation. To trace these developments, we will take a geographic approach, focusing on cities and societies in order to understand the diverse social networks that linked artists with their patrons and publics. We will also examine the expanding networks of cross-cultural contact that linked Italian cities like Florence, Rome, and Venice to places throughout western Europe and beyond.

(Fall) Building the Modern Environment: Architecture 1890-1990

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course traces the different paths of painting, sculpture, and photography in the United States and, less so, Western Europe since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?

(Fall) Issues in Art History: Storytelling in Ancient Art

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The aim of the course is to acquaint students with visual modes of storytelling in the predominantly oral cultures of ancient Greece and Rome. Myths and legends appear in a range of media (sculpture, mosaic, fresco, lamps, and gems) and contexts (domestic, sacred, political). Which stories were represented and what do we know about their reception among ancient viewers? Original objects in the Mount Holyoke College Art Museum will offer case studies.

(Spring) Issues in Art History: Ancient Painting and Mosaic

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The course treats the themes, techniques, and contexts of painting and mosaic in the ancient Mediterranean. From Bronze Age palaces to early Byzantine churches, surfaces were embellished with frescoes, pebbles, glass and jewels. These might be rendered in complex geometric shapes or with mythological scenes. Portable vases displayed elegantly drawn figures. We will examine the unique effects of each medium and how they influenced and interacted with each other.

(Spring) Issues in Art History: American Modernisms, 1900-1929

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course explores the diversity of modern art in early twentieth-century America. As new technologies and ideologies transformed the political, economic, and social fabric of the country, changes in the arts were equally rapid and as dramatic. The course examines the competing and often conflicting ideas and styles of the American avant-garde against the background of more conservative movements of the era. Robert Henri, Georgia O'Keeffe, Man Ray, Charles Demuth, and Edward Hopper are among the artists to be discussed.

Prerequisites: soph, jr, sr, or permission of instructor

(Fall) Issues in Art History: Egyptian Art and Egyptomania - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Why do we need the past, and how do we engage with it? In ancient Egypt, the past had power, and patrons, sculptors, and builders drew from earlier generations for inspiration. In the modern West, ancient Egypt holds a unique fascination. Recurring waves of artists and architects have taken up Egyptian motifs for their own sensibilities. The course examines ancient monuments and visual motifs in their original context as well as their appropriation in subsequent centuries, including our own.

Prerequisites: soph, jr, sr, or permission of instructor

(Spring) Topics in Art History: Current Issues in Latin American Art

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course highlights recent scholarship and criticism written in and about Latin America, focusing upon visual culture from 1520 to the present. Among the works we consider: colonial paintings and urban planning, representations of Frida Kahlo and Karl Marx, Brazilian film, contemporary photography, and museum exhibitions. Of particular interest will be the theoretical and methodological issues that characterize writing on visual culture from the 1990s to the present, and the ways they challenge our response to the question "What is Latin American art?"

Prerequisites: at least one 200-level course in art history or one 200-level course in Latin American anthropology, government, history, film or literature. Reading knowledge of Spanish useful, but not required.

(Fall) Great Cities: Paris-Paradise: The Medieval City and Its Transformation - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In 1323, Jean of Jandun wrote that Paris "seems to have received from the Most-High the role of the earthly paradise." Using medieval eyewitness accounts and descriptions, surviving monuments, and graphic records, this seminar will explore the transformation of Paris from a small twelfth-century town into Europe's most important metropolis by 1300. We will then consider the metamorphosis of medieval Paris into a modern capital in the nineteenth century paying particular attention to representations of the city by painters, writers, and, most recently, filmmakers.

(Spring) Seminar in Art History: Who Owns the Past?

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The seminar examines the heated status of antiquities today in light of their discovery, collecting, and display from the Roman empire to the present. Special attention is paid to war booty, to the purposeful destruction and effacement of monuments, and to ongoing struggles over excavation and cultural property. Students will engage with original objects in the college art museum and research original donors of objects in the archives.

Prerequisites: jr, sr, or permission of instructor

Instructors: B. Bergmann

(Fall) Seminar in Ancient Art: The Unearthed Cities of Vesuvius - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Life on the Bay of Naples came to an abrupt halt in 79, when Vesuvius erupted, preserving surrounding cities and villas with lava and ash. The rediscovery of Pompeii and Herculaneum since the eighteenth century had significant impact upon European art and literature. The seminar examines the surviving environment and artifacts created to Roman tastes in the late republic and early empire. It considers the history of archaeological and art historical methods and the romantic visions of art, theatre, and film up to the present. One highlight will be a visit the Pompeii exhibition at the National Gallery in Washington, DC.

Prerequisites: courses in art history, classics, or ancient history or per permission of instructor.

Instructors: B. Bergmann

ARTH-320-01 - Art History - 2011-2012

(Fall) Seminar in Medieval Art: Chartres Cathedral - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar will explore Chartres Cathedral, its architectural history, its vast programs of sculpture, and its stained glass narratives. The church and its imagery, which took shape between ca. 1140 and 1250, offer a view back in time to medieval religious beliefs and practices, social dynamics, architectural technology, and fashion. We will also consider how differing views of the cathedral—as a popular communal creation or as the embodiment of an oppressive elite—reflect modern interpretive perspectives.

Prerequisites: jr, sr, 8 credits in art history or medieval studies

Instructors: M. Davis

Expected enrollment: 15

(Fall) Seminar in Baroque Art: Gianlorenzo Bernini: Practices, Works, Ideas - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines the painting, sculpture, and architecture produced by the seventeenth century's most influential multimedia artist. It puts Bernini's innovations in the context of the political, religious, and artistic debates of his day, closely examining the Roman society that Bernini dominated during the reigns of three different popes, as well as the France of Louis XIV where Bernini briefly lived and worked. Topics include:

workshop practices and preparatory works; ephemeral creations (festive and theatrical); antiquity and modern invention; the aesthetic of marvel; the myth of the artist; and the legacy of Bernini's "bel composto."

Prerequisites: jr, sr; 8 credits in art history or permission of instructor

(Spring) Seminar in Baroque Art: Art and Architecture of Rome

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Rome was--and remains--a most complex and magnetic city, one that has endured and become "eternal" through countless transformations to its urban and artistic fabric. The focus of this seminar is a particularly intense period of change in Rome--when artists, architects, and intellectuals flocked to the city, bringing traditions from elsewhere that mixed freely with the work of others, while responding to what was already present. More than a survey of famous works in Rome, this course aims to conjure some of the excitement of a city that considered itself the most fashionable and vibrant place in the world.

Prerequisites: jr, sr; 8 credits in art history or permission of instructor

Instructors: J. Maier

(Spring) Seminar in Twentieth-Century Art: Shudders!: Photography Goes Public

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar will explore the explosion of photography in 1930s America. The decade's photography is often epitomized by the heartrending images of the Great Depression, of social concern, of the traumas experienced by the poor and displaced. But in fact the period also witnessed photography's extraordinary vitality and new visibility, in the colorful pages of Life magazine and the tabloids, on the walls of MOMA, in experimental photobooks, at Photo League exhibitions, and much more. Among the major figures to be studied are photographers as diverse as Walker Evans, Weegee, and Aaron Siskind.

Prerequisites: One 200-level courses in Art History; jr,sr,or permission of instructor

Instructors: A. Lee

Expected enrollment: 12

ARTH-350-01 - Art History - 2011-2012

(Fall) Seminar in American Art: The Gilded Age

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines aspects of American art and culture from the Civil War to the turn of the twentieth century. Classes will be thematic, and art will be linked up with ideas, trends, events, and novels of the period. Among the themes to be treated are: naturalism, masculinity, nervousness, street culture, and reform. Key artists include Sargent, Eakins, Homer, Bellows, and Sloan.

Prerequisites: jr, sr, 8 credits in art history, or permission of instructor

(Spring) Seminar in American Art: The Architecture of Frank Lloyd Wright - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar will explore Frank Lloyd Wright's 60-year career in architecture. We will pay particular attention to ways in which he handled form, space, and structure to frame human activity and to create a modern American style. We will also explore the social implications of Wright's approach to domestic design and community planning.

Prerequisites: jr, sr; 8 credits in art history, architectural studies, or American studies, or permission of instructor

Instructors: M. Davis

Expected enrollment: 15

ARTH-360-01 - Art History - 2011-2012

(Fall) Seminar in Asian Art: Photography in India

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Explores the way photography seized hold of the imagination in India. Nineteenth-century documentary photographs of Indian ruins memorialized the reach of the British Empire when used for dioramas, panoramas, and magic lantern shows on the streets of London. By the twentieth century, manipulated photographs and mechanically reproduced "photos" of Indian gods complicated photography's claim to truth. Students will debate scholarly views and develop research projects to examine photography's imaginative uses in India.

Prerequisites: jr, sr, with 8 credits in art history, or film studies, or permission of instructor

Instructors: A. Sinha

Expected enrollment: 18

(Spring) Seminar in Asian Art: Bollywood: A Cinema of Interruptions - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 370-01)

How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a "constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.

Prerequisites: jr, sr, 8 credits in art history, or film studies, or permission of instructor.

(Fall) First Year Sanskrit I - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement

Preamble (for topics courses): Asian Studies 110f-111s, 120f-121s, 130f-131s and 141f-142s satisfy the Mount Holyoke College language requirement. Students who have had previous training in Arabic, Chinese, Japanese, and Sanskrit and wish to continue their studies should arrange for placement in appropriate courses by contacting Mr. Jiyad for Arabic, Ms. Nemoto for Japanese, Ms. Wang for Chinese, and Ms. Peterson for Sanskrit.

Introduction to Sanskrit, the classical language of India. Related to other Indo-European languages (including English) and the ancestor of most of the sixteen major Indian languages (e.g., Hindi), Sanskrit is the medium of the literary classics, and of the texts of the Hindu, Buddhist, and Jain religions. The first-semester course covers Sanskrit grammar. The emphasis is on sentence construction, recognition and production of grammatical forms, and translation. Attention is also given to script, chanting, and pronunciation. The goal is proficiency in reading sentences and sustained passages in Sanskrit, in preparation for reading authentic texts in the second semester.

(Spring) Androgyny and Gender Negotiation in Contemporary Chinese Women's Theater

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Taught in English; Gender Studies 204-03(s))

Yue Opera, an all-female art that flourished in Shanghai in 1923, resulted from China's social changes and the women's movement. Combining traditional with modern forms and Chinese with Western cultures, Yue Opera today attracts loyal and enthusiastic audiences despite pop arts crazes. We will focus on how audiences, particularly women, are fascinated by gender renegotiations as well as by the all-female cast. The class will read and watch classics of this theater, including *Dream of the Red Chamber*, *Story of the Western Chamber*, *Peony Pavilion*, and *Butterfly Lovers*. Students will also learn the basics of traditional Chinese opera.

(Spring) The Great Epics of India: Representations and Interpretations

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking-intensive; Taught in English)

The epics *Ramayana* and *Mahabharata* are sacred texts of Hinduism and are rendered in oral, written, and dramatic forms in all the languages of India and Southeast Asia. Focusing primarily on the *Ramayana*, students have the opportunity to explore the epic narrative's aesthetic, religious, and cultural historical dimensions in its many manifestations, including the Sanskrit text (fifth century BCE), women's ritual songs, Tulsidas's medieval Hindi version, the Ramlila play, Kathakali dance, the television serial, and the political version of the Hindu communalists in the 1990s. All readings are in English.

(Fall) Hinduism

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Religion 261f)

In this thematic and historical introduction to the major religious tradition of India, Hinduism is explored in its various expressions, including texts (Ramayana, Bhagavad Gita), myths and gods (Krishna, the Great Goddess), philosophy, rites, art, worship, and popular practice. The roles of key religious figures (Shankara, Mirabai), movements (Bhakti), techniques (yoga), institutions (guru, caste, women's rites), and concepts (karma, dharma) are studied in their cultural contexts, and with reference to issues of gender, class, and agency. Extensive use of audiovisual material.

(Spring) Gandhi, Tagore, India and the World - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Taught in English)

Mahatma Gandhi's method of nonviolent action (Satyagraha) won freedom for India from British rule and inspired movements worldwide. Poet Rabindranath Tagore won the Nobel prize and international acclaim through his writings, educational initiatives and advocacy for peace. Gandhi and Tagore's lives, their critiques of nationalism and violence, and their holistic philosophies are studied through their writings, autobiographies and other sources. Topics include Gandhi's impact on Martin Luther King, Tagore's international school, and a comparison of the two men's legacies for India and the world.

(Fall) Learning Chinese through Newspapers

Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement

(Speaking- and writing-intensive)

This course advances students' four communication skills (reading, writing, listening, and speaking) by studying materials selected from the news media. The teaching materials include news reports on political, social, economic, and cultural issues, mainly from mainland China, Taiwan, and the U.S. The course will lay a good foundation for those who wish to read Chinese newspapers. This course also addresses issues of formal expression, writing styles, and terminology used in the Chinese media. The course will be conducted mainly in Chinese.

(Fall) Asian History: Tokugawa Japan - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 331)

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

A research seminar on Japan's transformation from a chaotic set of warring states (mid-sixteenth century) into a highly urbanized, literate, cultured but nonetheless feudal state capable of leaping into the modern world (late nineteenth century). Topics will include economic evolution; the development of tea ceremony, fiction, poetry, and theatre; political and social change, including class/status relations; evolution of gender roles; and the rise of the three great cities (Edo, Kyoto, Osaka). After a core of common readings and research exercises, students will design and undertake individual projects, using primary and secondary sources, and complete a substantial essay.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement (Speaking- and writing-intensive; Taught in English; Gender Studies 333f-03)

A seminar on the eighteenth-century Chinese masterpiece *The Story of the Stone* and selected literary criticism in response to this work. Discussions will focus on love, gender-crossing, and women's supremacy and the paradoxical treatments of these themes in the novel. We will explore multiple aspects of these themes, including the sociopolitical, philosophical, and literary milieus of eighteenth-century China. We will also examine this novel in its relation to Chinese literary tradition in general and the generic conventions of premodern Chinese vernacular fiction in particular.

(Fall) Mars: Missions, Conditions, and Prospects for Habitation

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking- and writing-intensive)

Exploration of Mars is a goal of the current U.S. president and a dream of many citizens. We will examine what needs to be done before anyone sets foot on the Red Planet. We will consider the history and politics behind Martian exploration, our knowledge of geology and atmospheric conditions on Mars based on data from current missions, and plans for future exploration.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

In addition to attending the Astronomy 100 lectures, students will take part in a 4th hour in which we will discuss current frontiers in modern astronomy and astrophysics. Although this 4th hour is somewhat tailored to the interests of the enrolled students, anticipated topics include Einstein's Theories of Relativity, Death of Massive Stars, Black Holes and Warped Spacetime, and the Expanding Universe. Using readings and discussion we will examine the nature of these mind-boggling discoveries and their treatment in the popular media.

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Exploration of several unresolved questions about the Red Planet, such as 1) Where was the water on Mars and where did it go? How well will future missions answer this question? 2) How has the Martian atmosphere evolved over time? 3) What rock types are present on the Martian surface based on meteorite studies vs. direct observation? 4) How can geomorphic features of Mars best be interpreted, and what do they tell us about the evolution of the planet? and 5) Was there life on Mars at any time? Is there life on Mars at present, and if so, where? An interactive seminar with students and faculty reading current papers from the literature as well as daily reports from current mission Web sites.

(Writing-intensive)

Are we alone in the universe? The essence of that question has likely been a source of inspiration since the dawn of humanity. We will look at the history of extraterrestrial debate and analyze the transdisciplinary science behind astrobiology. We will investigate the properties of life as we know it and extrapolate their properties to consider the potential for simple life forms to exist on Mars and elsewhere in our solar system, to the possibility of intelligent life on habitable planets near distant stars, and finally the implications of extraterrestrial life to life on Earth. Assessments will include critical reading and writing about scientific literature on this topic.

First-year seminar (Writing-intensive)

Water, the ideal solvent in which life-granting reactions occur, makes up 70 percent of the planet and our body. We will examine the remarkable chemical, physical properties of water that sustain life, and study its involvement in two critical biochemical processes: cellular respiration and photosynthesis. We are running out of this precious resource, due to population expansion, unsustainable usage of water by industrialized societies, pollution of waterways, and the redistribution of water due to engineering, climate change, and commerce. Steven Solomon's book, *Water: The Epic Struggle for Wealth, Power and Civilization* (2010), will inform our discussions.

BIOCH-311-01 - Biochemistry - 2011-2012

(Fall) Protein Biochemistry and Cellular Metabolism

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Biological Sciences 311f, Chemistry 311f)

This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways (catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.

BIOCH-330-01 - Biochemistry - 2011-2012

(Spring) Topics in Biochemistry and Molecular Biology

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature.

Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation in the form of oral presentation is expected.

BIOL-145-01 - Biological Sciences - 2011-2012

(Fall) Introductory Biology: Nature Harmoniously Confused

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

First-year seminar

Most organisms are notably unlike ourselves--a tapestry of bacteria, protozoans, algae, and, off by themselves, the plants, fungi, and other animals. We will survey the whole range of organisms, especially those in the ponds and forests of our campus. Labs will start in the field, offering many opportunities for wet or muddy work. The class is addressed to students intrigued by natural history; it might be useful for students interested in further study of the environment.

(Spring) Introductory Biology: Biology in the Age of the Human Genome Project

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

First-year seminar (Writing-intensive)

The Human Genome Project is leading to great advances in our understanding of the human body and in our ability to manipulate our own genetic information. We will focus on the science behind the Human Genome Project, and the ways in which it will change our lives. This course will also serve as a general introductory biology course for biology majors as well as nonmajors.

BIOL-145-02 - Biological Sciences - 2011-2012

(Fall) Introductory Biology: Comparative Vertebrate Physiology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course will explore the structure and function of major physiological systems in vertebrate animals. Of particular interest will be identifying the solutions that different animals have evolved to deal with similar problems (e.g., how do fish gills and bird lungs function in gas exchange?).

(Spring) Introductory Biology: Evolution, Physiology, and Behavior of Animals

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course covers some fundamental biological concepts to understand how and why animals behave the way they do. We study the principles of evolution by natural selection, how neurons work at the cellular level, how hormones influence development and behavior, and how individual animals fit into their larger populations and communities. We will bring together these principles to understand how behavior allows animals to find food, avoid predators, and attract mates. Field and laboratory exercises will include quantitative analysis, observation, and experimentation.

(Fall) Introductory Biology: A Green World

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

First-year seminar

This course examines the plant life in the woods and fields around us, the exotic plants in our greenhouses, and the plants we depend on for food. We will study plants living in surprising circumstances, settling into winter, escaping from gardens, reclaiming farmland, cooperating with fungi and insects, and fighting for their lives. We will find that plants challenge some conventional, animal-based assumptions about what matters to living things. In labs, students will seek to answer their questions about how plants grow in nature, by studying plant structure and function, ecology, and evolution.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar (Writing-intensive)

How are animal bodies built to deal with living on earth? In this course we will study the function of cells, organs, and organ systems that have evolved to help animals make their way through the physical and chemical environment. We'll consider the common needs of animals--needs such as feeding, breathing, and reproducing--and the diverse solutions they have devised. A range of life, from unicellular organisms to animals with backbones (including mammals) will be considered.

BIOL-160-01 - Biological Sciences - 2011-2012

(Fall) Integrated Introduction to Biology and Chemistry

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This 8-credit course serves as a gateway to both the biology and chemistry core curricula. The course introduces and develops fundamental concepts in chemistry while also exploring the diverse range of strategies adopted by living systems to survive in different environments. This course prepares students for further study in chemistry (Chemistry 201) and/or biology (Biology 200). Students must register for both Biology 160 and Chemistry 160 as well as a single lab section (listed under Chemistry 160L). Recommended for students interested in completing pre-health requirements or advanced study in biochemistry or neuroscience.

Prerequisites: fy
Notes: Students must co-enroll in Biology 160 and Chemistry 160 for a total of 8 credits; three 50 minute lectures, three 75 minute lectures, and one three-hour laboratory per week.

BIOL-220-01 - Biological Sciences - 2011-2012

(Spring) Cell Biology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course undertakes an integrated study of the processes and structures that define life at the cellular level. We will consider the molecular and supramolecular organization of membranes, cytoskeleton, and organelles in the context of the physical and chemical principles governing their assembly, and their participation in phenomena such as the capture and transformation of energy, catalysis, transport, motility, signal transduction, and maintenance of cytoplasmic organization. The laboratory portion of this course illustrates and analyzes these phenomena through selected optical and biochemical approaches.

BIOL-223-01 - Biological Sciences - 2011-2012

(Fall) Ecology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course will cover the fundamental factors controlling the distribution and abundance of organisms, including interactions with the abiotic environment, fitness and natural selection, population growth and dynamics, species interactions, community dynamics, and diversity. We will address variation across space and time. The course will combine observational, experimental, and mathematical approaches to some of the applications of ecological theory, including conservation, disease dynamics, and biological control.

BIOL-301-01 - Biological Sciences - 2011-2012

(Spring) Regenerative Medicine: Biology and Bioethics

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

What is regenerative medicine? What is the science that drives new medical therapies using stem cells? We will study the biology of adult, embryonic, and induced pluripotent stem cells, as well as the legal, ethical, and moral implications of using these cells in medical therapies. Each member of the class will participate in a staged debate on these issues for an introductory biology class. Pending funding, we may travel to Washington, D.C. to attend a Commission on Bioethics meeting.

(Spring) Behavioral Ecology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Writing-intensive)

In this course, students learn to view and understand animal behavior within an evolutionary context. The mechanistic side of behavior is investigated and students explore how behavioral traits originate and evolve over time. Students will integrate their knowledge of how organisms work with an appreciation of why they work the way they do. At the end of the course, students will understand basic concepts in behavioral biology and know many of the experiments that have facilitated our understanding of this field. They will be able to construct hypotheses and design experiments that address behavioral phenomena. The laboratory portion of this course is based on individual projects.

(Fall) Conference Course: Extreme Life

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course will focus on biological systems that push the limits of structural and physiological possibility. For example, midges flap their wings at up to 1000 Hz; bar-headed geese migrate over Mount Everest; deep-sea fish withstand pressures near 300 atmospheres; certain frogs can allow their body temperatures to drop below 0 degrees C. Through readings and discussions we will explore the diverse mechanisms that underlie how organisms reach extreme levels of performance and survive in extreme environments.

(Spring) Conference Course: The Biology of Neurological Disorders - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

The course will present an overview of basic anatomical, biochemical, cellular, and physiological concepts applicable to neuronal cells, through discussion of the major neurological disorders affecting human population today. We will examine the impact of developmental abnormalities, chemical imbalance and injury on complex motor, behavioral, and cognitive processes. Students will analyze primary literature and present current data on possible causes and mechanisms underlying neurological and degenerative disorders. Cell death, protein dysfunction and alterations in neurotransmission will be some of the topics covered, as well as regeneration and other potential cures.

Prerequisites: Biological Sciences 220; preference given to juniors and seniors

Instructors: P. Sacchetti

Expected enrollment: 12

BIOL-321-B - Biological Sciences - 2011-2012

(Fall) Conference Course: Advanced Topics in Vertebrate Structure and Function

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course will take a comparative approach to examine the diverse structure and function found within vertebrates. Why can an eagle fly, but not an ostrich or a dog? Focus will be placed on understanding the specializations in skeletal, muscular, and sensory systems within the context of the ecology and behavior of the organism. These topics will be approached with the ultimate goal of understanding the evolutionary significance of vertebrate diversity. The course will include discussions of examples from the primary literature, comparative dissections, and observation of prepared specimens.

Prerequisites: two courses above Biological Sciences 200

Instructors: L. Macesic

Expected enrollment: 12

(Spring) Conference Course: Sexual Selection and Sexual Conflict in Animals: Theory, Research, and Feminist Critique

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive; Gender Studies 333f-08)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Sexual selection theory explains how selection on traits that allow individuals to attract potential mates or defeat potential rivals can lead to the evolution of sexual dimorphism. Sexual conflict theory investigates how the conflicting interests of males and females in mating interactions can result in the co-evolution of traits for manipulation and resistance. Feminist critics point out how these theories reflect and in turn propagate stereotypes about human behavior. This course explores classic and current biological literature on sexual selection and sexual conflict alongside feminist critiques of the language use, the assumptions, and the interpretation of research in these fields.

BIOL-321-C - Biological Sciences - 2011-2012

(Fall) Conference Course: Art, Music, and the Brain

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musical dissonance and consonance are biologically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.

Prerequisites: seniors with at least 8 credits at the 200 level in biology, neuroscience and behavior, studio art, art history, or music

Notes: students studying art and music are encouraged to enroll

Instructors: S. Barry

Expected enrollment: 10

BIOL-321-C - Biological Sciences - 2011-2012

(Spring) Conference Course: Marine Conservation Biology

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This seminar is based entirely on published research related to issues in marine conservation biology. It will introduce students to the latest research by leading scientists in ocean science and is highly relevant to current pressing concerns about global environmental change. The focus on primary literature and student-led discussions will help students improve their abilities to read, analyze and discuss primary literature. Those progressing to graduate school in the next year or two will feel more confident in delving into the literature surrounding their research interests and in discussing published findings and current ideas with colleagues.

Prerequisites: Biological Sciences 223 or 226

Instructors: R. Brodie

Expected enrollment: 12

BIOL-321-D - Biological Sciences - 2011-2012

(Fall) Conference Course: Response to Environmental Contaminants and Evolution: Communicating the Science to the Public

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive; Environmental Studies 321)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

It is essential for scientists to communicate their findings to the public. Students will learn the basic concepts of toxicology--the study of chemical contaminants--and they will consider how toxicity is both a product and a selective force in the evolution of particular groups of organisms. They will research particular toxicants--their chemistry, physiological effects in different kinds of organisms, and the environmental and evolutionary contexts for varying susceptibilities and responses. Their findings will be the basis of articles written for online publication in the Encyclopedia of Earth, a freely available, expert-reviewed collection of articles written in non-technical language.

Prerequisites: 8 credits from environmental studies, chemistry, biochemistry, biological sciences, or geology; or permission of instructor

Instructors: E. Monosson

Expected enrollment: 16

BIOL-321-D - Biological Sciences - 2011-2012

(Spring) Conference Course: The Cytoskeleton in Cell Growth and Motion

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Cell shape, division, motion and function all depend on cytoskeletal elements and their associated proteins. Rapid and sensitive image acquisition coupled with new methods of labeling the cytoskeleton and a constantly changing set of microscopic techniques have transformed the way we can watch, measure and manipulate actin and microtubules. This course will focus on reading and critiquing the current research on both plant and animal cytoskeleton. We will consider cell division, cell motility, polarized growth and intracellular transport. We will also review recent developments about prokaryotic cytoskeleton which will lead to discussions of the evolution of the eukaryotic cytoskeleton.

Prerequisites: Biological Sciences 220

Instructors: C. Rounds

Expected enrollment: 24

BIOL-321-E - Biological Sciences - 2011-2012

(Fall) Conference Course: Mechanisms of Hormone Signaling

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

What are the molecular mechanisms by which hormones direct cellular processes? In this seminar course, we'll read and discuss the primary literature to look in depth at the nature of chemical communication between cells. We will study hormones, receptors, and signal transduction pathways, and the ways in which these signaling systems regulate development, programmed cell death, inflammatory responses, and other biological processes.

Prerequisites: Biological Sciences 210 and 220

Instructors: C. Woodard

Expected enrollment: 12

BIOL-321-F - Biological Sciences - 2011-2012

(Fall) Conference Course: Molecular Physiology of the Cell

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

DNA and protein are just part of what makes a cell alive; without the compartments, membranes and chemical gradients of the cell they could do nothing. In this course we will explore the ways molecular biology informs our understanding of cell physiology. The course will include in-depth

discussions of protein trafficking, membrane transport, cell motility, membrane potential and respiration. We will also cover cell structure and the implications of the endosymbiotic events that have led to the eukaryotic cell's form. The laboratory section of the course will include the use of molecular techniques and fluorescence microscopy in several different cell types.

(Spring) Conference Course: Emerging Infectious Diseases - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

What is the current state of infectious disease in the world? What are the important factors that favor the emergence or re-emergence of specific infectious agents? In this course the primary literature will be used as a foundation for discussing global emerging and re-emerging infectious diseases. As a group we will discuss the science behind these diseases and their therapies as well as some of the social aspects relevant to the present-day spread of infectious disease. Students will be expected to work in collaborative groups to present background material and original research findings relevant to these pathogens and the diseases they cause.

Prerequisites: Biological Sciences 319

Instructors: S. Stranford

Expected enrollment: 12

BIOL-321-H - Biological Sciences - 2011-2012

(Spring) Conference Course: Topics in Invasion Ecology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Invasive species have become a common focus for land managers and gardeners around the world, but is there anything fundamentally new, different, or threatening about these organisms? These new arrivals potentially increase local biodiversity and offer excellent examples of evolution and ecological interactions, but they also incite scientists to uncharacteristic value judgments. We will discuss the science and politics behind invasive species and explore the secrets of their success and the realities of their impacts. This course uses local examples, some field trips, and current literature to examine invasion ecology and other local issues in conservation biology.

Prerequisites: 8 credits above Biological Sciences 200 with Biological Sciences 223 or 226 or ES200

Instructors: M. Hoopes

Expected enrollment: 16

BIOL-321-I - Biological Sciences - 2011-2012

(Spring) Conference Course: Acquired Immune Deficiency Syndrome Seminar - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

What is our current understanding of HIV-induced AIDS? What factors favor disease progression or resistance? Are there new therapies or vaccines in the pipeline? In this course, the primary literature will be used as a foundation for discussing the global picture on AIDS and current research. As a group we will discuss the science behind this immune deficiency causing virus, therapies, research priorities and new vaccine strategies. We will also touch on the social, economic and political situations that influence rates of HIV infection and disease progression. Students will be expected to work in small groups to present background material and original research.

(Spring) Comparative Biomechanics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Physics 222)

The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of

animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through biomechanical analyses.

(Spring) Theory and Application of Conservation Biology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course focuses on advanced ecological theory applied to conservation. Class will combine lectures and discussions of primary scientific literature. Labs will include field trips to collect observational and experimental data and indoor exercises to explore the concepts of rarity, coexistence, and population viability with mathematical models. A community-based learning aspect is possible for the final project in this class.

Prerequisites: Biological Sciences 223 or 315; or Biological Sciences 226 with permission of instructor; or Environmental Studies 200 with permission of instructor

(Fall) First-Year Seminar: Forensic Science - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking- and writing-intensive)

This course will offer an introduction to the science in forensic investigations. We will explore several methods and instruments often used in CSI programs, such as mass spectrometry, infrared spectroscopy and DNA analysis, which are very valuable in evaluating crime scene evidence. We will explore the validity of scientific findings and the political implications of the use and availability of the data. Students will have a chance to be expert witnesses and be in the lab evaluating evidence. Analytical thinking and processing information in chemistry, biology, and other sciences will be emphasized, as well as oral and written communication skills. Short labs are planned.

CHEM-304-01 - Chemistry - 2011-2012

(Spring) Advanced Organic Chemistry Laboratory

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

This half-semester course, starting after spring break, applies and builds upon the techniques and tools of synthetic organic chemistry acquired during previous laboratory classes. Experiments will be selected to provide exposure to contemporary synthetic methods, to offer examples of the application of sophisticated reagents, to afford practice in modern separation and purification approaches, and provide scope for hands-on acquisition of Nuclear Magnetic Resonance (NMR) spectra.

Prerequisites: Permission of instructor and Chemistry 302 as prerequisite or co-requisite

Notes: second half of semester

Instructors: D. Hamilton, K. McMenimen

Section Instructors: 01 LAB | 02 LAB | 03 LAB |

Expected enrollment: 20

CHEM-304-02 - Chemistry - 2011-2012

CHEM-306-01 - Chemistry - 2011-2012

(Spring) Methods of Measurement - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

We will discuss analytical techniques which are currently applied in chemical, environmental, and medical science. These techniques include: chromatography including GC and LC spectroscopy (UV-Vis, FT-IR, AA, fluoremetry, and NMR), surface science and mass spectrometry. Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.

CHEM-308-01 - Chemistry - 2011-2012

(Fall) Chemical Thermodynamics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.

Prerequisites: Chemistry 201, Chemistry 202, Mathematics 101, Physics 103 and 204, or 115 with grade of C or better

Instructors: M. Gomez
Section Instructors: 01 LAB H Jayathilake | 02 LAB H Jayathilake |
Expected enrollment: 32

CHEM-311-01 - Chemistry - 2011-2012

(Fall) Protein Biochemistry and Cellular Metabolism

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Biochemistry 311f; Biological Sciences 311f)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

CHEM-314-01 - Chemistry - 2011-2012

(Spring) Nucleic Acids Biochemistry and Molecular Biology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Biochemistry 314s; Biological Sciences 314s)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

CHEM-317-01 - Chemistry - 2011-2012

(Spring) Principles of Polymer Chemistry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.
Prerequisites: Chemistry 302
Notes: offered once every three years
Instructors: W. Chen

CHEM-325-01 - Chemistry - 2011-2012

(Spring) Atomic and Molecular Structure

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.
Prerequisites: Chemistry 201, Chemistry 202, Mathematics 202, Physics 216, Chemistry 308 with grade of C or better
Instructors: M. Gomez
Section Instructors: 01 LAB M Gomez | 02 LAB H Jayathilake |
Expected enrollment: 20

CHEM-334-01 - Chemistry - 2011-2012

(Spring) Advanced Inorganic Chemistry

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.
Prerequisites: Chemistry 302 and either: Chemistry 325 in the past or taken concurrently with this course.
Notes: offered every other year
Instructors: D. Cotter
Expected enrollment: 15

CHEM-336-01 - Chemistry - 2011-2012

(Spring) Organic Synthesis - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.
Prerequisites: Chemistry 302

Notes: offered every other year

Instructors: D. Hamilton

Expected enrollment: 20

CHEM-337-01 - Chemistry - 2011-2012

(Spring) Physical Organic Chemistry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.

Prerequisites: Chemistry 302, 308

Notes: offered every other year

Instructors: S. Browne

Expected enrollment: 35

CHEM-339-01 - Chemistry - 2011-2012

(Fall) The Organic Chemistry of Biological Pathways - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course explores the underlying organic chemistry of biological pathways and thereby seeks to build a framework for understanding biological transformations from the perspective of mechanistic organic chemistry. Beginning with common biological mechanisms, and drawing parallels with their sophomore organic chemistry counterparts, a broad overview will be constructed of the pathways by which the key classes of biological molecules--lipids, carbohydrates, amino acids, nucleotides--are manufactured, modified, and consumed. Several specific biosyntheses will also be dissected from a mechanistic perspective. These case studies will include antibiotics, an alkaloid, and heme.

Prerequisites: Chemistry 302

Instructors: D. Hamilton

Expected enrollment: 20

CHEM-343-01 - Chemistry - 2011-2012

(Spring) Chemistry of DNA

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

This advanced-level seminar will focus on the molecular properties of DNA. Using as sources a graduate-level text and readings from the primary literature, the class will discuss a variety of current topics in the research community, including the binding of proteins and small molecules to DNA, the covalent modification of DNA by mutagenic agents, and the dynamic nature of DNA across timescales. Critical analysis of experimental design and conclusions from data will be encouraged. Students will be evaluated based on participation in discussions, oral presentations, and an original research proposal.

Prerequisites: Chemistry 302 and one additional 300-level chemistry course

Instructors: M. Nunez

Expected enrollment: 12

CHEM-345-01 - Chemistry - 2011-2012

(Fall) Physical Biochemistry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course introduces the fields of biophysical chemistry and molecular biophysics, where biological systems are probed and described by physical techniques and models. Topics will include the physical properties of biological molecules (proteins, nucleic acids, carbohydrates, and lipid membranes); applications of spectroscopy to biological systems, both *in vitro* and *in vivo*; the mechanisms of light harvesting and energy conversion; and technological developments inspired by biological systems. Lecture sessions (two per week) will be complemented by a weekly discussion of papers from the contemporary literature.

Prerequisites: Chemistry 302 required; Chemistry 212, Biochemistry 311 or Biology 220 recommended, or permission of instructor

Instructors: The department

CHEM-399-01 - Chemistry - 2011-2012

(Fall) Comprehensive Seminar

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.

Prerequisites: sr

Notes: Credit/No Credit grading only

Classics

CLASS-106-01 - Classics - 2011-2012

(Fall) Tragedy Ancient and Modern

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive)

This course will examine the conventions of tragedy in the ancient Greek theater and their influence on modern American drama. Readings will include representative plays from the three celebrated ancient Athenian dramatists, Aeschylus, Sophocles and Euripides, and from the moderns, Eugene O'Neill, Tennessee Williams, and Arthur Miller. Tragic forms and themes in *The Book of Job* from the Hebrew Bible will provide a further interesting point of comparison.

Prerequisites: fy or permission of instructor

Instructors: B. Arnold

Expected enrollment: 16

CLASS-127-01 - Classics - 2011-2012

(Fall) Ancient Greece - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 127f)

This course will trace the emergence and expansion of Greek civilization in the Mediterranean. From the philosophical parlors of Athens to the martial gymnasias of Sparta, the Greek city-states developed diverse political systems, social structures, and cultures. Alexander the Great then exported this legacy across the Near East. Among the themes of the course will be Greek thought, social relations, encounters with Near Eastern peoples, especially Persians and Jews, and the incorporation of the Greek world into the Roman empire. Sources will include works of classical Greek literature, as well as the more mundane insights of inscriptions, papyri, and archaeology.

Instructors: R. Payne

Expected enrollment: 35

CLASS-128-01 - Classics - 2011-2012

(Fall) Ancient Rome

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 128)

A survey of the political, social, and cultural history of Rome from the Republic to the Empire, down to the early fourth century and the rise of Constantine. We shall strive to recreate the entire experience of the peoples of the Roman Empire and those who came in contact with it as it rose to become the dominant power in the Mediterranean. Topics include their history, war, trade and technology, religion, republican government and imperial administration, slavery, economics, and the Roman family. Sources include Polybius, Sallust, Livy, Suetonius, Tacitus, Seneca, Plutarch, and others.

Instructors: J. Moralee

Expected enrollment: 40

CLASS-211-01 - Classics - 2011-2012

(Spring) Gods and Mortals: Ancient Greek and Roman Myth - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

We will accompany Odysseus on his return from Troy, retrieve the Golden Fleece with Jason, and race with Ovid through his witty--and often troubling--retelling of Greek myths from a Roman perspective. This course examines how Greek and Roman authors and artists from very different periods used myth to explore questions about life, art, and politics. Works include: Homer, *Odyssey*; Apollonius of Rhodes, *Argonautica*; Ovid, *Metamorphoses* and *Heroides*; Greek tragedy, and ancient images representing myths.

Notes: Optional screenings of films related to ancient myth.

Instructors: P. Debnar

CLASS-225-01 - Classics - 2011-2012

(Spring) Athenian Democracy and Its Foes

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(History 225)

Democracy first took root in Athens in the late sixth century BCE and flourished, with only brief interruptions, until the city came under the power of Macedon in the latter part of the fourth century BCE. This course will trace the development of Athenian democracy and examine such topics as citizenship; the role of women, the family, and non-citizens in Athens; the legal system; education; and public entertainment. It will also compare democratic Athens with Sparta, its antithesis in the classical period. Sources will include Herodotus, Thucydides, Aristophanes, Plato, Aristotle, Demosthenes, and others.

Instructors: P. Debnar

Expected enrollment: 20

CLASS-260-01 - Classics - 2011-2012

(Fall) Knowing God - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines the following key texts from the ancient world that treat significantly the problem of knowing God and the mystery enveloping such knowledge: Sophocles' *Oedipus the King*, Plato's *Phaedo*, Cicero's *Concerning the Nature of the Gods*, *Job*, Paul's *Epistle to the Romans*, and others. Attention is also given to the different ways of thinking about the divine and human natures in these works, which are broadly reflective of Graeco-Roman and Judaeo-Christian value systems.

Notes: may satisfy either Humanities I-A or I-B requirement

College Courses

COLL-101-01 - College Courses - 2011-2012

(Spring) Introductory Seminar: Stressed Out

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking-intensive)

We've all been there. Each of us carries a deep physical understanding of what its like to be under stress. But what are the evolutionary and biological underpinnings of this experience? How and why do our bodies respond to stress in such a characteristic way? And what is the impact of this biological response on health and disease? Through reading and discussion, we'll explore the biology of stress, the brain's ability to link the outer and inner worlds, the organ systems whose activity is altered by the stress response, and emerging research on the impact of long-term stress on memory, immune function, cardiovascular health, and cancer risk.

COLL-115-01 - College Courses - 2011-2012

(Spring) Global Challenges: Development in Crisis

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Team-taught by faculty from the Departments of Economics, Environmental Studies, History, International Relations, Politics, and Sociology.

In the current globalization process, economic development faces a triple crisis: exclusion of hundreds of millions of people, an environmentally unsustainable growth pattern, and lack of structural transformation. In this team-taught course, we will analyze the reasons for the triple crisis and explore policy solutions that lead to democratization of development, to an increase in the well-being of half the world's population without jeopardizing the sustainability of the natural environment, and to a transformation of the economic structure. The course leads up to a two-day conference on the same topic which brings together leading authorities from around the world.

Notes: The course starts on Jan 24 and ends on March 6 after the March 2-3 conference on the same topic, which students are required to attend. The course counts as credit in Economics, International Relations and Politics

Instructors: E. Paus, T. Farnham, S. Khan, C. Corson, V. Ferraro, H. Hanson, M. McKeever, J. Western

(Fall) Western Civilization: An Introduction through the Great Books - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

First-year seminar (Writing-intensive)

Beginning with works emerging from Athens and Jerusalem and proceeding to the modern world, this course will explore the prominent ideas of Western civilization. The course material will be centered on the Great Books from across disciplinary boundaries and will include authors such as Dante, Darwin, Homer, Nietzsche, Plato, Shakespeare and the writers of the Old and New Testaments.

Prerequisites: fy or permission of instructor

Instructors: J. Hartley

Expected enrollment: 16

COLL-210-01 - College Courses - 2011-2012

(Spring) Ready for the World: Preparing for Your Internship and Research Project

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is designed for students embarking on summer internships and research projects. It focuses on the connections students will make in the world beyond Mount Holyoke College. The course will examine the work of organizations, take account of the particular social situations in which students find themselves, analyze social dynamics in interpersonal and professional interactions, explore interviewing techniques for research and other modes of communication, and learn about organizational priorities and ethical guidelines. Students are expected to keep a journal of their readings and activities and participate fully in each session. Those thinking of doing an internship/research project in summer 2012 should register for this course.

Notes: Class will meet 7-10pm on: March 12; March 26; April 2; April 9; April 16. The last day to drop the course without any record is 3/23 by 11:59pm via email to registrar@mtholyoke.edu. The last day to withdraw from the course with a W or, for non-Nexus minors, to select the ungraded option is 4/9 by 5:00pm.

Instructors: R. Blatz, M. Pierson

Expected enrollment: 70

COLL-211-01 - College Courses - 2011-2012

(Fall) Tying It All Together: Curriculum to Career

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is designed for students who have recently completed summer internships and research projects to help them integrate their experience within the context of their liberal arts education and career goals. Students will apply problem-solving skills to various situations that occurred during their summer project; learn how to identify and articulate transferable skills gained during the project to potential employers and graduate schools; discuss how the experience has affirmed and/or modified their career goals; learn strategies to identify and network with individuals to advance their professional and academic development; and prepare a presentation on their internship or research project for the fall LEAP Symposium.

Notes: Meets Mondays, 7-10pm. Meeting dates: 9/12, 9/19, 9/26, 10/3, 10/17, plus day of LEAP symposium (TBA).

Instructors: P. Gill

Complex Organizations

COMOR-204-01 - Complex Organizations - 2011-2012

(Fall) Poverty in the United States - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Politics 204)

Why are so many people poor in the most affluent of all nations? Are there self-perpetuating "cultures of poverty?" Is poverty the result of economic conditions; failed government programs; discrimination; out-of-wedlock births; inadequate parenting; divorce; poor schools; poor health; poor housing; defects of intelligence or moral character? We will examine conflicting explanations of poverty and potential remedies from a variety of political perspectives, and analyze public assistance laws, Medicaid, and tax policies. Students will participate, in small groups, in an off-campus community-based learning project collaboratively designed with community partners, the instructor and the CBL program. Spanish language skills preferred.

Instructors: J. Fox, C. Pyle

Expected enrollment: 20

COMOR-205-01 - Complex Organizations - 2011-2012

(Spring) Financial Accounting

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions. A basic knowledge of arithmetic (+, -, *, /) and a familiarity with a spreadsheet program is suggested. See <http://www.mtholyoke.edu/courses/cljohnso>.

Prerequisites: so, jr, sr

Instructors: S. Schmeiser

(Fall) Individuals and Organizations

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Psychology 212f)

This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual's own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.

(Fall) Winners and Losers: Taxation, Social Justice, and Economic Choices

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking-intensive; Politics 225)

The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.

(Fall) Ethical Issues in Complex Organizations - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Philosophy 232s)

There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory and current events

(Spring) An Introduction to Computer Science

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to basic computer science concepts and issues with a focus on HTML and JavaScript programming. Additional topics will be chosen from: origins of computers, computer architecture, assemblers and compilers, digital logic, the Internet, and artificial intelligence. Laboratory assignments will offer some experience with programming and the use of application software.

Notes: students should NOT take this course after Computer Science 101

(Fall) Problem Solving and Object-Oriented Programming

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Computers are used every day for an enormous variety of tasks, from playing games and chatting with friends to transferring billions of dollars, delivering radiation treatments, and controlling the electrical grid. Computer programs are an essential ingredient in allowing for this great diversity of applications. In this course, you will learn to create your own programs, based on core programming concepts and analytical problem solving approaches. You will develop dynamic programs by first using Adobe Flash CS4 and AS3 (ActionScript 3), the technology behind many Web applications. The last portion of the course will teach you Java, a very popular modern programming language. We assume no prior study of computer science. Programming intensive.

(Fall) The Computer Science Revolution Is Here

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

First-year seminar

Social software such as Facebook and Skype and mobile devices like smartphones and iPads have revolutionized personal computing in recent years. In this course we will look at issues surrounding this revolution in personal computing, such as privacy and free speech. We will also look at how computing is revolutionizing other disciplines, e.g., medicine, assistive technology for the disabled, and scientific research. Topics will include understanding the potential of Watson to build smarter search engines, the role of computing in drug discovery, and how countries can censor or even turn off the Internet.

(Fall) Advanced Object-Oriented Programming

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course builds on the basic programming concepts learned in Computer Science 101. Emphasis is on developing the skills needed to write more sophisticated programs. This includes strategies to aid in assuring the correctness of programs through the use of assertions and unit testing as well as advanced Java features such as inheritance, polymorphism, and network programming. We will also introduce some widely used data structures such as vectors and linked lists. This course is programming-intensive.

(Fall) Data Structures

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Using Java. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance. *This course is programming intensive.*

(Fall) Software Design

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Building large software systems introduces new challenges to software development. Appropriate design decisions early in the development of large software can make a major difference in developing software that is correct and maintainable. In this course, students will learn techniques and tools to help them address these problems and develop larger software projects, improving their skills in designing, writing, debugging, and testing software. Topics include design patterns, UML, designing for maintainability, software architecture, and designing concurrent and fault tolerant systems. Programming intensive.

(Fall) Theory of Computation

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.

Prerequisites: Computer Science 101,102(aka 201) and Mathematics 232

COMSC-312-01 - Computer Science - 2011-2012

(Spring) Algorithms

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

How does Mapquest find the best route between two locations? How do computers help to decode the human genome? At the heart of these and other complex computer applications are nontrivial algorithms. While algorithms must be specialized to an application, there are some standard ways of approaching algorithmic problems that tend to be useful in many applications. Among other topics, we will explore graph algorithms, greedy algorithms, divide-and-conquer, dynamic programming, and network flow. We will learn to recognize when to apply each of these strategies as well as to evaluate the expected runtime costs of the algorithms we design.

(Spring) Software Practicum - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Tired of writing programs that nobody ever uses? Then, this is the course for you. Software enables enterprises to carry out previously tedious or impossible tasks, but many organizations lack the resources to develop needed software. You will apply your programming skills to develop and deliver software to meet the requirements of a client from the community. You will learn critical communication skills required to work with a client, work as a team with classmates, and experience the software lifecycle from requirements elicitation through delivery. You will synthesize many topics learned in courses as well as new technologies required to complete the project. Programming intensive.

COMSC-322-01 - Computer Science - 2011-2012

(Fall) Operating Systems

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. *This course is programming intensive.*

(Spring) Computer Graphics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The creation of pictorial images using a computer. Topics include drawing of two- and three-dimensional scenes using OpenGL and other graphical environments; transformations of objects (translations, scalings, rotations, shearings) using homogeneous coordinates; creating perspective in three-dimensional drawing; algorithms for enhancing realism and visual effect; and the mathematical underpinnings of graphic design. Students will complete a number of graphics projects based on readings and class discussion. *This course is programming intensive.*

(Spring) Intelligent Information Retrieval - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Introduces the basic concepts, methodologies, and research findings in information retrieval. Special topics include Web searching, cross-language retrieval, data mining, and data extraction. Completion of this course will provide the necessary foundation to work in today's business environment where competitive advantage is obtained by retrieving needed information.

Prerequisites: Computer Science 211

Instructors: L. Ballesteros

(Spring) Topics: Robotics and HCI - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This is a seminar-based course, drawing on a combination of traditional lectures, student presentations and projects. We will cover core robotics and HCI (Human Computer Interaction) concepts, with additional topics directed by student interest.

Prerequisites: Computer Science 211 Data Structures, Math 232 Discrete - Recommended: CS 312 Algorithms, Math 211 Linear Algebra

Instructors: A. St. John

Expected enrollment: 20

COMSC-341-02 - Computer Science - 2011-2012

(Spring) Topics: Computational Geometry in Video Games - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Developing video games is an exciting and challenging domain, involving many areas of computer science, such as graphics, artificial intelligence and robotics. In this course, we focus on the geometric problems that arise in video game programming. Due to the expensive computations often demanded by current video game technology, efficient algorithms are required that not only satisfy speed requirements, but result in realistic user experiences. Topics will include standard problems from computational geometry, such as triangulation of 2-D and 3-D objects, point detection and visibility.

Prerequisites: Computer Science 211 Data Structures, Math 232 Discrete - Recommended: CS 312 Algorithms, Math 211 Linear Algebra

Critical Social Thought

CST-100-01 - Critical Social Thought - 2011-2012

(Fall) First-Year Seminar: War and Memory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive; Taught in English; German Studies 100, European Studies 100)

How do nations, groups, and individuals remember war? We explore the conflicting narratives of war that emerge at memorial sites, in museums, in film and other visual media, and in oral testimony. With an emphasis on case studies of actual national and transnational controversies arising out of competing versions of the past by the multiple participants in war, we investigate the impact of war in the last century up to the present for defining national, ethnic, gender, and racial identities; for establishing responsibility and rendering justice; and for remembering the dead. Cases focus on the remembrance of WW II and its legacies in Germany, Japan, and the U.S.

Prerequisites: fy

(Fall) First-year Seminar: Self and Political Thought

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Writing-intensive; Politics 100f(02))

What is the relationship between personal experience and political thought? How do political thinkers grasp and convey the connections between self and political order? Our first-year seminar will probe the links between heart and mind in political philosophy by exploring the lives and writings of illustrative figures who together span the history of political thought. Texts will include memoirs and fiction as well as abstract theoretical works

(Fall) First-year Seminar: What Is Performance?

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Theatre Arts 150 (02))

What's the difference between acting and being, and how does the idea of "performance" structure this difference? How do we "perform" our own identities, and how do we interpret the performances of others? This seminar offers a basic introduction to performance studies, an exciting new discipline through which everyday life, ritual behaviors, and artistic practices are studied. Perspectives from the arts, humanities, and social sciences will be explored using both textual and performative approaches. This is a speaking-, reading-, and writing-intensive class that includes innovative individual and group exercises.

Prerequisites: fy or permission of instructor

Instructors: E. Rundle

Expected enrollment: 14

CST-100-04 - Critical Social Thought - 2011-2012

(Fall) First-Year Seminar: Goodbye, Conventional Wisdom

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive; European Studies 100 (01))

One of the hallmarks of a liberal arts education is to draw on a broad base of knowledge in order to interrogate common assumptions. No one exemplifies this critical approach better than French philosopher Michel Foucault. One of the most influential thinkers of recent times, Foucault revolutionized several academic disciplines and even questioned the very notion of a discipline itself. He did so by revealing the history and transformations of ideas now viewed as self-evident. This first-year seminar invites students to develop similar analytical skills. Following Foucault's lead, the course pays special attention to preconceptions about government, freedom, identity, and sexuality.

CST-248-01 - Critical Social Thought - 2011-2012

(Spring) Science, Revolution, and Modernity

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Introduces critical analysis of science and technology by tracing the historiography of the Scientific Revolution. The significance of this extended intellectual episode has been assessed in radically different ways throughout the intervening centuries. As such, it provides a fertile ground on which to pose and answer important questions about science and its role in society. What does it mean to regard science as 'revolutionary'? How are scientific developments shaped by, and how do they shape, the social, economic, and political worlds in which they are embedded? How is our contemporary understanding of science and technology influenced by the stories we tell about the past?

CST-250-01 - Critical Social Thought - 2011-2012

(Fall) Introduction to the Philosophy of Religion

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Philosophy 226fs, Religion 226)

An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, Fyodor Dostoyevsky, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.

Instructors: J. Grayson

(Spring) Twentieth-Century Theory and Its Discontent: Psychoanalytic Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking-intensive; Psychology 225)

An introduction to the contested terrain of psychoanalytic theory, which has so hugely influenced twentieth-century thinking. Reading widely across Freud's work and that of his colleagues, we will situate key ideas--repression, desire, masochism, neurosis, sublimation, etc.--within a range of interpretive frameworks. Our goal will be to analyze the varied implications of psychoanalytic theory for contemporary thinking about individuals and society.

Prerequisites: so, jr, sr. One prior course in either Psychology or CST

(Fall) Art and Politics: Histories of Performance I

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Theatre Arts 251)

A survey of world performance history, including: the evolution of human language and consciousness; the rise of oral, ritual, and shamanic performance; religious and civic festivals; and imperial theatre practices that position the stage at the dangerous intersection of religious worship, public taste, royal patronage, and government censure. Understanding performance as both artistic practice and social institution, this course emphasizes the role performance has played in changing audiences and as a cultural and political force in various societies. We explore not only how performances were created--in terms of design, dramaturgy, architecture, and acting--but also for whom, and why.

(Spring) Art and Politics: Histories of Performance II

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Theatre Arts 252 (01))

A historical survey of dramatic texts and world performance traditions from the seventeenth to the twentieth centuries, with attention given to: the influence of print culture on early modern theatrical movements; the rise of nationalism and the creation of dramatic genres; and the effects of industry and technology on experimental modernist forms. Understanding performance as both artistic practice and social institution, this course emphasizes the role performance has played in changing audiences and as a cultural and political force. As such, we explore not only how performances are created--in terms of design, dramaturgy, architecture, and acting--but for whom, and why.

(Spring) Critical Race Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(African American and African Studies 208)

This course examines the discursive relationship between race and law in contemporary U.S. society. Readings examine the ways in which racial bodies are constituted in the cultural and political economy of American society. The main objective is to explore the rules and social practices that govern the relationship of race to gender, nationality, sexuality, and class in U.S. courts and other cultural institutions. Thinkers covered include W.E.B. DuBois, Kimberle Crenshaw, Derrick Bell, and Richard Delgado, among others.

(Spring) Introduction to Postcolonial Theory

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 254)

Postcolonial theory probes the centrality of colonialism and imperialism to modernity, and examines vital forms of anticolonial insurgency as models for critiques of domination and hegemony. This course will explore these imperatives from Marxist, poststructuralist, feminist, and psychoanalytic perspectives, paying particular attention to nationalism, the state, globalization, identity, and alternative political formations in the context of empire. Theorists read will include Lenin, Fanon, Spivak, Lloyd, Rose, and Chakrabarty.

(Fall) Human Agency and Historical Transformation: Pivotal Moments in the Development of Capitalism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Economics 204, History 301)

This seminar examines evidence and theories on the origins, development, and dynamics of capitalism and the modern state. We shall focus on the transition to (agrarian) capitalism in early modern England, the industrialization of production in nineteenth-century Europe and the United States, and the political and economic crisis of the 1930s depression. As we ask how fundamental changes in human communities come about, we shall consider the relative contributions of individual agency and social determination to the creation of a world so many now regard as either natural or inevitable.

CST-350-01 - Critical Social Thought - 2011-2012

(Fall) Seminar in Critical Social Thought

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

A seminar for CST seniors in which they present their independent research, respond critically to one another's work, and lead discussion. In support of that research, this course will explore the history of critical method, from the Enlightenment through 20th-century critical theory and post-colonial studies. Every student will produce a substantial essay on a question in the broad field of social thought. Students will present their work publicly and cultivate agility in speaking, arguing, and writing.

Prerequisites: Critical Social Thought sr; other jr and sr with permission of instructor

Notes: seniors who intend to write a thesis must take 4 credits of Critical Social Thought 395 in the fall, in addition to this course

Curricular Support Courses

CUSP-100-01 - Curricular Support Courses - 2011-2012

(Spring) Engaging the Pioneer Valley: Community-Based Learning (CBL) Theory and Practice

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Community-based learning course)

This course will equip students to enter communities effectively and responsibly as learners, researchers, volunteers, and citizens. Successful community-based learning depends on familiarity with communities and methods to study and assess conditions in them, and on familiarity with the history, politics, policies and practices of campus-community partnership. Students will analyze and interact with nonprofit and civic organizations, issues, and leaders to refine personal interests and skills for social justice advocacy. Students will identify and prepare to address critical needs and opportunities via community partnerships through readings, discussions, panel sessions and assignments.

Notes: Note: For students entering the College in Fall 2008 or later, there is a 12-credit limit on curricular support and non-liberal arts courses that may be counted towards the 128 credits required for graduation. (Students who entered before Fall 2008 have a limit of one non-liberal arts course, and no limit on Curricular Support courses.)

Instructors: A. Bloomgarden

Expected enrollment: 40

CUSP-102-01 - Curricular Support Courses - 2011-2012

(Fall) Community-Based Learning: Networks, Reflection, and Meaning

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

(Community-based learning course)

Community-based learning that effectively develops civic leaders and engages purposefully in community development requires students to develop networking, reflection, and analytic practices. Readings on civic engagement, discussions and exercises will advance campus and community networks, writing and oral reflection on field experiences, and information-sharing so students will better understand themselves and communities. This course is designed to facilitate learning and impact for CBL Program student staff pursuing concurrent fellowships and mentorships. Students in C.A.U.S.E. leadership, off-campus work-study, and independent study positions may also enroll by permission.

Prerequisites: For current CBL Fellows. For students entering the College in Fall 2008 or later, there is a 12-credit limit on curricular support and non-liberal arts courses that may be counted towards the 128 credits required for graduation. Students who entered before Fall 2008 have a limit of one non liberal arts course, and no limit on Curricular Support courses.

CUSP-103-01 - Curricular Support Courses - 2011-2012

(Spring) Integrating Learning, Service, and Social Action

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

(Community-based learning course)

Connecting community-based learning to social justice advocacy requires experience with asset-based community analysis, and skills for project planning, implementation, and assessment. Students will develop logic models for social change and participate in exercises and reflections that enhance their capacity to support organizational community partnership development. This course is designed to facilitate learning and impact for CBL Program student staff pursuing concurrent fellowships and mentorships. Students in C.A.U.S.E. leadership, off-campus work-study, and independent study positions may also enroll by permission.

DANCE-377-01 - Dance - 2011-2012

(Fall) Advanced Studies: Twentieth-Century American Dance: Sixties Vanguard to Nineties Hip-Hop

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This survey of twentieth-century American dance moves from the sixties—a decade of revolt and redefinition in American modern dance that provoked new ideas about dance, the dancer's body, and a radically changed dance aesthetic—to the radical postmodernism of the nineties, when the body continued to be the site for debates about the nature of gender, ethnicity, and sexuality. We will investigate how the political and social environment, particularly the civil rights/black power movement, anti-war/student movement, and the women's movement, with its proliferation of feminist performance works, informed the work of succeeding generations of dance artists.

Instructors: C. Hill

DANCE-387-01 - Dance - 2011-2012

(Fall) Rhythmic Analysis II: Performance - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A continuation of Dance 287. The focus now shifts specifically to performance and the notation of complex rhythmic structures. Working as an ensemble, the class will create a music/dance suite, using body music, movement, vocal work, and music visualization as our inspiration. Emphasis will be placed on odd and mixed meters and rhythmical accuracy. Students will contribute both movement and musical material. Class time will be run like a professional rehearsal. Outside work will focus on musical research, choreography and music notation. This suite will be performed at Blanchard Campus Center at a date to be determined.

Prerequisites: Dance 287

Instructors: P. Jones

A topical coverage of development economics used in conventional textbooks does not do justice to the evolution of integrated thinking in the field. A topical organization also does not do justice to the topic linkages or to the important debates in the field. This course adopts a history of macro development economics thought approach with an emphasis on alternative approaches right up to the current debates. While the field started in the 1940s, the influence of classical economists and Marx on the pioneering development economists and the field will also be traced.

Is Mount Holyoke a school or a business? Is the institution one sees today what Mary Lyon had in mind in 1837? This course will look at the development of U.S. higher education from upstart colonial colleges into a multi-billion dollar industry. We will look closely at the tension between education mission and market forces, and how the interaction between academe and society has played out from the founding of the republic through women's rights, the world wars, and 60s counterculture. We will touch on a range of contemporary topics such as access and affirmative action, standardized testing, athletics, and e-learning. Mount Holyoke will serve as a recurring case study.

About 1900 the "New Woman" emerges in social, political, and literary representations. In contrast to 19thc. "True Womanhood"--wife and mother at home--New Women pursued education and employment that propelled them into the public sphere. Our readings tell of larger cultural issues: suffrage, citizenship, immigration, Jim Crow segregation, urbanization, nativism. Many texts present multiple, conflicting images of the New Woman. From diverse backgrounds the New Woman symbolized different things to different people. These competing definitions offer insight now, a century later. Were the concerns in 1900 all that new, or simply understood anew? Does "new" mean progress--then or now?

Mary Wollstonecraft once wrote that the key for women to enlarge their minds was to err and "frequently go astray." This course will explore how many writers plot their stories and poems around all types of mistakes, errors, or missteps both intentional and accidental. We will discuss what kinds of knowledge about the self and the world the fall into error might offer, how we know when we've made mistakes, and what kind of change or

redemption is possible in the wake of these discoveries. Readings may be drawn from Milton, Rousseau, Coleridge, Mary Shelley, Austen, Christina Rossetti, as well as a few contemporary writers.

Who decides which categories are available for defining one's sense of self? How do categories themselves complicate our ability to make sense of who we are and our place in the world? How do stark binaries such as "Black/White," "Man/Woman," or "American/Foreigner" prove problematic for those who find themselves somewhere in between, or indeed outside of, these imagined worlds? In this course we will consider how authors in the United States have used fiction writing and memoir to answer questions about mixed, marginalized, or unacknowledged identities; in doing so, we will explore how language itself paradoxically creates and challenges available labels.

This course will investigate the role of women's spoken voices in the public sphere. We will begin with speeches from the nineteenth and twentieth centuries in the United States, but will then consider a global arena in the present day. How have women used speech to achieve particular social and political aims? What role does gender play in a speaker's rhetorical choices and the audience's reception? In what ways is a speaker's experience with gender contingent upon other identity markers, such as race, class, sexuality, or religion? We also will consider our own voices as public texts, developing confidence in and concrete strategies for effective persuasive speaking.

ENGL-101-08 - English - 2011-2012

(Fall) Seminar in Reading, Writing, and Reasoning: Portraits of the Self

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This writing- and speaking-intensive course focuses on conceptions of self, moments of vital self-realization, acts of daring and transformative self-creation. We will consider how portraits of the self are shaped by environment, audience, and perspective, as well as by class, era, race, gender, and religion. Our materials will include fiction, film, paintings, poetry, essays, and autobiographies, and feature works by writers such as Charles Chesnut, Rita Dove, Charlotte Perkins Gilman, Langston Hughes, Edna St. Vincent Millay, Pablo Neruda, and Henry David Thoreau.

Prerequisites: fy (soph, jr, and sr may inquire if there is space available during the first two weeks of class)

Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This course will look at how the question "Who am I?" has formed works of literature. We will investigate how identity is formed or not formed by forces such as society, circumstance, and family. We'll examine body image, race, gender, class, personal voice, perception, and ancestry. Course material will be drawn from poetry, fiction, drama, memoir, and film, including Maxine Hong Kingston's *The Woman Warrior* and Shakespeare's *As You Like It*, as well as shorter readings by Emily Dickinson, Adrienne Rich, Dorothy Allison, Alice Walker, Zora Neale Hurston, and Jamaica Kincaid. Students will have the opportunity to explore themselves, both as individuals and as writers.

The Western fascination with the East is at least as old as Greek tragedy. From Troy and Persia then to India in the eighteenth century to the Middle East now, the worlds the West has conquered have, paradoxically, revealed to it the limits of its own political, philosophical, and literary practices. We will study both the Western writing that has defined itself against the East (Greek tragedy, eighteenth-century Orientalism, contemporary European philosophy) and the non-Western texts that have nonetheless deeply influenced it (*The Thousand and One Nights*, Hafiz, Arabic poetry, etc.).

In this class we will use pictures of mythological characters and scenes as inspiration for a series of exercises which focus on the different components of creative prose: description, characterization, dialogue, point of view, scene, and dramatic action. We will also devote a week to reading and writing poetry based on mythic themes. The exercises will serve as a basis for a flight into your own myth-making, and the final result will be a complete short story that reflects both your engagement with myths of the past and the creation of a "mythic" world that is entirely your own.

ENGL-205-01 - English - 2011-2012

(Spring) Playwriting

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Writing-intensive; Theatre Arts 283)

This course offers practice in the fundamentals of dramatic structure and technique. Weekly reading assignments will examine the unique nature of writing for the theatre, nuts and bolts of format, tools of the craft, and the playwright's process from formulating a dramatic idea to rewriting. Weekly writing assignments will include scenework, adaptation, and journaling. The course will culminate in the writing of a one-act play. Each class meeting will incorporate reading student work aloud with feedback from the instructor and the class. Students will listen, critique, and develop the vocabulary to discuss plays, structure, story, and content.

Prerequisites: an English writing course, one course in theatre arts, or permission of instructor

Notes: lab fee \$10, may be re-taken at 300 level with permission of instructor

Instructors: S. Oswald

(Spring) Introduction to British Literary and Cultural Studies since 1660: Culture and Society: 1798-1900 - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course offers a broad study of selected figures in modern literary and intellectual history and helps prepare students for more advanced classes in British and/or postcolonial studies. We will use these figures to probe the dynamic relationship between imaginative practice and social change, which may involve global as well as national contexts. This course will introduce students to writing sustained pieces of critical analysis, challenging them to explore the theoretical relationship between literary form and historical transformation in the modern period.

This course will examine a number of major literary texts from the *Lyrical Ballads* of Wordsworth and Coleridge through Conrad's *Heart of Darkness*.

The focus will be on major poets and novelists of the period, but we will also consider some nonfiction prose writers as well. The course will be particularly concerned with the literary response to social change such as the migration from the country to the city, the rise of industry, the situation of women, and the legacy of imperialist expansion.

Prerequisites: soph, jr, sr

Notes: meets English department 1700-1900 requirement

Instructors: W. Quillian

Expected enrollment: 20

ENGL-230-01 - English - 2011-2012

(Spring) Victorian Detective Fiction

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Victorian detective literature was popular entertainment at the same time that it took on the anxieties and hopes of its historical moment, including those around capital, otherness, authority, domesticity, and theories of knowledge. Through historical readings and current theory, we will examine the double work of this literature. Arthur Conan Doyle and his institution Sherlock Holmes will provide a focus through which we will read influences and afterlives, which may include works by Wilkie Collins, Dickens, Poe, R.L. Stevenson, Hawthorne, and Georges Perec, as well as television and film adaptations and the fanaticism of steampunk.

Prerequisites: 4 credits of English or permission of instructor

Notes: meets English department 1700-1900 requirement

Instructors: J. Pyke

Expected enrollment: 25

ENGL-231-01 - English - 2011-2012

(Fall) British Romanticism: Revolution and Reaction

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This class will examine the ways Romantic-era writers figured revolution and the reaction against it, in the wake of the French Revolution's spectacular but failed promises of liberty, fraternity, and equality for all. We will pay special attention to how British writers envisioned their own versions of freedom and equality, extending them to women, slaves, and the poor. Likewise we will explore how this project for social change was necessarily related to revolutions in language and aesthetics. Authors may include Burke, Wordsworth, Coleridge, Smith, Barbauld, Blake, Austen, Keats, Percy and Mary Shelley, Byron, and Hemans.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: meets English department 1700-1900 requirement

Instructors: K. Singer

Expected enrollment: 20

ENGL-233-01 - English - 2011-2012

(Fall) Introduction to Queer Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course introduces students to the social and political contexts mediating nonnormative gender and sexual expression since the nineteenth century. In our examination of queer epistemological genealogies and methodologies, we will also consider the value of queer theory as a subjectless analysis as opposed to a queer of color critique that calls into question the sedimentation of a white, male, North American queer identity with global pretensions.

Prerequisites: soph, or permission of instructor

Instructors: I. Day

ENGL-235-01 - English - 2011-2012

(Spring) Modern British Poetry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This introduction to modern British poetry pays special attention to the emergence, consolidation, and dismantling of modernist poetry and poetics. It will link this literary history with, amongst other things, the loss of faith, the two world wars, and the relationship between monumental aesthetics, utopian poetics, and totalitarian politics. Writers will include Hardy, Yeats, Eliot, H.D., and Auden.

Prerequisites: so,jr,sr; or English 200

Instructors: N. Alderman

Expected enrollment: 25

ENGL-237-01 - English - 2011-2012

(Fall) Nineteenth- and Twentieth-Century Scottish Literature

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In *The Quarry Wood*, Martha's father teaches her, "Scotland is bounded on the South by England...and on the West by Eternity." This course explores that image, tracing the relationship of Scottish literature to European history and the making of Scottish identity, understanding language and form as political actions in the creation of Scotland's national, international, and mythologized identities. Selections survey Enlightenment thought, sentimentalized Scotland (the Kailyard school), grim "realism," modern novels, and contemporary fiction, and may include Hume, Smith, Scott, Burns, Barrie, Stevenson, MacDiarmid, Gibbon, E. Muir, W. Muir, Shepherd, Kelman, television, and film.

Instructors: J. Pyke

ENGL-239-01 - English - 2011-2012

(Fall) Novels of the Later Eighteenth Century: Worthy Hearts and Saucy Wits

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 204f(02))

Eighteenth-century England witnessed the birth of the novel, a genre that in its formative years was both lauded for its originality and condemned as intellectually and morally dangerous, especially for young women. We will trace the numerous prose genres that influenced early novelists, including conduct manuals, epistolary writing, conversion narratives, travelogues, romance, and the gothic. In doing so, we will concomitantly examine the novel's immense formal experimentation alongside debates about developing notions of gender and class as well as the feeling, thinking individual. Authors may include Richardson, Fielding, Sterne, Walpole, Burney, and others.

Prerequisites: soph, jr, or sr

Notes: meets English department 1700-1900 requirement

Instructors: K. Singer

Expected enrollment: 25

ENGL-239-01 - English - 2011-2012

(Spring) Literature of the British Isles: From Virtue Rewarded to a Vampire's Kiss: Epistolarity in Eighteenth- and Nineteenth-Century Fiction

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this course we will track the evolution of the epistolary form from the mid-eighteenth century through the end of the nineteenth. How does this format function differently in a sensation novel of the 1860s than, say, an epistolary novel of the 1740s? What elements of literary and cultural history have assisted in effecting this change? Authors may include Jane Austen, Anne Brontë, Fanny Burney, Wilkie Collins, Charles Dickens, Choderlos de Laclos, Samuel Richardson, and Bram Stoker.

Instructors: E. Meadows

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A continuation of English 240, which explores the diversity of writers and literary forms that arose in U.S. society in the period from the Civil War to World War I. Authors may include Alcott, Chopin, Crane, Dreiser, Dunbar, Dunbar-Nelson, DuBois, Sui-Sin Far, Gilman, Harper, James, Jewett, Stein, Twain, Wharton, and Whitman. Will address the development of realism and naturalism, and the beginnings of modernism, and explore literary redefinitions of race, gender, sexuality, and class as shaped by social and economic pressures during this era.

Prerequisites: soph, or permission of instructor

Notes: meets English department 1700-1900 requirement

Instructors: E. Young

Expected enrollment: 25

ENGL-243-01 - English - 2011-2012

(Fall) American Gothic

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 220f-01)

An examination of the gothic--a world of fear, haunting, claustrophobia, paranoia, and monstrosity--in American literature and culture, with an emphasis upon issues of race and gender. Topics include the gothic; gothic sexuality; Southern, Northern, and national gothic; freakishness and grotesquerie; and visual gothic. Focus on fiction, with some film and photography. Authors and artists may include Alcott, Arbus, Browning, Crafts, Crane, Dunbar, Dunn, Faulkner, Gilman, Hawthorne, McCullers, Morrison, O'Connor, Oates, Parks, Poe, and Romero.

Prerequisites: soph, jr, sr, English 240 or 241 recommended

ENGL-250-01 - English - 2011-2012

(Fall) African American Literature

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This course offers an introduction to the literary works of African Americans from the late-eighteenth century to the present, with an emphasis on poetry and fiction. Beginning with slave narratives and early poetry, we will consider issues of genre, literary traditions, and historical context while gaining experience in reading and analyzing literary texts. We will examine how authors consciously went about creating a literary tradition that mirrored, challenged and created a dialogue with the American canon.

Prerequisites: soph, second-semester fy with permission of instructor

Instructors: G. Pemberton

Expected enrollment: 25

ENGL-251-01 - English - 2011-2012

(Spring) African American Literature II

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This course will examine the major African American writers of the twentieth century, beginning with the poetry and prose of Paul Laurence Dunbar and ending with the fiction of Toni Morrison, John Wideman, and the poetry of Yusef Kouranyaka, Rita Dove, and others. We will discuss the strategies involved in the creation of a "black voice" and its relationship to Anglo-American literature. We will also consider the nature of literary influence along with the attempts, by some writers, to create a distinct "black aesthetic." Finally, we will discuss the difficulties black authors encounter in asserting the literary over the sociological among readers of all intellectual and social strata.

Prerequisites: English 250

Instructors: G. Pemberton

Expected enrollment: 25

ENGL-253-01 - English - 2011-2012

(Spring) African Literature

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

An introduction to African literature in English since 1960. Fiction, drama, autobiography, essays by such writers as Ama Ata Aidoo, Ayi Kwei Armah, Chinua Achebe, Buchi Emecheta, Ngugi wa Thiong'o, Chimamanda Adichie, Chris Abani, Sindiwe Magona, and Zoe Wicomb. Particular attention to themes of exile and imprisonment, political struggle before and after independence, the convergence of oral cultures and European languages, and the emergence of postcolonial and feminist discourses in contemporary Africa.

(Spring) Women Writers: Nineteenth-Century American Women Writers

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Gender Studies 204)

In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

Prerequisites: soph, second-year fy with permission of instructor

(Spring) Mapping Jewish American Generations

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Jewish Studies 276)

This course sets canonical Jewish American literature in creative dialogue with contemporary Jewish American writers, filmmakers, and performance artists to explore how early twentieth-century figures (Abraham Cahan, Anzia Yezierska, and Henry Roth) continue to influence --inspire--a rising generation of authors. The key mediating figure in this generational dialogue is Philip Roth, whose work we will examine as well. Topics to be explored include "immigrant" writing then and now; the uses of nostalgia; genealogies of standup comedy and popular culture in general; the emergence of "hipster" Judaism and its various modes of expression (above all via websites).

Prerequisites: soph; 4 credits in English, religion, Jewish studies, history, sociology, film studies

Instructors: D. Weber

ENGL-280-01 - English - 2011-2012

(Fall) Literary Criticism and Theory

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida.

Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.

ENGL-300-01 - English - 2011-2012

(Spring) Writing Historical Fiction - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

Does historical fiction offer readers something history books cannot? What obligation does the writer of historical fiction have to the verifiable facts of the past? Is history a place we can visit, or is it a living force, defining the present? Isn't there a sense in which all fiction is historical fiction? In this course we'll consider these and other questions as we read and write historical fiction. We'll go out with our shovels and teaspoons to dig in the past, unearthing the psychological atmosphere, the gossip, the voices, and the important lies that will show us the way to breathe new life into the cold, dead facts of history.

(Fall) Studies in Journalism: Digital and Multimedia Journalism

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

The fast-changing landscape of new information technologies, from the Internet to iPods, is redefining the nature and practice of journalism today. We will explore the multimedia platforms available to journalists and learn how to tell stories across these platforms. We will examine the political, sociological, legal, and ethical issues raised by these media technologies and study the impact of the Web on the traditional watchdog role of the press. Students will be asked to write a blog and stories about an event and person. They will also be asked to create a podcast and/or a slide show to be posted online. Rough drafts, rewrites and individual meetings with the professor are required.

(Fall) Old English

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A study of the language and literature of Anglo-Saxon England (ca. 450-1066 AD) in a series of graduated grammar lessons and readings of Old English poetry and prose. These will include selections from the Bible, the Venerable Bede, the *Anglo-Saxon Chronicle*, "The Wanderer," "The Dream of the Rood," "The Wife's Lament," and the Exeter Book riddles. We will also learn the 31-character Old English *futhorx* as it was preserved in "The Rune Poem" and used to inscribe verses on the Franks Casket and the Ruthwell Cross.

Prerequisites: jr, sr, 8 credits in department beyond English 101

Notes: meets English department pre-1700 requirement

Instructors: S. Harris

Expected enrollment: 15

ENGL-311-01 - English - 2011-2012

(Spring) Chaucer: Stories of Cupid's Martyrs

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Medieval Studies 300)

This course begins with a close reading of Chaucer's great love story *Troilus and Criseyde* together with *The Legend of Good Women*, taking into consideration the multiple cultural contexts a late medieval audience would have brought to both poems along with such topics as honour, love, *trouthe* and betrayal. We will conclude by comparing Shakespeare's *Troilus and Cressida* with Chaucer's work as a way of understanding the continuities and changes between a late medieval and early modern understanding of men and women in love and war.

Prerequisites: soph, jr, sr, 8 credits in English or Medieval Studies and permission of instructor; online application required

Notes: meets English department pre-1700 requirement

ENGL-312-01 - English - 2011-2012

(Fall) Shakespeare, Adapted and Interpreted

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

"The history of Shakespeare's work is the history of the European imagination." By focusing on a small group of plays (*The Tempest*, *A Midsummer Night's Dream*, *Hamlet*, and *Macbeth*), the seminar will study the post-Shakespearean adventures of Shakespeare's work in the arts of music and painting as well as in the theater and in literature. Topics will include *The Tempest* as semi-opera, *A Midsummer Night's Dream* as Victorian fairy painting, *Hamlet* as an orchestral prince, and *Macbeth* as opera; but students will be expected to pursue and report upon independent projects to be chosen from a wide and fascinating field of material.

Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 211 or permission of instructor

Notes: meets English department pre-1700 requirement; meets English department seminar requirement

Instructors: F. Brownlow

(Spring) Shakespeare: Religion, Magic, and the Shakespearean Stage

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive; Theatre Arts 312)

Religious rituals, black magic, and theatrical entertainment were linked by controversy in Shakespeare's England: were they potent acts or empty performances? How did they seduce and endanger unwitting audiences? Foregrounding the plays of Shakespeare and his contemporaries, we will explore the intersecting cultural histories of religious persecution, witchcraft trials, and movements to close down the theaters. We will consider how England's religious culture was destabilized not only by the Protestant Reformation but also by global trade and travel. Our focus will extend beyond the interpretation of simple representational allusions to grapple with the particular semiotics of theatrical performance.

Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 211 or permission of instructor

Notes: meets English department pre-1700 requirement; meets English department seminar requirement; meets Theatre dramatic literature requirement for Theatre

Instructors: J. Degenhardt

ENGL-322-01 - English - 2011-2012

(Spring) "The Silver Link, the Silken Tie": Marriage in Victorian Prose and Poetry

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this course we will explore links between social and literary forms through the motif of marriage--arguably the most important social form of Victorian England. Along the way, we will address questions of narrative form, lyric stasis, and social change. Authors may include Jane Austen, Charlotte Brontë, Elizabeth Barrett and Robert Browning, George Eliot, George Meredith, Coventry Patmore, Alfred Tennyson, and Anthony Trollope.

Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor

Instructors: E. Meadows

Expected enrollment: 18

ENGL-323-01 - English - 2011-2012

(Fall) The Victorian Novel: Realism

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 333f-08)

This course will explore the project of Realism in the Victorian novel, watching tensions between a desire for guidance and a desire for mimesis. One critic has said the Victorians brought a sense of social duty to Romantic world-awareness, creating a "duty of awareness" that was almost overwhelming for the novelist and novel. We will explore this "duty of awareness" as we investigate representations of gender, class, and feeling as structuring principles in the novel. Novelists may include Austen, Dickens, G. Eliot, Gaskell, C. Bronte, W. Collins, and Hardy. Supplementary readings in literary criticism and theory.

Prerequisites: jr, sr, 8 credits in department including English 220, 230, 236, or permission of instructor

Notes: meets English department 1700-1900 requirement

Instructors: J. Pyke

ENGL-323-01 - English - 2011-2012

(Spring) The Victorian Novel: Gender and Class - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 333)

This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as

a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

Prerequisites: jr, sr, 8 credits in department including English 220, 230, or permission of instructor

Notes: meets English department 1700-1900 requirement

Expected enrollment: 18

ENGL-325-01 - English - 2011-2012

(Fall) Victorian Literature and Visual Culture

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will examine literary texts that represent new forms of visibility in nineteenth-century Britain as well as examples of visual culture that provide a framework for reading Victorian culture in innovative ways. We will study nineteenth-century photography--portraiture, prison photography, imperial photographs, and private and popular erotic images--as well as novels and autobiographical writing that engage with new photographic technology and its transformation of the ways in which Victorians understood identity, politics, aesthetics, and representation. The course will take a similar approach to painting, literary illustration, political cartoons and caricature, and advertising.

Prerequisites: English 220 or English 323 and at least 4 credits in art history or film studies, or permission of instructor

Notes: meets English department 1700-1900 requirement; meets English department seminar requirement

Instructors: A. Martin

Expected enrollment: 15

(Spring) Romantic Epistemologies

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this seminar, we will examine Romantic poetry's unique contemplation of the problems of perception, cognition, and epistemology. We will investigate how male and female writers explored various theories of knowledge through their play with the figures of the idiot or savage, drug culture, and new technologies surrounding the Gothic genre and the virtual imagination. Authors including Wordsworth, Robinson, Coleridge, DeQuincey, and Keats will be read alongside philosophers such as Edmund Burke, Immanuel Kant, scientists John Galt and J. G. Spurzheim, and accounts of pre-cinematic entertainment such as the magic lantern and the phantasmagoria.

Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor

Notes: meets English department 1700-1900 requirement; meets English department seminar requirement

(Spring) Seminar in Modern Poetry: Hilda Doolittle, T. S. Eliot, Ezra Pound, and Mina Loy

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will chart the development of Modernist poetics from its origins at the beginning of the twentieth century to the publication of *The Waste Land* in 1922. We will focus on four poets (Hilda Doolittle, T. S. Eliot, Mina Loy, and Ezra Pound) and will chart the ways in which they interact with one another to produce experimental poetry of extraordinary force.

Prerequisites: jr, sr; 8 credits in department including English 200; preference will be given to students who have taken English 235 or English 245

(Spring) Queer Kinship in Asian North American Literature and Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Gender Studies 333)

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century, from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of national belonging.

Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor. Preference will be given to students who have taken English 274, Introduction to Asian American literature

Notes: meets English department seminar requirement

Instructors: I. Day

(Spring) American Literature III

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course explores the range and variety of American literary expression from the 1920s through the early 1940s. Topics include the role of regionalism; the emergence of a "modernist" aesthetic; ethnicity and modernism; debates within African American literary culture. Authors include Ernest Hemingway, F. Scott Fitzgerald, William Faulkner, Zora Neale Hurston, Richard Wright, Henry Roth, and Pietro Di Donato.

Prerequisites: 8 credits in English beyond 101 or permission instructor

(Fall) Studies in American Literature: Henry James on Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 380)

This seminar will examine the various screen adaptations of assorted novels by Henry James. We will read the novels against the films, exploring how James's texts translate--or do not translate-- into film. Novels and films to be studied include *Washington Square*, *The Europeans*, *Portrait of a Lady*, *The Turn of the Screw*, and *Wings of the Dove*.

Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor

(Spring) Studies in American Literature: 150 Years of American Theater

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Theatre Arts 350)

This course will move from April 1865, when Lincoln was assassinated in a Washington theater while laughing at a hugely successful British comedy, to the present day, when revivals of the classic American playtexts grace major theaters in London. We shall follow the emergence of a distinctively national drama, responding to British precedents initially, and more recently incorporating further diverse, even international, perspectives. Playwrights studied include Susan Glaspell, Langston Hughes, Eugene O'Neill, Edward Albee, Miguel Piñero, August Wilson, David Mamet, Suzan-Lori Parks, David Henry Hwang, Lynn Nottage, and Will Eno.

Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor

(Fall) Modern Urban British Novel

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

As London and the British novel enter the new millennium, both are sites of competing histories, traditions, and agendas. This course will map the city's progress from the center of an empire to a node in the global world's economy, and chart the twentieth-century novel's movement from realism to postmodernism and beyond. Beginning by contrasting the realist London of Conan Doyle's *Sherlock Holmes* with Virginia Woolf's modernist version in *Mrs. Dalloway*, we will go on to trace the development of the post-1945 British novel.

Prerequisites: jr, sr; 8 credits in department including English 200

(Fall) Studies in African American Literature: Slavery and the Literary Imagination

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive)

In this course we will study American works that focus on enslavement in America and the ways in which historical fact and literary conventions inform representations of enslaved and self-emancipated people, as well as enslavers, abolitionists, and free people of color. In what ways do race, class, region, and history influence portrayals of slavery? How do conventions of the slave narrative and sentimental novel affect the representation of slavery and freedom? Authors may include Octavia Butler, Charles Chesnut, Frederick Douglass, William Lloyd Garrison, Lawrence Hill, and Harriet Beecher Stowe.

Prerequisites: jr, sr, 8 credits in department beyond 101, including at least one of the following: English 240, 241, 250, or permission of instructor

Notes: meets English department 1700-1900 requirement; meets English department seminar requirement

(Spring) Studies in African American Literature: Race, Grace, and the Politics of Salvation in African American Writing - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive)

Our course will focus on the ways in which African American writers from the eighteenth century through today have conceptualized salvation as a spiritual, social, romantic, and political enterprise. In what ways have historical realities such as migration, enslavement, civil war, colonization, and segregation shaped literary and cultural debates about salvation and, as a result, the contrasting state of damnation? Writings by authors such as Butler, Chesnut, Douglass, Forten, Hopkins, Hurston, Naylor, Stewart, Truth, and Wheatley will inform our considerations of how salvation is imagined, problematized, and romanticized in African American writing.

Prerequisites: jr, sr, 8 credits in department beyond English 101, including at least one of the following: English 200, 240, 241, 250, or permission of instructor

(Fall) African American Literature at Midcentury

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

The Harlem Renaissance was over. The most intensive period of the Civil Rights Movement was yet to be. From the late 1930s through the 1950s, African American novelists and poets were nonetheless writing important, sometimes wonderful books. We will study the writers and their times, gauging the influence of the past and their influence on the future. Writers will include Richard Wright, Gwendolyn Brooks, Robert Hayden, William Attaway, Chester Himes, Ann Petry, James Baldwin and Ralph Ellison.

Prerequisites: jr, sr, or permission of instructor

(Spring) American Fiction: Lost and Found

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will examine a number of great literary works that are read infrequently, or not at all these days, by authors whose other work is known and by those whose names are not familiar to us. We will study these texts with an eye to their quality and significance; the literary, political, and social contexts of their publications; and their relationships to other literature. Authors will include Herman Melville, Harold Frederic, Mark Twain, Henry Roth, Flannery O'Connor, Nelson Algren.

Prerequisites: jr, sr, English 241, or other course in nineteenth- or twentieth- century American Literature

Instructors: G. Pemberton

Expected enrollment: 15

(Spring) Nature and Gender: Representations of Women and Nature in American Literature (Nineteenth-Twentieth Century)

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 333 and Environmental Studies 373)

This course will focus on portrayals of women in nineteenth through mid-twentieth century America, particularly in the context of nature and landscape. We will explore how women, often objectified in visual images of the period, appropriated established devices or developed new images and structures to represent womanhood in their own terms. Texts will include selected poetry, sketches, autobiographical essays or memoirs, short stories, novels, paintings, films, and photography.

Prerequisites: jr, sr, 8 credits from the department or permission of instructor

Notes: meets English department 1700-1900 requirement; meets English department seminar requirement

(Spring) Hitchcock and After

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 320)

This course will examine the films of Alfred Hitchcock and the afterlife of Hitchcock in contemporary U.S. culture. We will interpret Hitchcock films in a variety of theoretical frames, including feminist and queer theories, and in historical contexts including the Cold War. We will also devote substantial attention to the legacy of Hitchcock in remakes, imitations, and parodies. Hitchcock films may include *Spellbound*, *Strangers on a Train*, *Rear Window*, *Vertigo*, *North by Northwest*, *Psycho*, *The Man Who Knew Too Much*, *Marnie*, and *The Birds*; additional works by Brooks, Craven, De Palma, and Sherman. Readings in film and cultural theory; screenings at least weekly.

(Spring) Asian American Literature in a Transnational Age - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This seminar examines the distinct critical genealogies within Asian Canadian and Asian American literary and cultural studies over the last three decades, probing their evolving objectives and their intellectual futures. Throughout the course, we will examine the major shifts and intersections in these fields, focusing in particular on: androcentric cultural nationalism; feminist and queer interventions; historical materialist, psychoanalytic, postcolonial, and deconstructive theoretical approaches; and domestic and transnational critical formations.

(Fall) Re-imagining Los Angeles: Multiethnic Fictions of Tomorrowland - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

In Ridley Scott's 1982 science fiction film, *Blade Runner*, Los Angeles is a beleaguered metropolis overrun by immigrant "hordes" and menacing replicants, presenting a dystopic forecast of multiculturalism. By surveying major genres in relation to the racialized and gendered contexts of migration, labor, and urban redevelopment, this course focuses on alternative constructions of Los Angeles in African American, Asian American, and Chicana/o short stories, novels, and film. Works will include *Southland*, *Tropic of Orange*, *Twilight: Los Angeles 1992*, *Their Dogs Came with Them*, *Devil in a Blue Dress*, *We Should Never Meet*, and *Kindred*.

Environmental Studies

ENVST-100-01 - Environmental Studies - 2011-2012

(Spring) Introduction to Environmental Studies

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course introduces students to the field of environmental studies and to some of the scientific, historical, political, economic and cultural aspects of environmental concerns. Through interdisciplinary lenses, we explore the complexities of many issues and problems such as climate change, threats to biodiversity, and toxic environments. In addition to fostering an understanding of their origins, the course focuses on potential solutions.

(Spring) Renewable Energy

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

(Physics 104)

We will examine the feasibility of converting the entire energy infrastructure of the US from one that is dependent on fossil fuels to one that utilizes mostly renewable sources of energy. We will examine the potential scale of energy production and the associated costs, natural resource requirements and land usage needs for both renewables, such as solar, wind and biofuel, and non-renewables, such as coal, natural gas, petroleum and nuclear. By applying extensive use of basic algebra and an elementary understanding of the physical processes underpinning each energy technology, we will arrive at a number of urgent conclusions about the challenges facing our energy infrastructure.

ENVST-200-01 - Environmental Studies - 2011-2012

(Fall) Environmental Science

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Most of our society's environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.

Prerequisites: One 100-level lab science; one course in statistics is recommended

(Fall) Political Ecology

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course will explore the historical, political, economic, social, and cultural contexts in which human-environment interactions occur. We will cover critical topics and trends in the field of political ecology, from its early manifestations to more recent expansions. Using case studies from the global south and north, we will discuss factors that shape social and environmental change across scales from the personal to the global, and we will examine the role of gender, race, class, and power in struggles over resources. Students will become familiar with the academic debates in which political ecologists are engaged, and they will apply the concepts discussed in a case of their choice.

(Fall) The Value of Nature

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Through this seminar, students develop an in-depth knowledge of and articulate vocabulary for the significant and diverse ways that humans value the natural world - utilitarian, scientific, aesthetic, naturalistic, symbolic, ethical, and spiritual. We use these different typologies of human environmental values as frameworks for readings and discussion, extending our examination to historical and cultural variations in values, competing perspectives of the natural world, and other value concepts, including intrinsic and transformative value. We examine the concept of biophilia and probe the role values play in the concern over losses of biological diversity and its implications.

(Spring) Environmental Issues

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

In this course, we will explore the different facets of numerous environmental policy issues and review the substantive aspects, legal themes, and regulatory structure of the major federal environmental laws. The laws covered in this course include the National Environmental Policy Act, the Clean Air Act, the Clean Water Act, the Endangered Species Act, and others. The course objectives are for the student to learn the basic regulatory characteristics of the major laws and to become well-versed in the current environmental issues which we will focus upon throughout the semester, such as global climate change, ocean degradation, energy resources, and biodiversity loss.

(Fall) Reading and Writing in the World

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive; English 267)

An introduction to reading and writing about nature, this seminar will attempt an exchange across distinct approaches to observing and describing the world around us. Do lenses of culture, discipline, and gender determine how we see and experience nature, environment, and place? Course work will include reading such authors as N. Scott Momaday, Henry David Thoreau, bell hooks, Leslie Marmon Silko, Mary Oliver, Terry Tempest Williams, Wendell Berry, and Annie Dillard; field trips; and writing assignments--weekly field notes and journals, analytical papers, and personal essays.

(Spring) Perspectives on American Environmental History - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

We explore the history of human-environment interactions in North America from precolonial times to the present from different cultural perspectives. How have such human activities as migration, colonization, and resource use depended on or modified the natural world? How have different cultural perceptions of and attitudes toward environment shifted through time and helped to reshape American landscapes? Case studies

include ecological histories of Native America and Euro-America, slavery and land use, wilderness and conservation, and environmental racism and social justice. Our approach entails historical review of scientific studies, literature, visual records, and oral tradition.

(Fall) Conference Courses in Environmental Studies: Response to Environmental Contaminants and Evolution: Communicating the Science to the Public

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive; Biological Sciences 321D)

Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.

It is essential for scientists to communicate their findings to the public. Students will learn the basic concepts of toxicology--the study of chemical contaminants--and they will consider how toxicity is both a product and a selective force in the evolution of particular groups of organisms. They will research particular toxicants--their chemistry, physiological effects in different kinds of organisms, and the environmental and evolutionary contexts for varying susceptibilities and responses. Their findings will be the basis of articles written for online publication in the Encyclopedia of Earth, a freely available, expert-reviewed collection of articles written in non-technical language.

Prerequisites: 8 credits from any of the following departments: environmental studies, chemistry, biochemistry, biological sciences, geology; or permission of instructor

Instructors: E. Monosson

Expected enrollment: 16

(Spring) Conference Courses in Environmental Studies: Wetland Ecosystem Research

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.

Peatlands have sequestered vast stores of soil carbon since deglaciation, accounting for approximately one-third of the global pool of soil carbon. This seminar will focus on responses of northern wetlands to climate change. In particular, we will address three main topics: the environmental controls on interannual and seasonal variability in CO₂ and CH₄ gas exchanges, the responses of plant communities along hydrologic and nutrient gradients to climate variability, and the influence of atmospheric nitrogen deposition on carbon exchanges and vegetation. Group discussion of primary scientific literature, independent research, and investigation of research methods are core components.

Prerequisites: At least 8 credits of 200 or 300-level laboratory science, and permission of the instructor

Instructors: J. Bubier

Expected enrollment: 15

(Spring) Landscape and Narrative - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive)

Different stories or narratives--whether myth, literature, maps, or scientific theory--have been created about every region or environment on Earth as human attempts to describe and understand our connections with that place. How do braided strands of human history and natural history contribute to stories we tell of the land, and to stories we tell of ourselves in the land and of relational identity? In this reading and writing seminar we will reflect on how lifeways, homeplace, and identity of an individual or a community are linked with environment or the land. We will also create written and visual narratives of our own and explore creative environmental writing in reflection and action.

(Spring) Political Economy of International Conservation - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course uses concepts from political ecology to study the relationship between global political economy and environmentalism. Scholars from a variety of disciplines have charted the rise of a neoliberal economic paradigm in global political economy during the past 40 years. Drawing on a range of literature, we will reflect on changing perceptions of the market in international conservation policy during this time period. We will consider the political and ecological impacts of changing ideas, and associated conservation practices, including natural resource limits to growth, sustainable development, community conservation, market-based approaches, and corporate social responsibility.

Prerequisites: Environmental Studies 210 or permission of instructor

Instructors: C. Corson

(Fall) Science and Power in Environmental Governance

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course applies concepts from political ecology to study how governance, broadly defined, works in relation to the environment. Using case studies of international environmental issues, we will explore how people make decisions about the environment in a policy realm. We will discuss the role of various agents, such as governments, scientific bodies, and nongovernmental organizations, in the decision-making process. We will reflect on who has access to decisions; how scientific data is used; how environmental ideas become powerful; and how policies are legitimated. Armed with this information, we will consider how to advocate for global environmental sustainability and social equity.

Prerequisites: Environmental Studies 210 or permission of instructor

(Spring) Biogeochemistry of Northern Ecosystems - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical cycling of major elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity and feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.

Prerequisites: at least 8 credits of 200-level lab science and permission of the instructor. Global Biogeochemistry (Chem 232) recommended.

(Spring) Nature and Gender: Representations of Women and Nature in American Literature (Nineteenth-Twentieth Century)

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 373 and Gender Studies 333)

This course will focus on portrayals of women in nineteenth through mid-twentieth century America, particularly in the context of nature and landscape. We will explore how women, often objectified in visual images of the period, appropriated established devices or developed new images and structures to represent womanhood in their own terms. Texts will include selected poetry, sketches, autobiographical essays or memoirs, short stories, novels, paintings, films, and photography.

(Fall) First-Year Seminar: Goodbye, Conventional Wisdom

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive; Critical Social Thought 100-04)

One of the hallmarks of a liberal arts education is to draw on a broad base of knowledge in order to interrogate common assumptions. No one exemplifies this critical approach better than French philosopher Michel Foucault. One of the most influential thinkers of recent times, Foucault revolutionized several academic disciplines and even questioned the very notion of a discipline itself. He did so by revealing the history and transformations of ideas now viewed as self-evident. This first-year seminar invites students to develop similar analytical skills. Following Foucault's lead, the course pays special attention to preconceptions about government, freedom, identity, and sexuality.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive; Taught in English; German Studies 100, Critical Social Thought 100)

How do nations, groups, and individuals remember war? We explore the conflicting narratives of war that emerge at memorial sites, in museums, in film and other visual media, and in oral testimony. With an emphasis on case studies of actual national and transnational controversies arising out of competing versions of the past by the multiple participants in war, we investigate the impact of war in the last century up to the present for defining national, ethnic, gender, and racial identities; for establishing responsibility and rendering justice; and for remembering the dead. Cases focus on the remembrance of WW II and its legacies in Germany, Japan, and the U.S.

(Fall) First-Year Seminar: Stalinist Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (History 101F-02)

An exploration of revolutionary terror. Centered on the Hungarian and Czech experience from the start of the Cold War, this course covers the Communist takeovers and expropriations of the late 1940s, the Yugoslav deviation, and various policies and spectacles of the Rakosi and Gottwald regimes, including the show trials. It then turns to the unraveling after Stalin's death, in which memories of terror played an important role. Assignments balance historical studies with memoir, art, fiction, and film. Emphasis lies on comparative analysis of politics high and low.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Writing-intensive; Taught in English; Politics 151, Russian Eurasian Studies 151f(01))

Situated between the Black and Caspian Seas, and squeezed between Europe and Asia, the political and cultural landscape of the Caucasus is an intriguing reflection of over 2,000 years of imperial contestation, migration, and occupation. Tracing the fate of one Georgian family through empire, war, revolution, and independence, we explore the politics and culture of everyday life in the Caucasus. This interdisciplinary course will incorporate music, literature, history, and politics to understand the comprehensive and complex nature of change in this region, its connection with global developments, and its impact on ordinary citizens' lives over the last 200 years.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 221)

This course focuses on the Italian peninsula and urban life in Florence, Naples, Rome, Milan, and Venice from the fourteenth through the early seventeenth centuries; it follows the little people (*popolo minuto*), artisans, and elites in their challenges to government, law, church, and society. It looks broadly at the economic, political, social, and cultural factors that gave rise to disturbing questions about traditional conceptions of temporal and cosmic order, about men and women's relationships to one another and the world about them, about wealth, guilt, the shortcomings of human nature, and the potential of the human spirit.

(Fall) Topics in German Studies: The Art and Science of Revolution in German Cultures

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 223f-01)

Preamble (for topics courses): This course examines the cultural, political, and social developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic, and other units.

Revolutions are deeply embedded in cultural, economic, political, and environmental structures. Some are violent, some are peaceful; some evolve out of historical processes over long periods of time; and others emerge spontaneously without warning. Still others are material in nature, such as the industrial revolution or the end of the Berlin wall. The seminar explores the causes, forms, and impact of major revolutions in German cultures from the invention of the printing press to the most recent "Wende" that led to unification. Other revolutions include the French Revolution, the German Revolution of 1848, the founding of the Weimar Republic, and the student movement in 1968.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 209, Russian & Eurasian Studies 240)

Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy?

(Spring) Doubt, Dissent, and Heresy in the Age of the Inquisition

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 254)

The Holy Office of the Inquisition of the Roman Catholic Church proved an effective instrument for controlling religious and political orthodoxy from the Middle Ages through the early modern era. Its range of activity spanned investigations into doctrinal purity, groups of dissenters, Jews and Muslims who converted to the Christian faith, scientific discoveries, witchcraft, cunning folk, the black arts, and popular dissent. This course examines this institution and the social political, mental, and imaginary world it monitored to safeguard "faith and morals" in this life and access to salvation in the next.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 207)

The history of the modern world has often been told as the history of markets and their expansion over time and place, culminating with what is often called "market society," a society in which market relations are said to shape all of our everyday lives. What does it mean to live in a market society and how have past cultures responded to the supposed intrusion of market relations? We will explore the cultural history of markets and market relations over the past several hundred years, with particular emphasis on European and North American cultures. We will also study institutional histories of markets--how they were built and organized--alongside the ways in which people thought about and responded to forms of market exchange in everyday life.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 255s-01)

"Our age is pre-eminently the age of great cities," wrote Robert Vaughan in 1843. Many Europeans questioned whether the greatness of cities was such a good thing, but most agreed that the history of nineteenth-century Europe could not be written without reference to them. We will examine that history from the perspective of Europe's largest cities between the mid-eighteenth and twentieth centuries. Taking greatness in its broadest sense, our readings will treat both the feats of urban transformation and the murkier histories of streets, sewers, sex, and slums. We will learn of the unruliness of cities and of their being ruled through government, social reformers, planners, and engineers.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 315, Gender Studies 333)

A gift of a voluminous scrapbook by an alumna (1909) studying German at MHC serves as the basis for this hands-on investigative course about global learning and daily life at MHC, in Germany, and Europe. Each student researches her individual area of interest to explore this crucial era when women in Europe pushed open all doors to higher education (1908), when women scientists, artists, and public leaders achieved prominence. Key question: how did women's education support women in defining and constructing their own paths to professional success, commitment to global public service, and desire for pleasure and personal happiness? Research outcome: bilingual media project.

Prerequisites: open to students who have completed at least 8 credits beyond German Studies 201 or permission of department

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; German Studies 315)

The course focuses on key issues facing contemporary Europe as it attempts to integrate large im/migrant populations: such legal issues as the development of asylum, immigration, citizenship, and anti-discrimination/hate laws and such cultural issues as the meanings of integration vs. assimilation; multicultural vs. pluralistic societies; the roles of Christianity, Judaism, and Islam in the construction of European societies and cultural identities; perceptions of (Post-)Colonialism and the interceptions of gender, race, class, and nationality; and the (dis)integrative role of language. Focus on the emergence of European Union rules vs. representative national policies in Germany, France, and Great Britain.

Prerequisites: Previous study of German

Notes: majors/minors in the department should simultaneously enroll in both German Studies 232 (taken for 300-level credit) and GRMST-315 or EURST-316 to receive major/minor credit, and read, write about, and discuss selected materials from EURST-316 or GRMST-315 in German.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; German Studies 331)

What defines European or Islamic "culture" and "civilization"? Europe has dreamt of the *Tales of 1001 Nights*, has created "exotic" images of "Orientalism." But what about the blossoming of art and science under Islam: the Alhambra, Avicenna's *Canon of Medicine*? Recent global events have triggered an ancient European angst based on the collective memory of the Crusades and tales of the legendary assassin; the Ottomans' siege of Vienna and conquest of the Balkans. What role does the media play in the representation of Europe and Islam? Our sources: films, fatwas, facts and fiction, presented by Muslim filmmakers, scholars, and religious authorities.

Some of the best feature-length films of the past century have commanded our attention because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: *Broken Blossoms*, *Battleship Potemkin*, *Citizen Kane*, *Contempt*, *The Bicycle Thief*, *Ugetsu*, *Rear Window*, *Woman in the Dunes*, *The Marriage of Maria Braun*, *Days of Heaven*, and *Moulin Rouge*.

(Fall) Introduction to Spanish and Latin American Cinema

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 240-01)

This course offers a broad introduction to the history, politics, and aesthetics of Latin American and Spanish cinema in the context of, and in contrast with, cinemas from other regions, especially hegemonic Hollywood aesthetics. This course will also focus specifically on introducing students to the basic terminology and methodologies of film analysis, thus preparing them for the department's film seminar (Spanish 320) and other advanced courses in film studies.

Prerequisites: Spanish 212 or permission of instructor

Notes: Taught in Spanish

Instructors: J. Crumbaugh

(Fall) Production Seminar in the Moving Image: The Personal and the Political in Documentary: Beginning Video Production

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this introductory video production course we will study and make documentaries that highlight connections between the private and the public, the local and the global, the personal and the political. We may use our own stories as a jumping off point to explore larger historical, economic, environmental, or social forces. Conversely, we might begin by looking at events on the world map and then trace a path back to our own coordinates. Through screenings, readings, and discussion, as well as video projects, students will develop their own points of view while learning the vocabulary of moving images and gaining production and postproduction technical training.

Prerequisites: Introduction to Film Studies. Application and permission of instructor. Application available through FS website.

Notes: 1 meeting (3 hours), 1 screening (2 hours); a lab fee may be charged

(Spring) Special Topics in Film Studies: The Seventh Art

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

At its earliest presentations, comparisons were drawn between the cinema and other arts (e.g., Lumière and Pre-Raphaelite painters); soon afterward, the new medium was christened the seventh. The youngest and its elders have consistently energized each other, and this course will trace key points along that circuit. Beginning on recently turned ground (Moving Pictures: American Art and Early Film and Picasso and Braque Go to the Movies) we will track movements, figures, and technologies (German Expressionism and Soviet Constructivism, Duchamp and Warhol, 16mm film and video) that have bridged the visual arts and the cinema, harvesting what grows out of such cross-fertilization.

(Fall) Special Topics in Film Studies: Music and Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Music 220)

For all who stay to the end of the credits, purchase soundtracks, and argue over who should have won the Oscar for Best Score, along with anyone else interested in the undervalued importance of music to the general effect of a motion picture, this course will explore and discuss the myriad ways in which these two media interact. The course will focus on classic scores by Herrmann, Morricone, and Williams, as well as the uses of existing music in films of Bergman and Kubrick.

(Spring) Special Topics in Film Studies: Advanced Russian Film and Literature

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Russian and Eurasian Studies 252)

Students will view films, read excerpts from Soviet and Russian prose about childhood and coming of age, and study the socio-cultural aspects of becoming an adult in Russia. Films will include: *Ivan's Childhood*, *The Scarecrow*, *The Thief*, and *The Return*. Readings will include literary texts and film reviews. We will continue to work on oral and writing skills, and vocabulary. This course prepares students to express opinions, ideas, points of view, and critiques on films, social issues and cultural phenomena using more complex and rich language.

Prerequisites: Russian and Eurasian Studies 251 or the equivalent, or permission of the instructor

(Spring) Special Topics in Film Studies: What's So Funny?: Humor and Comedy in Contemporary German Film, TV, and Song

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 223s(01))

Germans have no sense of humor, right? Yet the cultural critic Marcel Reich-Ranicki claims that, next to England, no other country demonstrates a cultural tradition as deeply steeped in humor and comedy. Who is right? Are Germans humorless robots or born with funny bones? We will challenge the notion of humor as a universal concept and examine the comic as a cultural phenomenon. Based on selections from works by Freud and others,

we will explore diverse forms of the comic in a range of media: from Goethe's erotic poetry to film classics like *The Blue Angel*, and recent films about popular humorist successes of the 1920s such as the Comedian Harmonists, the first Boy Band.

(Spring) Special Topics in Film Studies: The Remembrance of the Holocaust in Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 223)

(In German) This seminar explores the remembrance of the Holocaust as represented primarily, but not solely, in German and European films from the immediate postwar era to the present, including documentary and feature film, as well as in other forms of visual media, such as television, photographs, and art. Themes include the working through of the past, expressions of guilt, remorse and sorrow, and the relationship between art and politics as exemplified in attempts to understand the causes, motives, and consequences of the Holocaust. Films include *Night and Fog*, *Shoah*, *Schindler's List*, *Gebürtig*, *The Night Porter*, *Life is Beautiful*, *The Nasty Girl*, *Wannsee Conference* and others.

Prerequisites: Same as GERM-223. Previous study of German

Notes: Students enrolled in 223 are expected to enroll in the complementary two-credit tutorial (German Studies 224).

(Fall) Documentary Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines the principles, methods, and styles of nonfiction film. Beginning with the "actualités" of film history's first practitioners and ending with contemporary self-reflexive films, such as Errol Morris's *The Thin Blue Line*, the class studies films that strive to represent some aspect of the real world as opposed to the fictional worlds of narrative cinema.

(Fall) Film Genre: Film Genre and Gender

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 204f-01)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.

This course examines the development of Hollywood film genres largely in the post-studio era, particularly the Western, the Melodrama, the Science Fiction and Horror film, and film noir. We will consider the evolution of these four genres in relation to changes in the film industry and in American society, especially in relation to gender.

Prerequisites: Film Studies 201 or 202

(Spring) Film Genre: The Musical Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.

This course explores the American musical film from its first appearance in the early 1930s in the films of Busby Berkeley to its recent revival in films such as Baz Luhrmann's *Moulin Rouge*. The course also examines musical films from other national cinemas that either comment self-reflexively on the genre and its American context and/or expand common definitions of the genre.

(Fall) National and Transnational Cinema: Silent Cinema - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema. This course is an introduction to silent cinema in the U.S. and the contexts of its reception. We will consider issues of gender, age, race, and ethnicity in the making of the cinematic audience. Contemporary forms of live entertainment, such as vaudeville, minstrelsy, burlesque, pugilism, and ethnic theatre, will be discussed in order to illuminate the broader cultural origins of American film.

(Spring) National and Transnational Cinema: Abandoned Hopes: The Russian 20th Century in Literature and Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; Russian and Eurasian Studies 211)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema. This course will survey the dramatic history of Russia in the 20th century through the prism of its cultural achievement. How did aesthetic forms -- literature and film -- reflect on the age of war, revolution, and terror, characterized by absolute power and stalwart resistance? What means of cultural expression emerged in response to the bloody and often dehumanizing diction of the Soviet period? The task of this course is both to assess the historical panorama of a decisive and difficult period and to zoom in on its especially characteristic works, including literature by Shklovsky, Babel, Bulgakov, Grossman, Khams and Brodsky, and films by Eisenstein, Tarkovsky, and Paradjanov.

(Spring) Film Authorship: Cinephilia and the Auteur--Forests and Trees - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific cinematic author. While most courses focus on a director or group of directors, courses may also focus on designers, technicians, performers, producers, or some combination of these personnel.

In his review of *Bitter Victory* (1958), Jean-Luc Godard declared: "the cinema is Nicholas Ray." In his study *The American Cinema: Directors and Directions 1929-1968*, Andrew Sarris placed Ray just beneath the "Pantheon Directors" in a lovely named but secondary grouping he called "The Far Side of Paradise." This course will dive into this fascinating period of film criticism and cinephilia (the 1950s and 1960s). By examining the French response (Andre Bazin and Cahiers) to the American cinema (mainly of the 1940s and 1950s), and by looking at the films of directors like Ray, Howard Hawks, and Fritz Lang, we will explore the French influence on American and British critics.

(Spring) Film Theory: Feminist and Queer Theory through Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 221)

Preamble (for topics courses): This course offers a consideration of one or more of the methods through which the medium of film is understood aesthetically and/or culturally.

We will be reading a number of key feminist texts that theorize the construction of sexual difference, and challenge the oppression of women. We will then address queer theory, an offshoot and expansion of feminist theory, and study how it is both embedded in, and redefines, the feminist paradigms. This redefinition occurs roughly at the same time (1980s/90s) when race emerges as one of feminism's prominent blind spots. We will study these shifts through the analysis of a few moving pictures, or, to put it differently: all you always wanted to know about feminism, but didn't think to ask filmmakers such as Almodóvar, Hitchcock, Jarman, Pasolini, Varda, and others.

(Spring) Film Theory: Philosophy and Film Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Philosophy 275-01)

Preamble (for topics courses): This course offers a consideration of one or more of the methods through which the medium of film is understood aesthetically and/or culturally.

An exploration of philosophical issues encountered in the study of film. Why do we need a theory of film? What is a film anyway? Do films have "authors"? How do films engage our emotions? Can films be socially critical? What can we learn from films? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. There will be weekly required film screenings.

(Spring) Production Seminar: Advanced Documentary Production Workshop

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Community-based learning course)

Preamble (for topics courses): An advanced course in the theory and practice of film/video production as an art form. Topics for the seminar will vary from year to year.

In this class, we will take skills and insights gained in introductory production courses and develop them over the length of the semester through the creation of one short documentary project, 10 minutes long. We will explore the ethical questions and ambivalences inherent in this medium, seeking complex answers to difficult questions about representation and the often blurry lines between fiction and non-fiction. We will watch documentaries each week, films that introduce us to new ideas and information both in their content and in their form. Come with your idea; we will hit the ground running with proposal writing the first week.

Prerequisites: Beginning video production or its equivalent. Application and permission of instructor required. Application available through FS Web site.

(Fall) Seminar in Film Studies: Montage: Millimeters or Miles

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Hollis Frampton claimed that it was "from [Eisenstein's] montage that we, all of us, measure our distances, in millimeters or in miles." Frampton's "all" extends beyond those directly involved with the cinema, echoing Eisenstein who stated that he was "interested in everything besides…the cinema," and who once began an essay with this epigraph from Goethe: "In nature we never see anything isolated, but everything in connection with something else which is before it, beside it, under it, and over it." This seminar will focus on Eisenstein's films and writings, pursuing their reverberations in Hollywood (e.g., Lang, Sirk) and the avant-garde (e.g., Brakhage, Sonbert, Child).

(Spring) Seminar in Film Studies: Enlightenment and Revolutions in Films

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(FREN 311-02)

Using contemporary films, multimedia material and texts, we will approach the ideas and events that rocked France in the eighteenth century. We will study revolutionary luminaries such as Rousseau, Voltaire, Diderot, Robespierre, Napoléon, Toussaint L'Ouverture, and will study the French revolution of 1789 and its consequences on the Haitian revolution of 1804. We will discuss each film in class, and students will give PowerPoint presentations on topics relevant to French art of the Ancient Regime and historical events of the period. Using visual documentation from artists such as Watteau, Boucher, Fragonard, Chardin, and David, students will produce an iMovie as a term paper.

(Theatre Arts 350s(01))

For over a century, the relationship between stage and screen has been mutually defining. From the early influence of melodrama on cinematic form to contemporary experimental performance practices, theatre and film have sustained a rich, ongoing dialogue. With this in mind, we will study films that engage with theatricality as well as stage work that embraces cinematic sensibilities. Course materials include a broad selection of films in various genres as well as theoretical readings and a selection of plays. A special section of the course will be devoted to Shakespeare on film. Required weekly screenings will be complemented by attendance at live theatre performances.

Prerequisites: Film Studies 201 or permission of instructor.

(Spring) Seminar in Film Studies: Women Experimental Filmmakers - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333s)

Preamble (for topics courses): This topics course provides advanced instruction in an aspect of film history, theory, or criticism. Students are expected to bring substantial background in the study of film to this course; enrollment may be limited.

This seminar examines experimental cinema made by women from the early 1950s, during the earliest years of the movement known as the American Avant-Garde, through the 1990s. While the class will read feminist film theory and see the work of such well-known filmmakers as Yvonne Rainer, Sally Potter, and Chantal Akerman, we will also examine the less familiar but highly influential films of women working in the home movie or diary mode, with particular emphasis on the work of Marie Menken.

(Writing-intensive)

Preamble (for topics courses): This topics course provides advanced instruction in an aspect of film history, theory, or criticism. Students are expected to bring substantial background in the study of film to this course; enrollment may be limited.

This course examines that strain of the American Avant-Garde that finds its raw material in the domestic and quotidian world of everyday life, which it shapes through various, often highly complex editing practices. The theoretical work for the course is centered on the notion of duration; some of the filmmakers to be considered include: Stan Brakhage, Marie Menken, Marjorie Keller, and Peggy Ahwesh.

(Fall) Topics in National/Transnational Cinemas: The French New Wave: Its Origins and Its Influence - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(French 331f (02))

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

The New Wave was a series of films made in the 1960s by a group of pioneers, who had seen almost every film ever made and particularly admired American and Russian cinema. This creative explosion, a reaction to "cinéma de Papa," won an aesthetic and political victory against an increasingly affluent, self-satisfied society, and brought about a revolution in the film industry.

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a "constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 325)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

Case studies in terror/ism, starting with the case of the mysterious 1828 foundling Kaspar Hauser, rumored even during his lifetime to have been the prince of Baden. Surviving the terror of solitary imprisonment for 12 years, was he the victim of political terrorism at the time? The course investigates parallels and differences between Kaspar's case and the terrorism of the leftist Red Army Faction (RAF) that shook Germany as of the 1970s, as well as their relation to the trauma of 9/11 and present-day international conflict. Multidisciplinary text selection on topos. Films range from New German Cinema (Herzog, von Trotta) to Ulrike Meinhof (2006) and *Der Baader-Meinhof Komplex* (2008).

(Fall) Topics in National/Transnational Cinemas: Courses in Francophone Studies: Ousmane Sembène - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(French 341)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

Born in 1923 in Senegal, the writer/filmmaker Ousmane Sembène is one of the rare witnesses of the three key periods of contemporary African history: the colonial period; the period of struggle for political and economic independence; and the period of effort to eliminate neocolonialism through the rehabilitation of African cultures. This course is entirely devoted to the works of Ousmane Sembène and will explore the key moments of his life, his activism in European leftist organizations, his discovery of writing, and most of all the dominant features of his film work.

(Spring) Topics in National/Transnational Cinemas: Advanced Studies in Visual Culture: Memory (of) War - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 340)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

The Spanish Civil War (1936-1939) and the repressive, right-wing military regime of Francisco Franco (1939-1975) have shaped contemporary thought and cultural production in Spain. Cinema in particular shows a persistent concern with war and memory. The films studied in this course raise a number of philosophical and political questions to this effect. How does the devastation of war register through the medium of film? How do censorship and propaganda condition memory, and how does the past return in a postdictatorship? What and why do people choose to remember or to forget? Films to be studied include both mainstream commercial features and experimental works, and range in genre.

(Spring) Topics in National/Transnational Cinemas: Global Europe?: Immigration and Representations of Im/migrants in Film and Text
- *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; German Studies 315 and European Studies 316)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

The course focuses on key issues facing contemporary Europe as it attempts to integrate large im/migrant populations: such legal issues as the development of asylum, immigration, citizenship, and anti-discrimination/hate laws and such cultural issues as the meanings of integration vs. assimilation; multicultural vs. pluralistic societies; the roles of Christianity, Judaism, and Islam in the construction of European societies and cultural identities; perceptions of (Post-)Colonialism and the interceptions of gender, race, class, and nationality; and the (dis)integrative role of language. Focus on the emergence of European Union rules vs. representative national policies in Germany, France, and Great Britain.

(Spring) Topics in National/Transnational Cinemas: Queer Kinship in Asian North American Literature, and Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(English 334s(01))

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century--from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Fall) Topics in Film Authorship: Henry James on Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive; English 345f-(01))

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific cinematic author. While most courses focus on a director or group of directors, courses may also focus on designers, technicians, performers, producers, or some combination of these personnel.

This seminar will examine the various screen adaptations of assorted novels by Henry James. We will read the novels against the films, exploring how James's texts translate--or do not translate--into film.

(Spring) Topics in Film Authorship: Natural's Not in It: Pedro Almodóvar

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 340s-01)

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific cinematic author. While most courses focus on a director or group of directors, courses may also focus on designers, technicians, performers, producers, or some combination of these personnel.

This course studies the films of Pedro Almodóvar, European cinema's favorite bad boy turned acclaimed auteur. On the one hand, students learn to situate films within the context of contemporary Spanish history (the transition to democracy, the advent of globalization, etc.) in order to consider the

local contours of postmodern aesthetics. On the other hand, the films provide a springboard to reflect on larger theoretical and ethical debates. For instance, what can a weeping transvestite teach us about desire? What happens when plastic surgery and organ transplants become metaphors? Under what circumstances, if any, can spectators find child prostitution cute?

Prerequisites: Film Studies 201, 202, or Spanish 221 or permission of instructor

Notes: Weekly evening screenings. Taught in English.

(Spring) Topics in Film Theory: Queer Theory and Recent Queer Film in Latin America - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive; Spanish 320-08)

Preamble (for topics courses): This course offers a consideration of one or more of the methods through which the medium of film is understood aesthetically and/or culturally.

In the 1990s GLBT liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: queer studies. As a consequence, the North American liberal model displaced cultural and theoretical models of sexuality of other countries. We will consider some of the key U.S. texts that have consecrated queer studies as a discipline and juxtapose them with theories and cinematic texts from Argentina, Brazil, Chile, Cuba, and Mexico in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism.

(Fall) Period Courses: Marvelous Places: Desire and Deceit

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.

An exploration of why literary heroes and heroines traveled and where they went--whether for love, escape, or education--from the Middle Ages to the Enlightenment. Readings: Marie de France's *Lais*, Mandeville's *Livre des Merveilles*, Christine's *Chemin de longue étude*, Du Bellay's sonnets, Marguerite de Navarre's *Heptaméron*, Montaigne's *Essais* and *Journal de Voyage*, Fénelon's *Aventures de Télémaque*, Crébillon fils's *Egarements du coeur et de l'esprit*.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: Note: Class format will involve introductory lectures for background, while students should expect to participate actively in open discussion of each text, to submit a midterm paper and somewhat longer final research paper.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.

Using contemporary films, multimedia material and texts, we will approach the ideas and events that rocked France in the eighteenth century. We will study revolutionary luminaries such as Rousseau, Voltaire, Diderot, Robespierre, Napoléon, Toussaint L'Ouverture, and will study the French revolution of 1789 and its consequences on the Haitian revolution of 1804. We will discuss each film in class, and students will give PowerPoint

presentations on topics relevant to French art of the Ancient Regime and historical events of the period. Using visual documentation from artists such as Watteau, Boucher, Fragonard, Chardin, and David, students will produce an iMovie as a term paper.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; Romance Languages 375, Spanish 360, Italian 361)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works and write papers in French.

Travel literature has always been a precious source for the study of culture, politics, arts and, last but not least, people. From Tacitus to Marco Polo, from Stendhal to Camilo Jose Cela, we will read and discuss authors who traveled for political, personal, and recreational reasons. We will also pay special attention to tales of emigration and immigration in the third millennium.

Prerequisites: Two of the following courses: French 215, 219, 225, or 230, and permission of course instructor

Notes: NOTE: To receive 300-level credit in French, students must write all papers and do appropriate course readings in French.

(Fall) Courses on Social and Political Issues and Critical Approaches: Writing and Politics: Literature as Social Engagement

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.

Study of French and Francophone writers, filmmakers, and artists, in their specific contexts, whose works engage with important political and social issues of their time and place. Preliminary readings theorize how texts can communicate, explicitly or implicitly, an ideological stance. We will then consider imaginative works, from the Middle Ages to the present, whose thematic, narrative, cinematic, stylistic, or linguistic techniques connect with movements for social or cultural change.

(Spring) Courses on Women and Gender: Disease, Destruction, and Death: The Figure of the Femme Fatale in French Narrative Fiction

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Gender Studies 333)

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women's writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.

An examination of vivid literary incarnations of the *femme fatale*, female characters eerily and inextricably linked to untimely, unseemly, or tragic death. Characters fall roughly into two categories: women who directly or indirectly bring about someone else's death; or women who serve as scapegoats, whose symbolically sacrificial death, at the conclusion of the novel, allows the other characters to continue their own lives. We will discuss these works as expressions of misogyny and fear of female sexuality while also attempting to reach broader conclusions about the implications of both individual texts and the *femme fatale* novel as a sub-genre.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

(Fall) Advanced Level Seminar: The Detective Novel in France

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

The French detective novel found its origins in Poe and in the disillusionment and malaise of the increasingly urban universe of the nineteenth century. It generally centered on a dark, mysterious Parisian atmosphere that spoke to a growing public awareness of the worlds of crime and of the police. Realist novelists, in particular Dostoevsky, enriched the genre's conventions, but the detective novel evolved beyond realism as it moved into the twentieth century, combining unsettling social critique with reassuringly flawless reasoning.

(Spring) Advanced Level Seminar: Proust: À la Recherche du temps perdu

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

à la Recherche du temps perdu is the greatest literary masterpiece of the twentieth century and is both rooted in a specific past and universal in its analysis of human intellect and emotion. We will concentrate on themes of love and desire in three relationships: Swann's adoration of Odette; the narrator's fixation on Albertine; and the Baron de Charlus's homosexual passions. Assignments will include most of *Du Côté de chez Swann*, *Sodome et Gomorrhe*, and *Le Temps retrouvé*, excerpts from the other four novels; selections from important criticism; and film. Analysis of construction of the entire work will facilitate reading unassigned sections for ambitious Proustians.

Gender Studies

GNDST-101-01 - Gender Studies - 2011-2012

(Fall) Introduction to Gender Studies

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive)

This course introduces students to social, cultural, historical, and political perspectives on gender and its construction, with particular attention to performance as a method of analysis. Through discussion, writing, and somatic exercises, we explore the intersections among gender, race, class, and sexuality in multiple contexts. Taking an interdisciplinary approach, we consider the distinctions between sex and gender, the relationship between individual identity and state power, the making of masculinity and femininity, queer movements, racism, and the possibilities for social change. We also examine the promises and challenges of feminism as a theoretical and activist frame.

(Fall) First-Year Seminar: Gender and Power in the History of Mount Holyoke College

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Writing-intensive; History 101F-04)

Mary Lyon, founder in 1837 of Mount Holyoke Female Seminary, held out to her students the possibility that they might transform the world--a tall order for young women who were excluded from proper citizenship and political power. To Lyon, duty, discipline, and community would make it possible. What transformations ensued? And what can we learn from them about the complexities of gender and power? This course will introduce students to the craft of historical research through the richness of the College Archives. Special attention will be paid to the College's missionary past, its role in labor research and activism, and the place of racism and antiracism in its history.

(Spring) Methods and Practices in Feminist Scholarship

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

How do scholars produce knowledge? What can we learn from differences and similarities in the research process of a novelist, a biologist, an historian, a sociologist, and a film critic? Who decides what counts as knowledge? We will examine a range of methods from the humanities, social sciences, and natural sciences, including visual analysis, archival exploration, interviewing, and ethnography, as we consider the specific advantages (and potential limitations) of diverse disciplinary approaches for feminist inquiry. We will take up numerous practical questions as well as larger methodological and ethical debates. This course provides a foundation for advanced work in the major.

(Spring) Women and Gender in the Study of Culture: Nineteenth-Century American Women Writers

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(English 270)

In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 239)

Eighteenth-century England witnessed the birth of the novel, a genre that in its formative years was both lauded for its originality and condemned as intellectually and morally dangerous, especially for young women. We will trace the numerous prose genres that influenced early novelists, including conduct manuals, epistolary writing, conversion narratives, travelogues, romance, and the gothic. In doing so, we will concomitantly examine the novel's immense formal experimentation alongside debates about developing notions of gender and class as well as the feeling, thinking individual. Authors may include Richardson, Fielding, Sterne, Walpole, Burney, and others.

(Spring) Women and Gender in the Study of Culture: Androgyny and Gender Negotiation in Contemporary Chinese Women's Theater

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Taught in English; Asian Studies 215)

Yue Opera, an all-female art that flourished in Shanghai in 1923, resulted from China's social changes and the women's movement. Combining traditional with modern forms and Chinese with Western cultures, Yue Opera today attracts loyal and enthusiastic audiences despite pop arts crazes. We will focus on how audiences, particularly women, are fascinated by gender renegotiations as well as by the all-female cast. The class will read and watch classics of this theater, including *Dream of the Red Chamber*, *Story of the Western Chamber*, *Peony Pavilion*, and *Butterfly Lovers*. Students will also learn the basics of traditional Chinese opera.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German 223)

As an extreme, but common experience, war creates, shapes, and contests normative constructions of masculinity, femininity, and gender relations in general. This seminar explores the concept of war, its causes, and its representation in memoirs, fiction, art, and photography within German-speaking realms with an emphasis on World War II and its aftermath. What impact does war have on gender relations within a matrix of other categories of identity, such as race, class, and sexuality? Materials include texts by Bachmann, Brecht, Celan, and other German writers and films such as *Triumph of the Will* and *Das Boot*.

Prerequisites: Previous study of German

(Fall) Women and Gender in the Study of History: American Women's History, From Settlement to Reconstruction

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 275)

Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Same as History 276s(01))

This course introduces students to the major themes of U.S. women's history from the 1880s to the present. We will look both at the experiences of a diverse group of women in the U.S. as well as the ideological meaning of gender as it evolved and changed over the twentieth century. We will chart the various meanings of womanhood (for example, motherhood, work, the domestic sphere, and sexuality) along racial, ethnic, and class lines and in different regions, and will trace the impact multiple identities have had on women's social and cultural activism.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 296s-02)

This course uses archival records, fiction, life histories, and outstanding recent scholarship to investigate African women's actions in a century that encompassed women's loss of agency and authority but the endurance of their responsibility for the production of food. We investigate the erosion of women's economic power and the loss of women's work of governing at conquest, in the early colonial period, and as a consequence of Africa's integration into the world economy as its least powerful player. We examine women's efforts to sustain productive activities in the face of opposition and the gendered tensions these efforts provoke. Optional fourth hour discussions.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Religion 241)

This course explores women and Buddhism during different historical periods and in different cultures. Through a variety of sources, this course will illuminate Buddhist concepts of gender and sexuality, views of women's spiritual capacities, the diversity of women's images, roles, experiences, concerns, and contributions in Buddhist societies, and scholarly approaches to women in Buddhism. Special attention will be given to how gender is constructed in each cultural and religious context encountered, with particular emphasis on Buddhist women in Southeast Asia. We will look into the reasons why texts on religion have not always included the voices of women, and we will investigate ways to uncover them through research techniques and alternative hermeneutical strategies.

(Fall) Women and Gender in the Social Sciences: What Is Memory?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking-intensive; PSYCH 208f)

Memory has a wide range of meanings and applications in many different contexts. What, for example, is the difference between artificial intelligence and human memory? How are national identities constructed around the commemoration of great events? What is the importance of memory in relation to concepts like justice and progress? How do rituals and performances work to determine gender and other identities? How can we understand the differences in episodic, implicit, long term, short term or working memory? For individuals and societies, what are the implications of the absence of memory? In this course, we examine psychological, social, political, and cultural approaches to memory.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 290f-01)

We will be reading a number of key feminist texts that theorize the construction of sexual difference, and challenge the oppression of women. We will then address queer theory, an offshoot and expansion of feminist theory, and study how it is both embedded in, and redefines, the feminist paradigms. This redefinition occurs roughly at the same time (1980s/90s) when race emerges as one of feminism's prominent blind spots. We will study these shifts through the analysis of a few moving pictures, or, to put it differently: all you always wanted to know about feminism, but didn't think to ask filmmakers such as Almodóvar, Hitchcock, Jarman, Pasolini, Varda, and others.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive; Theatre Arts 234s(02))

How are gender and sexuality constructed, rehearsed, and contested through performance? How can queer cultural production serve as a method of activist intervention in dominant culture? In this course, students are introduced to the central theories and debates in queer studies, with attention to the intersections among gender, sexuality, race, and class. Students also see, write about, and discuss performances that critically engage queer discourses. Additionally, this course asks students to put theory into practice: students stage scenes from selected plays, create original performances inspired by course readings, and experiment with other performative interventions in public culture.

(Physics 211s-01)

This course examines explanations for the underrepresentation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability,

the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from professional organizations such as the American Physical Society, and reports from congressional committees.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Politics 255f(01))

The Americas have been characterized by the strictness of their laws in the criminalization of abortion. In some countries abortion is criminalized even when the woman's life is at risk. What role have women's movements played in advancing abortion rights? What has mattered most for a movement's success, its internal characteristics or external forces? Has the way the movement framed its demands mattered? How has the political influence of the Catholic and Evangelical churches influenced policies in this area? We will answer these questions by exploring examples from across the region through primary and secondary sources.

(Spring) Gender and Power in Global Contexts: Women and Social Movements in Latin America

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In the last 30 years, Latin America has seen the emergence of a large array of social movements that have shaped the political and economic processes in the region. From human rights to peasants' movements, from indigenous to unemployed movements, women have been increasingly involved in political activism. What has been the role of women in these movements? How have traditional women's roles been at the same time useful and an obstacle to their activism? How have women influenced the repertoires, frames, identities and strategies of these movements? We will answer these questions through the exploration of case studies in the region using academic readings, testimonies, and documentaries.

(Spring) Feminism and Capitalism

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Writing-intensive; Politics 271)

This course will explore the relationship between feminism and capitalism in a contemporary context, particularly the ways in which they reinforce and contradict each other. Examining this question through Marxist, liberal, post-structuralist, and post-colonial feminist theory, and the recent history of feminist and anti-capitalist movements, we will consider the economic and political underpinnings of feminist thinking and practice. Do certain feminisms carry implicit anti-capitalist commitments? To what extent are particular feminisms, especially liberal feminism, reliant upon capitalist structures and processes? What stakes might feminists have in preserving or uprooting capitalism?

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Theatre Arts 350s(01))

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course coincides with MHC's yearlong celebration of renowned American playwright Wendy Wasserstein '71. Readings include Wasserstein's complete works, Julie Salamon's new biography *Wendy and the Lost Boys*, and critical essays that place Wasserstein in the context of feminist theatre practice. Students will have the opportunity to conduct archival research using the Wasserstein Papers, and will participate in numerous campus events, including the Weissman Center's playwriting symposium and guest lectures by visiting scholars and artists. As dramaturgs for the department's production of *Uncommon Women*, the class will create a substantial program honoring Wasserstein and her legacy.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 301)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

In this seminar, we will study the history of sexuality, desire, and bodies. The premise of this interdisciplinary seminar is that sexuality is both historically constructed (fluid and changing over time and culture) and embodied and lived (experienced for many as essential and unchanging). We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications--mainstream and "normal" or subcultural and "deviant"--as mutually constructed.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; ASIAN 340f)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

A seminar on the eighteenth-century Chinese masterpiece *The Story of the Stone* and selected literary criticism in response to this work. Discussions will focus on love, gender-crossing, and women's supremacy and the paradoxical treatments of these themes in the novel. We will explore multiple aspects of these themes, including the sociopolitical, philosophical, and literary milieus of eighteenth-century China. We will also examine this novel in its relation to Chinese literary tradition in general and the generic conventions of premodern Chinese vernacular fiction in particular.

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course will examine narrative non-fiction biographies written by women biographers in order to determine the specific ways in which women tell the stories of other women's lives. We will investigate stylistic and theoretical approaches to writing biographies in which gender is a central focus. We will ask if "feminist biography" constitutes a literary genre. We will experience the challenges (and thrills) of conducting archival and primary research. The course will culminate in students writing chapter-length biographies.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 315, European Studies 315)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

A gift of a voluminous scrapbook by an alumna (1909) studying German at MHC serves as the basis for this hands-on investigative course about global learning and daily life at MHC, in Germany, and Europe. Each student researches her individual area of interest to explore this crucial era when women in Europe pushed open all doors to higher education (1908); when women scientists, artists, and public leaders achieved prominence. Key question: how did women's education support women in defining and constructing their own paths to professional success, commitment to global public service, and desire for pleasure and personal happiness? Research outcome: bilingual media project.

Prerequisites: open to students who have completed at least 8 credits beyond German Studies 201; required online application, see <http://www.mtholyoke.edu/acad/gender/300level.html>

Notes: Taught in German. Students with interest in this topic and in global and European studies, but insufficient or no prior knowledge of German, should enroll in German Studies 330 (2 cr.) taught in English.

(Spring) Advanced Seminar: Disease, Destruction, and Death: The Figure of the Femme Fatale in French Narrative Fiction

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(French 351s)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

(Taught in French) An examination of vivid literary incarnations of the *femme fatale*, female characters eerily and inextricably linked to untimely, unseemly, or tragic death. Characters fall roughly into two categories: women who directly or indirectly bring about someone else's death; or women who serve as scapegoats, whose symbolically sacrificial death, at the conclusion of the novel, allows the other characters to continue their own lives. We will discuss these works as expressions of misogyny and fear of female sexuality while also attempting to reach broader conclusions about the implications of both individual texts and the *femme fatale* novel as a sub-genre.

(Spring) Advanced Seminar: Latina Feminisms

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Latin American Studies 387s(01), Spanish 330s(01))

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course offers an interdisciplinary approach to the study of feminist ideologies among Latinas throughout the United States. Employing a range of sources from archival texts to artistic images and ethnographies, we will study the histories and representations of Latina feminist theories across academic and aesthetic approaches. Focusing on the multiplicity of lived experiences among Puertorriqueñas, Chicanas, Mexicanas, Centroamericanas, Dominicanas, Suramericanas and many other communities in the United States, we will interrogate how gender and sexuality have informed the development of Latina feminist movements and political histories.

(Spring) Advanced Seminar: Nature and Gender: Representations of Women and Nature in American Literature (Nineteenth-Twentieth Century)

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 373 and Environmental Studies 373)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course will focus on portrayals of women in nineteenth- through mid-twentieth-century America, particularly in the context of nature and landscape. We will explore how women, often objectified in visual images of the period, appropriated established devices or developed new images and structures to represent womanhood in their own terms. Texts will include selected poetry, sketches, autobiographical essays or memoirs, short stories, novels, paintings, films, and photography.

Prerequisites: jr, sr, 8 credits from the department or permission of instructor; online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

(Psychology 330f)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course is a study of research methods in educational settings, focusing on observational, survey, and interview techniques and using as a context adolescent girls' educational experiences in mathematics. Students will be working directly with the SummerMath database, which spans more than 25 years. Students will develop skills in formulating research questions, designing research, and finding appropriate methods (both qualitative and quantitative) by which to analyze the data. Each student will complete a major research project.

Prerequisites: Psychology 200, 201 and permission of instructor; online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (ANTHR 331s)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This seminar focuses on contemporary anthropological scholarship concerned with the varieties of sexual expression in diverse cultural settings. We will read ethnographic accounts of sexual ideologies and the politics and practices of sexuality in Brazil, Japan, Native North America, India, and elsewhere. We will examine anthropological theories of sexuality with an emphasis on contemporary issues, including performance theory, "third gender" theories, sexual identity formulation, and techniques used by various societies to discipline the body.

(Fall) Advanced Seminar: The Victorian Novel

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (English 323f)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course will explore the project of Realism in the Victorian novel, watching tensions between a desire for guidance and a desire for mimesis. One critic has said the Victorians brought a sense of social duty to Romantic world-awareness, creating a "duty of awareness" that was almost overwhelming for the novelist and novel. We will explore this "duty of awareness" as we investigate representations of gender, class, and feeling as structuring principles in the novel. Novelists may include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

(Spring) Advanced Seminar: Sexual Selection and Sexual Conflict in Animals: Theory, Research, and Feminist Critique

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive; Biological Sciences 321(B))

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Sexual selection theory explains how selection on traits that allow individuals to attract potential mates or defeat potential rivals can lead to the evolution of sexual dimorphism. Sexual conflict theory investigates how the conflicting interests of males and females in mating interactions can result in the co-evolution of traits for manipulation and resistance. Feminist critics point out how these theories reflect and in turn propagate stereotypes about human behavior. This course explores classic and current biological literature on sexual selection and sexual conflict alongside feminist critiques of the language use, the assumptions, and the interpretation of research in these fields.

(Fall) Advanced Seminar: Feminist Theologies - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 323f)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Judith Plaskow, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

(Spring) Advanced Seminar: "Every Secret Thing": Contemporary Women's Autobiographical Narrative in French - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course will examine contemporary autobiographical narratives written by women, with a particular focus on authors whose works include multiple autobiographical texts of various genres: fictional, nonfictional, and semifictional. We will analyze the ways in which these authors present their life stories, especially its traumatic or secret episodes, and the ways in which their works discuss the process of that presentation and of memory itself. Themes that are common to these autobiographical texts include: relationships with family, education, sexuality, class, and love. In addition to literary texts, we will analyze in detail several autobiographical films made by women.

Prerequisites: 12 credits in French including two courses at the advanced level, or permission of department chair and course instructor; online application required, see <http://www.mtholyoke.edu/acad/gender/300level.html>

(Fall) Advanced Seminar: Women Writers: Early Feminisms - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 330f-01)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course examines a variety of literary expressions of Early Modern Spanish women (Teresa de Avila, Catalina de Erauso, and María de Zayas among others). Attention will be paid to the formal means by which women writers emulated, appropriated, or subverted male-authored models. A significant part of the class will deal with the ways in which contemporary feminist theories can be used to complement, interpret, and flesh out ideas expressed by Early Modern women. Students will collaborate with the organization of an international conference on women to be held at MHC in September. Students will work on projects based on conference presentations and interview the participants.

(Spring) Advanced Seminar: Feminist Poetics: The Poetess, Prophet, and Revolutionary - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive; English 377s-01)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This seminar will explore innovations in eighteenth- and nineteenth-century women's verse. By investigating experiments with narrative, genre, stanza form, meter, and figurative language, we will contemplate what political, social, and ideological problems women writers attempted to present and perhaps solve through linguistic creativity. Larger questions include how to define "feminist poetics" and what potential such a project might afford poets and thinkers today. To this end, we will read selections of poetry in conversation with contemporary feminist theory as well as representations of women's incantation, prophecy, and singing by male poets and novelists of the day.

(Speaking-intensive; History 301F-04)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This colloquium will explore the history of South Asia as seen from women's perspectives. We will read writings by women from the ancient period to the present. We will focus on the diversity of women's experiences in a range of social, cultural, and religious contexts. Themes include sexuality, religiosity, rights to education and employment, violence against women, modernity and citizenship -- in short, those issues central to women's movements in modern South Asia. In addition to the textual sources, the course will analyze Indian popular film and the representation of women in this modern visual genre.

(Taught in English; Asian Studies 350s-01)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Seminar on love, desire, and gender, major themes in Indian literature. We will read classic poems, plays, and narratives in translation from Sanskrit, Tamil, Hindi, and other languages, in relation to aesthetic theory, visual arts (miniature paintings), and performance genres (Indian dance, and the modern Bollywood cinema). Study of the conventions of courtly love, including aesthetic mood (rasa) and natural landscapes, and their transformation in Hindu bhakti and Sufi Muslim mystical texts, the Radha-Krishna myth, and film. Focus on representations of women and men, and on issues of power, voice, and agency.

(Anthropology 316f-01)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This course explores the gendered domains of food and agriculture as they unfold within household and community economies in the global south and in G-8 countries. We will examine the place of women in systems of food production, processing, marketing, and consumption. We will address locally regulated markets, cuisines, and peasant farming systems as they interface with international neo-liberal systems of market and trade. We will also pay close attention to emergent women's agricultural cooperatives and unions as they shape new transnational coalitions that offer sustainable (and flourishing) solutions to problems associated with post-industrial agriculture.

(English 372s-01)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O'Brien.

(Spring) Advanced Seminar: Beyond Logocentrism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Spanish 350s-01)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Logocentric thinking is characterized by the desire for a center or original guarantee of all meaning, and has dominated the Western world since Greek antiquity. It attempts to repress difference in favor of identity and presence. Feminists have extended the concept to talk about *phallogocentrism* as the logical underpinning of patriarchy, and seek to go beyond it. Thinking beyond logocentrism is also crucial for the new discipline of critical animal studies. In this course, we will study attempts at breaking with the (phal)logocentric model of subjectivity, many of which have emerged in the "mestizo/a" continent.

(Fall) Atmosphere and Weather - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

In this course we will learn weather forecasting skills. This will involve examining weather observations, satellite and radar images, surface and upper-air weather charts, and predictions made by computer models. We will have an opportunity to learn atmospheric dynamics and gain an understanding of the Earth's radiation budget. Topics will include severe storms, hurricanes, and winter weather.

Prerequisites: high school earth science or any 100-level natural science course

Instructors: The department

Expected enrollment: 15

GEOG-304-01 - Geography - 2011-2012

(Spring) Regional Planning - Special Topics

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course examines the post 2nd World War transition of US urban communities to suburban communities. The first part of the semester will survey urban design and planning efforts from the early 1900s through the 1940s and the abrupt change in focus during the post war suburban sprawl period. The second half of the semester will focus upon future urban and suburban development paradigms in the absence of cheap energy and a weakening economy.

Prerequisites: Any 200-level geography course

Notes: 1 meeting (3 hours)

Instructors: T. Millette

Expected enrollment: 15

GEOG-307-01 - Geography - 2011-2012

(Spring) Remote Sensing

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

This course presents the fundamentals of digital analysis of aerial and satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multi-spectral aerial and satellite data. This class includes a term-long collaborative project to map forest and land cover in Western Massachusetts.

Prerequisites: Geography 205

Instructors: T. Millette

Expected enrollment: 12

(Fall) Seminars: Global Movement: Migrations, Refugees, and Diasporas

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

The voluntary and involuntary movement of people around the globe is the core focus of this course on migrations, refugees, and diasporas. Questions of borders, nativism, transnationalism, the global economy, and legality thread through this seminar as we consider the many social, cultural, environmental, economic, and political factors shaping decisions to leave a home or homeland. Historical and contemporary case studies, compelling theoretical texts, and geographic perspectives on these topics collectively animate our discussions.

Prerequisites: jr., sr., 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor

Instructors: S. Houston

Expected enrollment: 20

GEOG-312-01 - Geography - 2011-2012

(Spring) Seminars: Sense of Place, Sense of Planet

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

The complex intersections of local and global processes underpin this exploration of a sense of place and an extended sense of planet. Specifically, we examine human-environment relations at various geographic scales and consider themes such as emotional connections to place, exclusions and displacement, social movements, and sustainability. Several theoretical perspectives, in-class and out-of-class exercises, and thematic readings will further situate us both within South Hadley and the global context.

Prerequisites: jr, sr and 4 credits from the department and four 200-level related social science credits

Instructors: S. Houston

Expected enrollment: 18

GEOG-313-01 - Geography - 2011-2012

(Fall) Third World Development

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

Offers an interdisciplinary perspective on social, economic, and political features of contemporary development in Africa, Asia, and Latin America, regions referred to as the Third World or the South, and provides an introduction to theoretical origins and definitions of economic growth, development, and underdevelopment. It then addresses more specific aspects of development such as trends in population growth, migration, and urbanization; agrarian change; livelihood strategies and aspects of social welfare such as health, education, and shelter; poverty and the environment; and external economic relationships. The latter part of the course draws extensively on selected case studies.

Prerequisites: Prereq. jr., sr., 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor

Instructors: G. Kebede

GEOG-319-01 - Geography - 2011-2012

(Spring) Africa: Problems and Prospects

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

This course intends to offer an interdisciplinary perspective on selected contemporary development problems in Africa south of the Sahara. Central to the course will be an examination of the social, economic, and political consequences of colonialism, the physical resource base and ecological crisis, agrarian systems and rural development, gender relations and development, urbanization and industrialization, and the problems and prospects of regional cooperation and integration.

Prerequisites: jr, sr, soph with permission of instructor; 4 credits in department and 4 credits at the 200 level in geography or related social science.

Instructors: G. Kebede
Expected enrollment: 20

Geology

GEOL-100-01 - Geology - 2011-2012

(Spring) Physical Geology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

From earthquakes to landscapes, deserts to glaciers, landslides to limestone, this course introduces the surficial and internal processes of the earth. Learn to interpret the geology of your surroundings when traveling to new places and understand how geologic setting influences how people live. Lectures focus on exploring and explaining geological features and processes using concept sketches. Labs focus on mineral and rock identification, map reading, and local field trips.

Notes: Preference given to first- and second-year students during the first week of registration. Juniors and Seniors should check ISIS after that for availability.

GEOL-101-01 - Geology - 2011-2012

(Fall) Environmental Geology with Lab

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The only planet known to sustain life, Earth provides all the resources that sustain us, yet it can be an unpredictable and sometimes dangerous home. Floods, earthquakes, volcanic eruptions, and other natural processes challenge our ingenuity, while we also contend with self-induced problems such as pollution, desertification, and even global climate change. This course examines earth processes, how these affect our lives, and how we can best live with and sustain our environment. The labs covers selected geologic topics including methods for recognizing and interpreting environmental hazards, and developing strategies to address environmental problems.

Prerequisites: 4 credits; 2 meetings (75 minutes), 1 lab (3hours), field trips.

Notes: Preference given to first- and second-year students with 25 spaces held for first-year students. Junior and seniors should register at the academic fair on a first-come, first-served basis. The lecture for this course meets at the same time as the lecture for GEOL 107.

(Fall) History of Life

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Life forms have inhabited the surface of our planet for most of its history. Earth, as a result, has a unique geology that is unlike that of any other planet. In this course we will examine the interrelations between life processes and Earth's crust and atmosphere and how they work together to create the geology of the planet. Using both the rock and fossil record, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips will emphasize identification and analysis of sediments, rocks, and fossils.

(Spring) Oceanography

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

Because more than seventy percent of our planet is covered by oceans, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological processes in the oceans at a variety of scales in time and space. We will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to affect weather and climate, stabilize global chemical cycles, interact with the terrestrial environment, and give us access to resources.

(Spring) Dynamic Earth

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

The earth is a dynamic planet, creating oceans and mountain ranges, earthquakes and volcanic eruptions. This course explores the scientific revolution of plate tectonics, which provides a comprehensive theory explaining how and why volcanoes and earthquakes occur. Our emphasis will be on recent earthquake and volcanic events, including their hazards and impact on humans. We will consider recent tsunamis in Sumatra and Japan; recent eruptions of Mount St. Helens, Pinatubo, and Kilauea; as well as momentous events from the past, such as the San Francisco earthquake of 1906 and the 79 A.D. eruption of Vesuvius that destroyed Pompeii.

(Fall) First-Year Seminar: Diamonds

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking-intensive)

Are diamonds a girl's best friend? This course explores the geology of diamond deposits, the cultural and economic complexity of diamonds and diamond mining, the physical properties of diamond, and industrial uses of synthetic diamonds. Students will lead and participate in class discussions, complete assignments in groups, make oral arguments about difficult and complicated topics, and write short papers.

(Spring) First-Year Seminar: Emergence of Animals

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Writing-intensive)

The origin of animals was one of the most important events in the history of earth. In this course we will review the history of the planet, learn basic geology, and then examine the problem of the origin of animals by studying Mount Holyoke's unequalled collection of Precambrian and Cambrian fossils. The emergence of animals has been called the Cambrian Explosion. We will examine what this means for our understanding of evolutionary theory.

(Fall) Rocks and Minerals

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

In this course you will learn to recognize the common rock-forming minerals and principal rock types, and to understand their origins, properties, associations, and geological significance. Observational skills and hand sample identification will be emphasized in lab and on field trips.

(Fall) Surface Processes

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth's surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. With this understanding we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth's surface.

(Fall) Plate Tectonics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

(Speaking- and writing-intensive)

Plate tectonic theory explains the origins of volcanoes and earthquakes, continental drift, and the locations of mountain belts and oceans. This course focuses on the geometry of plate tectonics. Topics include mid-ocean ridge systems, transform faults, subduction zones, relative plate motion, earthquake analysis, triple point junctions, and stereographic projection. Work includes individual research projects on active plate boundaries.

Notes: Comfort with geometry and trigonometry suggested.

(Spring) Paleontology-Stratigraphy

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course provides an intensive study of fossils, fossil preservation, depositional environments, sediments, sedimentary rocks, and the processes of sedimentation. We will employ the principles of stratigraphic analysis and correlation to interpret ancient environments and paleoclimate, reconstruct paleogeography, and probe the characteristics of sedimentary basins. Laboratory exercises and field trips will introduce a variety of analytical techniques used to study sedimentary rocks.

(Spring) Groundwater - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The demand for and the contamination of groundwater resources are major environmental concerns. To better understand the dynamics of the groundwater system, we will cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, labs, a term paper, and an oral presentation.

(Fall) Structural Geology and Orogenesis

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course covers the basic techniques of field geology and structural analysis: field techniques, stress, strain, faulting, folding, rock strength, deformation mechanisms, and multidisciplinary approaches to mountain building (orogenesis). Most labs are field trips that involve data collection. Weekly writing assignments focus on presenting original research and distinguishing between observations and interpretations. During the final weeks of the semester, oral presentations and a final paper emphasize fluency in the published literature of structural geology.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course explores the evolution and interaction of life, rocks, oceans, and air during the past 4 billion years of earth history. Some topics covered are: ice ages and greenhouse atmospheres, continental drift, extinctions and radiations of flora and fauna, the early evolution of earth, absolute and relative dating of rocks, and the geologic time scale. Labs teach geologic map interpretation and simple computer modeling of earth systems. Oral presentations and writing assignments focus on proposal writing, the design and testing of earth science hypotheses, and critical analysis of recently published research on earth history.

(Fall) Seminars: Water Resources Evaluation

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year.

The hill town of Shutesbury, Massachusetts, is concerned about its water resources. Simply put, the town needs to know if there are limitations regarding water supply or water quality that should influence decisions of development and zoning. This lab and field based course will collect samples and gather (from existing town records) data in order to provide a better understanding of the hydrologic conditions in the town. Weekly meetings will involve field sampling and laboratory analysis of water samples and the mapping of soil and bedrock hydrologic properties. Each student will pursue her own research project and present their results in a final report.

Prerequisites: Geology 203 or Geology 227 or Environmental Studies 200 and permission of instructor.

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year.

Consult the department for information about future seminars.

This seminar will cover selected topics on the geology of Death Valley region, California. We will meet for two hours per week up until spring break, then embark on a nine-day field trip to Death Valley National Park, March 16-24, 2012. A participation fee is required. Students will be responsible for researching particular topics and presenting a final report.

Prerequisites: two geology courses and permission of instructor

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive; Taught in English; Critical Social Thought 100, European Studies 100)

How do nations, groups, and individuals remember war? We explore the conflicting narratives of war that emerge at memorial sites, in museums, in film and other visual media, and in oral testimony. With an emphasis on case studies of actual national and transnational controversies arising out of competing versions of the past by the multiple participants in war, we investigate the impact of war in the last century up to the present for defining national, ethnic, gender, and racial identities; for establishing responsibility and rendering justice; and for remembering the dead. Cases focus on the remembrance of WW II and its legacies in Germany, Japan, and the U.S.

GRMST-220-01 - German Studies - 2011-2012

(Fall) German Culture Today: Stories and Histories

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

This course examines historical, cultural, and political developments that continue to frame debates surrounding the twentieth century, WWII, the former GDR, and German unification. Thematic focus helps students develop accuracy, fluency, and complexity of expression. Reading, writing, and speaking are consistently integrated. Special emphasis placed on text organization toward expanding students' language abilities, with a gradual movement from personal forms of expression to written and public discourses.

Prerequisites: Previous study of German

Notes: Students in 220 are expected to enroll in the complementary two-credit tutorial (German Studies 221).

Instructors: G. Wittig Davis

(Fall) Tutorial in German Language and Culture: Speaking Workshop: Time Travels

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

Tutorial enhances students' speaking abilities through analysis and discussion of DVD-based interactive cultural historical materials. Students perform speaking tasks specifically designed to meet their intellectual interests. They thereby also increase their ability to express ideas in a number of discourses related to topics covered in 221 and 220 and in preparation for university study abroad.

Prerequisites: Previous study of German

Notes: Students in 220 are expected to enroll in the complementary two-credit tutorial (German Studies 221). GRMST 221 may, however, also be completed for additional language/culture practice either on its own or in conjunction with such 4-credit courses as 223, 301, or 315.

(Fall) Topics in German Studies: The Art and Science of Revolution in German Cultures

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; European Studies 223f-01)

Preamble (for topics courses): This course examines the cultural, political and social developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic and other units.

Revolutions are deeply embedded in cultural, economic, political, and environmental structures. Some are violent, some are peaceful; some evolve out of historical processes over long periods of time; and others emerge spontaneously without warning. Still others are material in nature, such as the industrial revolution or the end of the Berlin wall. The seminar explores the causes, forms, and impact of major revolutions in German cultures from the invention of the printing press to the most recent "Wende" that led to unification. Other revolutions include the French Revolution, the German Revolution of 1848, the founding of the Weimar Republic, and the student movement in 1968.

Prerequisites: Previous study of German

Notes: Students in 223 are expected to enroll in the complementary two-credit tutorial (German Studies 224).

(Spring) Topics in German Studies: What's So Funny? Humor and Comedy in German Culture

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Film Studies 220s(04))

Preamble (for topics courses): This course examines the cultural, political and social developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic and other units.

Germans have no sense of humor, right? Yet the cultural critic Marcel Reich-Ranicki claims that, next to England, no other country demonstrates a cultural tradition as deeply steeped in humor and comedy. Who is right? Are Germans humorless robots or born with funny bones? We will challenge the notion of humor as a universal concept and examine the comic as a cultural phenomenon. Based on selections from works by Freud and others, we will explore diverse forms of the comic in a range of media: from Goethe's erotic poetry to film classics like *The Blue Angel*, and recent films about popular humorist successes of the 1920s such as the Comedian Harmonists, the first Boy Band.

Prerequisites: Previous study of German

Notes: Students enrolled in 223 are expected to enroll in the complementary two-credit tutorial (German Studies 224). The 224 tutorial will stress current forms of humor, comedy, and satire in film and popular media.

(Fall) Topics in German and European Studies within a Global Context: War: What is it Good For?

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive; Taught in English)

A multidisciplinary examination of the various ways humans have understood, represented, experienced, and justified war over time and across cultures. The course considers the representation of war through art, literature, and music with particular emphasis on European, American and Asian contexts. It analyzes possible causes of war, including innate human drives, gender differences, socialization, and economic resource competition. In addition, it examines justifications for war from a range of ethical, national, and cultural perspectives. Contributing faculty include: V. Ferraro, O. Frau, L. Glasser, S. Hashmi, R. Schwartz, and J. Western.

Prerequisites: so, jr or permission of instructor

(Fall) German Tutorial: War and Memory - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

Preamble (for topics courses): Focus on developing discussion and reading skills in German, and revising and editing papers written in German for German studies courses taught in English.

How do nations, groups, and individuals remember war? We explore the conflicting narratives of war that emerge at memorial sites, in museums, in film and other visual media, and in oral testimony. With an emphasis on case studies of actual national and transnational controversies arising out of competing versions of the past by the multiple participants in war, we investigate the impact of war in the last century up to the present for defining national, ethnic, gender, and racial identities; for establishing responsibility and rendering justice; and for remembering the dead. Cases focus on the remembrance of WW II and its legacies in Germany, Japan, and the U.S.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; European Studies 315, Gender Studies 333f(01))

A gift of a voluminous scrapbook by an alumna (1912) studying German at MHC serves as the basis for this hands-on investigative course about global learning and daily life at MHC, in Germany, and Europe. Each student researches her individual area of interest to explore this crucial era when women in Europe pushed open all doors to higher education (1908), when women scientists, artists, and public leaders achieved prominence. Key question: how did women's education support women in defining and constructing their own paths to professional success, commitment to global public service, and desire for pleasure and personal happiness? Research outcome: bilingual media project.

Prerequisites: open to students who have completed at least 8 credits beyond German Studies 201 or permission of department

Notes: Students with interest in this topic and in global and European studies, but insufficient or no prior knowledge of German, should enroll in German Studies 330 (2-4 cr.) taught in English.

(Spring) Senior Seminar: Topographies of Berlin: Case Studies in the Meaning of Space, Place, and Identity

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): This seminar is designed to explore the nature of our field of inquiry in theory and practice. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms "culture" and "civilization"? Texts from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.

Post-Unification Berlin provides a testing ground for seeing how space shapes identity. Historic sites within the built environment of contemporary Berlin, whether markers of historical upheaval and reconciliation, or of the transformation of the periphery into productive sites of commerce and cultural exchange, serve as a point of departure to explore the emergence of multidimensional identities in today's Europe. We explore the history, design, function, construction, and, in some cases, destruction, of major historical sites in Berlin, such as the Berlin Wall, the Reichstag, the Museum Island, the Holocaust Memorial, and others through case studies, archival research, and visual media.

(Fall) Special Topics in German Taught in English (Colloquium): "Uncommon Women" Conquer the World: Archival Memories Come to Life

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Taught in English; European Studies 315, Gender Studies 333f(4))

Preamble (for topics courses): German Studies 330 colloquia in English parallel 300-level courses taught in German. They focus on making topics of extensive cross-disciplinary interest accessible to students majoring in diverse fields of study, and aim to facilitate intellectual discourse among speakers of German and students who do not speak German.

In this course, students participate in researching and preparing the English parts of the bilingual media project for German 315, a hands-on investigative course about global learning and daily life at MHC, in Germany, and Europe. 315/330 mainly draw on resources in the MHC Archives, especially a detailed scrapbook donated by a 1909 MHC alumna who studied German at MHC. Each student researches her individual area of interest to explore this crucial era for women throughout the world. Key question: how did women's education support women in defining and constructing their own paths to professional success, commitment to global public service, and desire for pleasure and personal happiness?

Notes: For GRMST 330, no knowledge of German is necessary. Students who wish to pursue research papers in English in conjunction with 330 may consult with the instructor and sign up for GRMST (or EURST or FLMST) 395 credits in addition to 330.

(Spring) Topics in German and European Studies in a Global Context: Europe and Islam: From 1001 Nights to the Nightmare of Al Quaida?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English; European Studies 316)

What defines European or Islamic "culture" and "civilization"? Europe has dreamt of the *Tales of 1001 Nights*, has created "exotic" images of "Orientalism." But what about the blossoming of art and science under Islam: the Alhambra, Avicenna's *Canon of Medicine*? Recent global events have triggered an ancient European angst based on the collective memory of the Crusades and tales of the legendary assassini; the Ottomans' siege of Vienna and conquest of the Balkans. What role does the media play in the representation of Europe and Islam? Our sources: films, fatwas, facts and fiction, presented by Muslim filmmakers, scholars, and religious authorities.

Notes: Note: language requirement in German met only if seminar is taken in conjunction with 2-credit tutorial (German Studies 332) taught in German. For credit toward minimum major or minor in German Studies, students must also complete the 2-credit German Studies 332 tutorial, in German, this semester.

(Spring) Topics in German and European Studies within a Global Context: Deutschland, Europe and der Islam/ismus

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Focus on developing argumentation and reading skills in German, and researching, revising and editing seminar papers written in German for German studies seminars taught in English.

With Islam constituting the third largest religious affiliation in Europe today, a vociferous debate has arisen concerning the integration of large groups of immigrants from diverse Muslim cultures and countries, women's rights according to the Q'ran and Sharia law interpretations, and the relations between religious Islam and political extremist Islamism. This tutorial, taught in German, focuses on the debate in German/y and investigates the economic, social, and political subtexts of media representations of Muslim women and men, especially their depictions of Islamist and violent youth cultures.

Prerequisites: Previous study of German

Notes: Taught in German. This course alone cannot satisfy the FLR requirement, nor the Humanities 1A nor Multicultural requirements, nor count towards the major or minor in German Studies. To satisfy requirements, you must enroll in this course AND either German Studies 331 or European Studies 316.

History

HIST-101-01 - History - 2011-2012

(Fall) Foundation: Crossing Medieval Boundaries: European, Mediterranean, and Atlantic Encounters, 1200-1700

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive; Medieval Studies 101F-01)

This seminar focuses on medieval boundaries: those separating Christians, Jews, and Muslims in Europe, as well as those between men and women from the thirteenth through sixteenth centuries. The course also examines new boundaries separating--and constructing--Europeans, Americans, and Africans in the transition from "medieval" to "modern." Engaging closely and critically with sources from Atlantic societies of these centuries, students will investigate and debate the making and remaking of "Western culture" in an era of state formation, imperial expansion, agrarian capitalism, and chattel slavery. Readings range from Christian-Jewish disputations to indigenous writings from the Americas.

HIST-101-01 - History - 2011-2012

(Spring) Foundation: The Civil Rights Movement

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Writing-intensive; African American and African Studies 100)

We will examine the crusade for desegregation both within and beyond the South. Some attention will be given to the movement's Reconstruction precedents, but we will concentrate on the post-1954 period. Readings will cover how segregation was instituted; different phases of the movement; leaders, organization, and followers; the role of women and children; and post-movement history.

(Fall) Foundation: Stalinist Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (European Studies 100F-03)

An exploration of revolutionary terror. Centered on the Hungarian and Czech experience from the start of the Cold War, this course covers the Communist takeovers and expropriations of the late 1940s, the Yugoslav deviation, and various policies and spectacles of the Rakosi and Gottwald regimes, including the show trials. It then turns to the unraveling after Stalin's death, in which memories of terror played an important role. Assignments balance historical studies with memoir, art, fiction, and film. Emphasis lies on comparative analysis of politics high and low.

HIST-101-02 - History - 2011-2012

(Spring) Foundation: How Wars End

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar

What social processes and institutions are necessary to bring an end to war? Do the efforts of citizens make a difference? What about educational structures? What is the role of visible forms of restorative or retributive justice? This first year seminar focuses primarily on small, regional conflicts in Africa, to explore the social processes and institutions which facilitate the resolution of conflict. We will begin in the late 19th century, but concentrate on more recent events. Course assignments are designed to develop skills in academic writing, historical research, and collaborative learning.

(Fall) Foundation: Chinese Diasporic Communities around the World: History, Identity, and Race

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive)

How does a study of the Chinese diasporic communities in Southeast Asia, the U.S., and other parts of the world help us rethink concepts of "Chinese-ness"? We seek to answer the question in this introductory history seminar on the Chinese diaspora. Coverage spans from the 1500s to the present. Readings focus on the question of Chinese-ness as constructed and negotiated by different groups and individuals. Themes include imperialism, race, ethnicity, gender, nationalism, transnationalism, orientalism, hegemony, and globalization.

(Fall) Foundation: Gender and Power in the History of Mount Holyoke College

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Writing-intensive; Gender Studies 117F-01)

Mary Lyon, founder in 1837 of Mount Holyoke Female Seminary, held out to her students the possibility that they might transform the world--a tall order for young women who were excluded from proper citizenship and political power. To Lyon, duty, discipline, and community would make it possible. What transformations ensued? And what can we learn from them about the complexities of gender and power? This course will introduce students to the craft of historical research through the richness of the College Archives. Special attention will be paid to the College's missionary past, its role in labor research and activism, and the place of racism and antiracism in its history.

(Spring) Foundation: Women, Politics, and Activism in U.S. History

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Writing-intensive)

How have women both used and rejected the power of the United States government to pursue their visions of a just world? This seminar examines the history of women's activism and political leadership in the United States and elsewhere under U.S. rule. African American freedwomen, white woman suffragists, Italian immigrant anarchist-feminists, Puerto Rican labor activists, builders of an international women's movement, Civil Rights leaders, advocates of gay marriage, and housewives who organized for change on the right as well as on the left are among the women whose movements and political initiatives we will study.

(Spring) The Medieval World

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

The course will provide an introduction to the history of the Middle East and Europe from the decline of the Roman empire through the aftermath of the Black Death. The period is best known for dividing the Mediterranean into Christian and Islamic worlds, but Europe and the Middle East were united by geography, intellectual traditions, economic trends, and, above all, the shared challenges of maintaining monotheisms in a world reluctant to conform with the standards of sacred texts. In addition to the diffusion of Christianity, Rabbinic Judaism, and Islam, we will explore parallels and divergences in the political, economic, social, and cultural histories of Europe and the Middle East.

(Fall) History of Modern South Asia, 1700 to the Present

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course will explore the history of South Asia between the eighteenth century and the present. Using a combined chronological and thematic approach and against a historical canvas that engages such diverse issues as gender, political economy, conquest, resistance, state formation, economic exploitation, national liberation, and identity politics, the aim of this course is to interrogate the impact of British colonialism and South Asian nationalisms on the state, society, and people of the subcontinent. Using primary and secondary sources, we will address both the most significant historical moments of modern South Asian history and the historiographical debates that surround them.

(Fall) Ancient Greece - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Classics 127f)

This course will trace the emergence and expansion of Greek civilization in the Mediterranean. From the philosophical parlors of Athens to the martial gymnasias of Sparta, the Greek city-states developed diverse political systems, social structures, and cultures. Alexander the Great then exported this legacy across the Near East. Among the themes of the course will be Greek thought, social relations, encounters with Near Eastern peoples, especially Persians and Jews, and the incorporation of the Greek world into the Roman empire. Sources will include works of classical Greek literature, as well as the more mundane insights of inscriptions, papyri, and archaeology.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

A comparative history of China, Japan, and Korea from the early seventeenth century to the present, with strong focus on regional interaction. After an introduction to early modern histories and cultures, we will examine the struggles of these countries to preserve or regain their independence and establish their national identities in a rapidly changing, often violent modern world order. While each of these countries has its own distinctive identity, their overlapping histories (and dilemmas) give the region a coherent shape. We will also look at how individuals respond to and are shaped by larger historical movements.

(Spring) Violence and Social Change in Modern Africa - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course examines processes of change that have shaped modern Africa. It seeks to provide both the information and the conceptual tools necessary for an informed interpretation of African affairs presented (and not presented) by popular media. Using fiction, historical narratives, and a wide range of interdisciplinary sources, the class examines nineteenth-century interactions of Africans and Europeans and the nature of colonial conquest, economic and social change during the colonial period, and the emergence of postcolonial African societies. Through reciprocal visits, we will also share what we are learning about Africa with the 9th grade at the Renaissance School in Springfield.

(Spring) African Cities: Development Dreams and Nightmares in the Twentieth Century

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

African cities demonstrate the failure of models of development with the aim and ideal of industrialization. This course examines the empty promises of modernity through the lens of African urban history using fiction, film, and city archives. Beginning with Timbuctu and Cairo, the course explores the emergence and decline of trade entrepôts, the rise of colonial cities, and the dilemmas of postcolonial economies and politics. Dar es Salaam, Nairobi, Kampala, Kinshasa, Harare, Johannesburg, Lagos, Accra, and Dakar are among the cities studied. Designed for those seeking only an introduction to development as well as those with further ambitions, it assumes no previous knowledge of Africa.

(Spring) Market Cultures in Western Civilization, 1600 to the Present

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(European Studies 260s(01))

The history of the modern world has often been told as the history of markets and their expansion over time and place, culminating with what is often called "market society," a society in which market relations are said to shape all of our everyday lives. What does it mean to live in a market society and how have past cultures responded to the supposed intrusion of market relations? We will explore the cultural history of markets and market relations over the past several hundred years, with particular emphasis on European and North American cultures. We will also study institutional histories of markets--how they were built and organized--alongside the ways in which people thought about and responded to forms of market exchange in everyday life.

(Fall) History of Global Inequality

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Community-based learning course)

Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

(Spring) Romans, Persians, and their Barbarians - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Ancient empires tended to create their own barbarians. During late antiquity, two empires dominated western Eurasia--Rome and Persia--and stimulated the formation of peoples along their frontiers--Germans, Moors, Huns, Turks, and Arabs. These "barbarians" were sometimes allies, sometimes enemies, but were always in close cultural and economic contact with the empires. We will examine the interactions between Rome, Persia, and their peripheries in Europe, North Africa, Arabia, and the Russian Steppe and debate how certain "barbarian" groups--Germans in the West, Arabs in the East--precipitated the collapse of two empires. We will address classic questions from a new, transregional perspective.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Based in Constantinople--ancient Byzantium and present-day Istanbul--the Eastern Roman or Byzantine Empire, survived the collapse of the Western Roman Empire by over a millennium. This long-lived state on the crossroads of Europe and Asia was Roman in law, civil administration, and military tradition, but predominantly Greek in education and language, and Christian in religion. The course explores the changing face of medieval Byzantium as it turned itself into one of the greatest civilizations the world has known. We trace the empire's survival through the dramatic centuries of the Islamic conquests, Iconoclasm, and the Crusades, until its final fall to the Ottoman Turks.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive)

The history of India has been singled out for its complex intermingling of religion and politics. This course will explore the constitution of religious identities in two of India's largest religious communities: Hindu and Muslim. Focusing primarily on the colonial period, we will discuss religious reform movements, communal violence, mass politics, and the partition of the subcontinent into the independent states of India and Pakistan. Throughout we will be interested in the ways that the colonial experience affected the religious thought and practice of Indians. Finally, we will explore the meanings of this history for the postcolonial workings of democracy and secularism in modern India.

(European Studies 260s-02)

"Our age is pre-eminently the age of great cities," wrote Robert Vaughan in 1843. Many Europeans questioned whether the greatness of cities was such a good thing, but most agreed that the history of nineteenth-century Europe could not be written without reference to them. We will examine that history from the perspective of Europe's largest cities between the mid-eighteenth and twentieth centuries. Taking greatness in its broadest sense, our readings will treat both the feats of urban transformation and the murkier histories of streets, sewers, sex, and slums. We will learn of the unruliness of cities and of their being ruled through government, social reformers, planners, and engineers.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Gender Studies 206f(01))

Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): These courses are designed for students with a background in American history who wish to focus attention on developments since the late nineteenth century.

America emerged from the Second World War as the most powerful nation on earth. This course explores the political, cultural, and social life of Americans in the most recent historical period. Topics include the birth of the national security state, cold war at home and abroad, popular culture and the consumer society of the fifties, political conflict and cultural rebellion of the sixties, the civil rights struggle, and the decline of American empire.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Gender Studies 206f(02))

Preamble (for topics courses): These courses are designed for students with a background in American history who wish to focus attention on developments since the late nineteenth century.

An examination of the powerful unleashing of literary and political activism in the wake of the AIDS outbreak. We will look at literary texts such as Tony Kushner's play *Angels in America*, Larry Kramer's novel *Faggots* and play *The Normal Heart*, Sarah Shulman's novel *People in Trouble*, and Jonathan Larson's play, *Rent*. We will look at the AIDS quilt and other memorializing efforts, political groups such as The Gay Men's Health Crisis, ACT UP and Queer Nation for the ways that it redefined activism and recrafted the politics of medical trials and drug distribution, and will conclude with the role AIDS played in the consolidation of the Christian New Right.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Latin American Studies 287fs)

Latin America's inequalities have led to the exclusion of millions of voices from official historical documents. These voices emerge in testimonial literature, a literary genre where scholars create a written account of the "testimonies" of marginalized individuals. The factors that influence the production of testimonial literature will be explored through memory, authorship, and first world/third world relations, using *I, Rigoberta Menchú: An Indian Woman in Guatemala*, and the debates that arose after she won the Nobel Peace Prize. The class focuses on issues of subjectivity, identity, and discourse analysis as tools for using testimonial literature as a historical source.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Gender Studies 206s-01)

This course uses archival records, fiction, life histories and outstanding recent scholarship to investigate African women's actions in a century that encompassed women's loss of agency and authority but the endurance of their responsibility for the production of food. We investigate the erosion of women's economic power and the loss of women's work of governing at conquest, in the early colonial period, and as a consequence of Africa's integration into the world economy as its least powerful player. We examine women's efforts to sustain productive activities in the face of opposition and the gendered tensions these efforts provoke. Optional 4th hour discussions.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Same as Gender Studies 333)

In this seminar, we will study the history of sexuality, desire, and bodies. The premise of this interdisciplinary seminar is that sexuality is both historically constructed (fluid and changing over time and culture) and embodied and lived (experienced over many as essential and unchanging). We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications--mainstream and "normal" or subcultural and "deviant"--as mutually constructed.

Within decades of Muhammad's death, the early Muslims found themselves in charge of an empire that extended from the Hindu Kush to the Atlantic. The populations over which the first generation of Muslims ruled were largely Christian, Jewish, Zoroastrian, or Buddhist. This seminar examines the complex interactions between Muslims and non-Muslims, conquerors and conquered, during the first Islamic century. The seminar will attend to two questions: How did the conquerors draw on Islamic-Arabian traditions as well as Roman and Persian institutions to establish enduring structures of rule over non-Muslim populations? How did the conquered respond to the creation of an Islamic empire?

As rising food prices cause distress, starvation, and food riots around the world, we focus on the creation of markets for food. How did food become a marketable commodity, and what have the consequences been? What social expectations lie behind food riots, and what changes have food riots caused? How are agrarian systems that produce food as a commodity different from those that combine cash crops with self-provisioning? Why is greater market integration seen as a panacea by some and an anathema by others? We explore these questions globally, with a focus on Africa.

The Roman Empire underwent a dramatic transformation during the transition from antiquity to the middle ages. It was an era of great challenges and great achievements. The borders of the empire expanded as lost territories were reconquered. The legal code behind most modern legal systems was created. Some of the most impressive buildings of all time were constructed. Yet foreign invasions and internal revolts caused upheavals, while the traditional fabric of society was threatened by plague. The Christianisation of the state led to the persecution of other faiths. This seminar aims to shed light on political, social, and cultural history. We end by looking at the rise of a new power: Islam.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

During late antiquity, individuals separated themselves from families, cities, and relations of power to practice asceticism in monasteries. They thus contributed to the transformation of the very societies they had abandoned. The seminar will debate the ways in which monastic practices, institutions, and literatures were involved in the social, cultural, and economic changes that distinguished "medieval" from "ancient" societies. The rich documentation for monasticism--saints' lives, letters, papyri, ostraca, and charters--will enable us to investigate the shifting roles of holy women and men, anchorites, holy fools, and coenobites in early medieval societies, from Egypt to Ireland.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course analyzes propaganda techniques and war mobilization strategies. We present comparative, cross-cultural analyses of recent and historical examples of the influences of the state, state-society relations, the media, and information control and distortion in the mobilization for war. Case studies are selected to address the following questions: Why is propaganda necessary? What is the media's relationship to state propaganda efforts? How do citizen groups and protest movements contest state propaganda efforts? We conclude by examining key trends in the development of mass media forms and technologies and their implications for global politics.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course provides an introduction to the basic concepts of, and issues in, international human rights. Prior to World War II, there was very little focus on the question of human rights within the international system and within the discipline of international relations. Since that time we have seen a significant expansion of human rights theory, practice, and institutions. This course outlines the historical ideational and institutional developments of human rights. It exposes students to a range of theoretical propositions and empirical findings to understand the role (and limits) of human rights in the international system today.

(Spring) International Society - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

An intensive reading course in theories of international society: the idea that states and peoples are or should be linked to each other through a web of shared values and institutions. It focuses on the work of Hedley Bull, Immanuel Kant, and John Rawls. How did these three men understand international society? What are or should be the values and institutions that give rise to it and support it? What implications do their visions of international society have for war and peace, state sovereignty, religion, democracy, capitalism, distributive justice, human rights, and international law? What responses and criticisms have their arguments engendered?

(Fall) The Changing Role of Diplomacy in the Twenty-first Century

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This seminar examines changes in the ways U.S. foreign policy is implemented since the end of the Cold War. During the Cold War, U.S. foreign policy was made and implemented within established parameters of negotiation procedures with known international players. Today, it is adapting to more creative interactions with a range of new actors. This course analyzes specific challenges to U.S. foreign policy, such as dealing with ethnically driven conflicts and creating "coalitions of the willing" to respond to crises. Classroom simulations of interagency/international policy procedures are important course components.

(Spring) Human Rights and Democracy in Africa

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

The seminar explores the complexity and diversity of African politics in the 21st century. Africa's varied and deeply-rooted traditions are in many ways still alien to and misunderstood by the United States and its Western allies. This course reviews cultural traditions and how they support or challenge human rights and democracy. Special emphasis will be placed on the role of women in light of the Universal Declaration of Human Rights and international conventions on the rights of women and children. We will examine cases of culturally-based clashes that underlie contemporary conflicts. The course will include case studies and simulations.

(Fall) Florence and the Making of the Renaissance

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

Michelangelo's *Poems*, Da Vinci's *Notebooks*, Machiavelli's *Prince*. These are only some of the many windows into the extraordinary genius that was the Renaissance. In these works by Florentine writers, artists, and thinkers, man placed himself at the very center of the universe and claimed the right to decide his own destiny. This course will engage with some of the greatest achievements of the Renaissance experiment, giving special importance to the ways through which--from literature, to the visual arts, to architecture and political science--Florence consciously pursued a mythical status to seal its own supremacy.

ITAL-320-01 - Italian - 2011-2012

(Spring) Redefining the Cosmos: Voyages to the New World in the Italian Renaissance

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The Renaissance has long been understood as the very laboratory of modernity. While revolutionary ideas about art, politics, and science took shape, Europe faced an extraordinary challenge: how to integrate into "the Renaissance experiment" the new experience opened by the voyages to the New World. In Italy, this challenge produced a heterogeneous body of literature--epic poems, popular cantari, travelogues--which represents at once a historical account of the "discoveries" and ethnographic exploration with an incursion into the fantastic. Pulci, Columbus, and Vespucci lure us into unexplored territory, where science, poetry, and history merge in an unparalleled metaphor for humanism.

(Fall) Novelle e storielle/Novellas and Tales

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

From Boccaccio to Calvino, Italian writers experimented with the difficult art of the short story. This course will explore the universe of the short story in modern Italy, with special attention to the phenomenon of the literary magazine, which for the first time offered women writers a small but solid platform to launch their careers. Readings will include: DeAmicis, Neera, Marchesa Colombi, Serao, Pirandello, Ginzburg, Buzzati, Pavese, Landolfi, and Calvino.

(Spring) Seminar in Romance Languages and Cultures: Topic: The Mind of the Traveler: Journeys, Expeditions, Tours

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Taught in English; Spanish 360, Romance Language 375, French 321)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students wishing to obtain language credit are expected to read works in at least one original language. Papers will be written in either English or the Romance language of the student's choice.

Travel literature has always been a precious source for the study of culture, politics, arts and, last but not least, people. From Tacitus to Marco Polo, from Stendhal to Camilo Jose Cela, we will read and discuss authors who traveled for political, personal, and recreational reasons. We will also pay special attention to tales of emigration and immigration in the third millennium.

Prerequisites: for language majors: two courses in culture and literature at the 200-level

Notes: Note: Students wishing to obtain 300-level credit in French, Italian, or Spanish must read texts and write papers in the Romance language for which they wish to receive credit.

(Spring) Introduction to Judaism

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 212)

Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

(Spring) Jewish Spiritual Autobiographies - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 215s)

Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive; Religion 222-01, Gender Studies 210-01)

This course examines the representations and roles of women in Jewish culture, from the literature of the Hebrew Bible to the contemporary period. What were the distinctive ways in which women's religious life expressed itself by way of prayer and ritual practice? Were there women mystics and visionaries? How did women exert their influence as mothers and wives? There will be significant focus on the dramatic developments taking place among contemporary Jewish women: innovative rituals and experimental liturgies; opportunities to become rabbis; new approaches to God, theology, and social issues; the Jewish lesbian movement; women's writing and documentary filmmaking.

(Spring) The Sabbath in Jewish History and Culture

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 225)

The Sabbath, the notion and institution of a day of rest, appears to have been innovated in ancient Israel, as evidenced by the Hebrew Bible. This course systematically explores the origins, development, and nature of the Sabbath in Judaism, including desisting from labor and worldly pursuits, and as an opportunity for spiritual rejuvenation and communal celebration. How has the observance of the Sabbath changed over time, and varied among different regional communities? How has it evolved in our own time? We will also take a comparative approach by studying Sabbath or days of rest in other religious traditions, including both Western and Asian cultures.

(Fall) Introduction to Jewish Mysticism

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 235f)

Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the *Kabbalah* of thirteenth-century Spain, focusing upon the seminal work of this period, the *Zohar*; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of Eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 276)

This course sets canonical Jewish American literature in creative dialogue with contemporary Jewish American writers, filmmakers, and performance artists to explore how early twentieth-century figures (Abraham Cahan, Anzia Yezierska, and Henry Roth) continue to influence --inspire--a rising generation of authors. The key mediating figure in this generational dialogue is Philip Roth, whose work we will examine as well. Topics to be explored include "immigrant" writing then and now; the uses of nostalgia; genealogies of standup comedy and popular culture in general; the emergence of "hipster" Judaism and its various modes of expression (above all via websites).

(Spring) Cicero and the Enemies of the Roman Republic - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

The career of the Roman orator and statesman Marcus Tullius Cicero spanned the last generation of the Roman Republic, a period of political instability and civil war. As the leading orator of his day, Cicero often used his rhetorical skills to thwart those who he believed were bent on the destruction of the Roman Republic. In this course, we will examine the role of public oratory in the political process in this period with a close reading of Cicero's speeches and letters concerning one of his political enemies (Catiline, Clodius, or Mark Antony).

(Fall) Myth, Memory, and History: Writing the Past in the Roman Republic

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Livy and Sallust, the best known historians of the Roman Republic, viewed history writing as a moral enterprise, presenting events from the past as exemplary tales to inform and enlighten the lives of their readers. Their narratives thus are highly rhetorical, combining myth, memory, and history to reconstruct the past. Close reading of selections from Livy's *Ab Urbe Condita* and/or Sallust's monographs--the *Bellum Catilinae* and *Bellum Jugurthinum*--will lead to discussions about how Romans viewed their past and how they wrote about it.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course is devoted to the work of commanding figures of Latin American and Caribbean thought at various times and different places. Thinkers whose work may form its basis in various offerings include among others: Columbus, Bartolomé de Las Casas, José Martí, J. C. Mariátegui, C.L.R. James, etc. Their lives and work exemplify the diversities, varying regional settings, social contexts, and shifting historical coordinates of major epochs of transition. Their assessment of a myriad of key issues has made each a touchstone of continuing authority and influence extending beyond their particular locale, time, or region. Why this should be so is among the many questions we will address.

(Spring) Special Topics in Latin American Studies: Latina Feminisms

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Spanish 330s(01), Gender Studies 333s(05))

Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.

This course offers an interdisciplinary approach to the study of feminist ideologies among Latinas throughout the United States. Employing a range of sources from archival texts to artistic images and ethnographies, we will study the histories and representations of Latina feminist theories across academic and aesthetic approaches. Focusing on the multiplicity of lived experiences among Puertoorriqueñas, Chicanas, Mexicanas, Centroamericanas, Dominicanas, Suramericanas and many other communities in the United States, we will interrogate how gender and sexuality have informed the development of Latina feminist movements and political histories.

(Fall) Calculus I

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course is for students who have not studied calculus and who have the necessary precalculus background. It presents rates of change and their applications, integrals, the fundamental theorem, and modeling of phenomena in the natural and social sciences. All students are required to complete the online self assessment of precalculus skills before the course begins.

MATH-110-01 - Mathematics - 2011-2012

(Spring) Explorations in Algebra - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

(Fall) Explorations in Number Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Using examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.

MATH-120-01 - Mathematics - 2011-2012

(Fall) Explorations in Geometry: Origami and Mathematics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Origami, the art of paper folding, has strong connections with mathematics. The process of folding paper can be explored and modeled with geometry, algebra, number theory, graph theory, and more. In this course we will study origami primarily through geometry, but with connections to other branches of mathematics. Students will fold many origami models for observation and mathematical study. Effective ways to use origami projects to teach and inspire middle-school and high-school mathematics students will be discussed. No prior origami experience is needed.

MATH-120-01 - Mathematics - 2011-2012

(Spring) Explorations in Geometry

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The system of geometry devised by the ancient Greeks was immutable until the nineteenth century, when it was put in a broader framework better able to accommodate the varied interests of physical science and mathematics. In this course, we begin by a careful and close observation of what we can see and physically construct, reasoning informally about those observations. We will then explore a selection of geometry from the time of Euclid to the recent past, including curved surfaces and the hyperbolic plane.

MATH-160-01 - Mathematics - 2011-2012

(Fall) Introductory Seminar: Mathematics and Music

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

First-year seminar

For centuries people have explored the connections between mathematics and music. Sounds are waves, and pleasant-sounding musical intervals are simple fractions. Keyboard instruments are tuned following both regular and slightly irregular mathematical rules. Bells in change ringing follow simple patterns. Some musical pieces can be played both backwards and forwards. On the other hand, aesthetics are paramount in music, yet also play a part in mathematics. This course will explore these ideas.

Prerequisites: fy, must be able to read music or permission of instructor; 4 credits; expected enrollment 12

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

First-year seminar (Speaking- and writing-intensive; Physics 160)

We will use the life and work of Galileo to organize a survey and investigation of the many texts and traditions that came together in the scientific revolution, ranging from classical philosophy and mathematics to the Renaissance arts.

(Fall) Examining Features of Shape and Measuring Space in One, Two, and Three Dimensions

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Education 202)

We will work with 2D and 3D shapes, develop mathematical vocabulary regarding features of shapes, and explore definitions and properties of geometric objects. The seminar includes a study of angle, similarity, congruence, and the relationship between 3D objects and their 2D representations. The measurement component will provide opportunities to examine different attributes of size, develop facility in composing and decomposing shapes, and apply these skills to make sense of formulas for area and volume. As we explore the conceptual issues of length, area, and volume and their complex interrelationships, we will also examine how children develop these ideas.

MATH-302-01 - Mathematics - 2011-2012

(Fall) Complex Analysis

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Topics include differentiation and integration of functions of a complex variable, the Cauchy integral formula, residues, conformal mapping, and applications to physical science and number theory.

Prerequisites: Mathematics 203 or Physics 303

Notes: offered alternate years at Mount Holyoke and Smith Colleges

Instructors: M. Noonan

MATH-309-01 - Mathematics - 2011-2012

(Spring) Topics in Analysis: Hilbert Spaces

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The course will begin with studying inner product, orthogonality, Hilbert spaces, and their applications to minimization problem and Fourier analysis. The latter part of the course will serve as an introduction to functional analysis.

Prerequisites: Mathematics 202, 211; Mathematics 301 helpful but not required

(Spring) Topics in Geometry and Topology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This is an introduction to point-set topology (also referred to as general topology). Point-set topology is one branch of the much broader area, topology. It is concerned with the study of properties of abstract topological spaces and structures related to such spaces. The material covered in this course will provide the common foundation for courses in algebraic topology, geometric topology, and differential topology. The core topics to be studied include: basic set theory, various interesting topologies, continuous functions, connectedness and compactness, separation axioms, countability axioms, nets and filters.

Prerequisites: Mathematics 203, one of Mathematics 211 or 251, or permission of the instructor

MEDST-101-01 - Medieval Studies - 2011-2012

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Crossing Medieval Boundaries: European, Mediterranean, and Atlantic Encounters, 1200-1700

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive; History 101f-01)

This seminar focuses on medieval boundaries: those separating Christians, Jews, and Muslims in Europe, as well as those between men and women from the thirteenth through sixteenth centuries. The course also examines new boundaries separating--and constructing--Europeans, Americans, and Africans in the transition from "medieval" to "modern." Engaging closely and critically with sources from Atlantic societies of these centuries, students will investigate and debate the making and remaking of "Western culture" in an era of state formation, imperial expansion, agrarian capitalism, and chattel slavery. Readings range from Christian-Jewish disputations to indigenous writings from the Americas.

(Spring) Seminar in Medieval Studies: Chaucer: *Stories of Cupid's Martyrs*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 311)

This course begins with a close reading of Chaucer's great love story *Troilus and Criseyde* together with *The Legend of Good Women*, taking into consideration the multiple cultural contexts a late medieval audience would have brought to both poems along with such topics as honour, love, *trouthe*, and betrayal. We will conclude by comparing Shakespeare's *Troilus and Cressida* with Chaucer's work as a way of understanding the continuities and changes between a late medieval and early modern understanding of men and women in love and war.

Music

MUSIC-100-01 - Music - 2011-2012

(Fall) Basic Musicianship

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Explores the ways in which sound is organized into musical structures. Topics include the physical properties of sound; the basic vocabulary of Western music (scales, key signatures, intervals, triads, rhythm, meter); and an introduction to musical form and analysis. Includes extensive practice in music reading, sight singing, ear training, and critical listening.

(Spring) Music and Technology

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

It is now possible to record, manipulate, notate, and compose music with a variety of powerful and flexible tools using the personal computer. This course will focus on hands-on experience with various sorts of music software, including recording and editing, mixing, synthesis and midi interfaces,

notation, and various instructional programs. In the process of experimenting with these tools and operating on their favorite musical styles, students will learn a good bit of notation, ear training, and rudimentary principles of arrangement and composition. Basic computer literacy (such as comfort with basic editing commands and the concept of keyboard shortcuts) is required.

First-year seminar

The seminar will introduce and discuss various musical works and genres that fall under rock critic Ann Powers' definitions of "Violator Art," exploring them within the context of their wanton and disturbing appeal, as well as their often scandalous social impact. Topics will include the Second Viennese School, free jazz, protest music, punk rock, hip-hop, works such as J. S. Bach's "Cantata No. 179," Strauss's "Salome," Stravinsky's "Le Sacre du printemps," Billie Holiday's "Strange Fruit," George Crumb's "Black Angels," and artists such as Frank Zappa, Donna Summer, Prince, and Nirvana. (Students should be prepared for mature themes and some coarse language.)

(Spring) First-Year Seminar: Keyboard instrument - How Technology Transformed Music

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar

Students will explore issues common to all keyboard instruments, keyboard geography, tuning and temperament; investigate the instruments' constructions and playing mechanisms; and examine the interrelationship of technological advances in instrument construction and the nature of the music composed for each instrument. Throughout the course, students will listen to music composed for each specific instrument, as well as music written for other media realized on various keyboard instruments. After the introduction of a basic vocabulary for describing music, students will examine how the differences in performing medium affect their understanding of a piece of music.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Writing-intensive)

This course is a survey of selected musical traditions from different parts of the world, including Africa, Indonesia, Indian, the Caribbean, and the United States. The course adopts an ethnomusicological approach that explains music as a cultural phenomenon, and explores the social and aesthetic significance of musical traditions within their respective historical and cultural contexts. It examines how musical traditions change over time, and how such changes reflect and relate to social and political changes within a given society. Weekly reading and listening assignments provide the basis for class discussions. Students are expected to undertake a final project in music ethnography.

(Fall) African Popular Music

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive)

This course examines selected genres and their relationships to the political and social dynamics of their respective national origins. Regional examples like highlife, soukous, chimurenga, and Fela Anikulapo-Kuti's Afro-beat will provide the basis for assessing the significance of popular music as a creative response to the African colonial and postcolonial environment. The course also discusses African hip-hop music by exploring how indigenous cultural tropes have provided the basis for its local appropriation. Themes explored include music and identity; music, politics, and resistance; interaction of local and global elements; and political significance of musical nostalgia.

(Fall) Psychology of Music

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Psychology 245)
Every culture in the world has some form of music, but why did music evolve, and what function does it serve? In this course, we will explore the cognitive and neural processes that underlie music perception and production to ask the following questions: Does music have universal features that cross cultures? How does music convey emotion? What do infants know about music? Is music specifically human? And finally, what are the parallels between music and language? Through these questions, we hope to discover something about the origin of music and what makes it such an integral part of our daily lives.
Prerequisites: 100 level course in Psychology or permission of instructor
Notes: Does not count towards the music major or minor or distribution in Humanities. Formal music training not required.

Philosophy

PHIL-101-01 - Philosophy - 2011-2012

(Fall) Introduction to Philosophy

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course will explore topics that philosophers have grappled with for thousands of years, and that still undergird (or sometimes threaten to undermine) our understanding of the world, our knowledge, ourselves, and each other. In historical and modern texts of the Western intellectual tradition, we will discuss questions such as: What exists? What knowledge can we claim? What are people like? What is, or should be, our role in the world? In considering these answers, we will learn to do philosophy ourselves, developing our own careful reflections on these issues.

Instructors: S. Mitchell

Expected enrollment: 70

PHIL-101-01 - Philosophy - 2011-2012

(Spring) Introduction to Philosophy

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

We will consider influential philosophical texts and theories that attempt to answer questions such as these: Is it possible for creatures like us to have knowledge of an external world that exists outside of our own minds? Are we justified in believing that events in the future will be much like events in the past? Is the human mind an immaterial substance (like a soul), or is it a mere physical object (like the brain)? Do human beings have free will? Is a person's having free will compatible with all of her actions being predetermined by events occurring before her birth? What, if anything, makes an action morally right or morally wrong?

Instructors: S. Hawthorne

PHIL-102-01 - Philosophy - 2011-2012

(Fall) First-Year Seminar on Topics in Philosophy: What is the Good Life?

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Speaking- and writing-intensive)

How should I live? What actions are right and wrong? How should I treat myself and others? In this class, we will discuss these issues through the lens of practical problems facing daily life. By considering human rights and poverty, we will evaluate how our actions should be constrained by the needs and interests of others. Through a discussion of the environment, we will consider whether values exist in nature, who is a member of our moral community, and why. Does quantity or quality of life matter? We will consider these issues and other questions of well-being in the context of euthanasia. This course will explore a range of ethical dilemmas with an eye towards living the best life.

PHIL-102-01 - Philosophy - 2011-2012

(Spring) First-Year Seminar on Topics in Philosophy: Personal Identity

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

First-year seminar (Speaking-intensive)

Who or what am I, and what makes me what I am? How am I different from a very sensitive robot, or a very clever dog? Am I a single changing person throughout my life, or a series of unchanging ones? What will connect my past to my future? This cluster of philosophical worries will occupy the center of this course. In the process of addressing them, we will work to develop methods for resolving problems that appear beyond solution.

PHIL-103-01 - Philosophy - 2011-2012

(Spring) Comparative Introduction to Philosophy

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

In this course, questions concerning views of the self, humans in relation to one another, and humans in relation to the non-human world will be explored by bringing together conventional philosophy texts with culturally diverse philosophical writings. Through these questions and the materials which address them, issues of ethnicity, race, class, and gender will impact our discussion of various perspectives on fundamental problems.

PHIL-201-01 - Philosophy - 2011-2012

(Spring) Philosophical Foundations of Western Thought: History of Ancient Philosophy

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

An introduction to ancient Greek philosophy, focusing mainly but not exclusively on the works and ideas of three Athenian philosophers who worked and taught in the period between the Persian Wars and the rule of Alexander the Great, more than 2,300 years ago: Socrates, Plato, and Aristotle. Topics to be discussed include: What is the nature of the world? What is truth, and how can it be known? What kind of life should we live? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will take care to place these figures and their works in their historical and cultural context.

PHIL-205-01 - Philosophy - 2011-2012

(Spring) Ethics

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course serves as an introduction to some of the main philosophical theories of ethics and ideas about human nature through a study of fundamental approaches including utilitarian, deontological, and virtue ethics. Among the issues covered will be the clarification of basic assumptions about morality, such as whether morality has any basis beyond differing teachings of various cultures (relativism), or whether all actions are fundamentally selfish (egoism). Attention will be given to the application of ethical theory and principles to contemporary issues.

PHIL-208-01 - Philosophy - 2011-2012

(Fall) Knowledge and Reality - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course is an introduction to the central topics in epistemology (theory of knowledge) and metaphysics (theory of reality). It will look at questions such as: How is knowledge possible? What is knowledge? Do we know anything? Is time real? What makes you the same person now and in ten years? Could things be otherwise than they are?

(Spring) Theories of Probability and Causation

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

In this course we will look at theories of causation, probability, and their interaction. We will look first at Hume on causation, and then move on to some very basic probability theory. We will briefly explore the standard statistical approaches and go on to Bayesian reasoning and confirmation theory. Finally, we'll examine recent developments in the Bayesian Net theory of causation. As a whole, the class is an investigation of recent mathematical and philosophical theories about how science works, what justifies the hypotheses we ought to believe, and how observations could justify hypotheses about unobserved entities and regions.

Prerequisites: One course in either Philosophy or Mathematics or permission of instructor.
